SUBJECT: Resolution 24-256, CD1, SMA New Single-Family Home Hawaii Kai
TMK 3-9-002:002:031 – **COMMENTS**

Aloha Chair Waters and Councilmembers,

Thank you for this opportunity to testify on Resolution 24-256, CD1 which would grant a special management area major permit to build a very large house and other facilities at 6973 Kalanianaole Hwy., which is on a "corner" lot of shoreline in Hawaii Kai.

In my prior testimony I stated that it was my understanding the current design was not the same as that presented to the Hawaii Kai Neighborhood Board. I was misinformed about that and have been assured recently that it was the same.

Paragraph D. 1 in the CD1 limits outdoor lighting fixtures to no more than 3,000 degrees kelvin. **A temperature of 2,700 is a bit warmer and easier on birds and other near-shore animals as well as people.** Given the importance of our wildlife, I encourage the Honolulu Department of Planning and Permitting to consider requiring lighting with a lower kelvin temperature for future projects.
