Testimony:

In full support of RESO 25-128. Long overdue, and to the ability to view chaos in action. Make those habitual unlawful offenders be accountable and be prosecuted at the highest level. Additionally, there should be "funding" for City Park Ranger's positions.

Testimony:

I fully support the urgent and significant Resolution 25-128, which is crucial for protecting our municipal facilities.

With the alarming increase in damage and break-in reports at our local district parks and the recent arson fire at the Wahiawa District Park, it is clear that our city's public facilities are under threat. We must act swiftly to protect and monitor these facilities and prevent the rising wave of vandalism and destruction affecting our community, particularly our youth. The destructive actions of these crimes are not just damaging property and costing thousands in funds to repair and replace equipment; they are penalizing the youths who rely on these parks, pools, and municipal building structures for a safe outlet to exercise and participate in organized team sports activities.

The city's recreational centers provide a comprehensive recreational program in the community. Particularly for the constituents of the Salt Lake community, the Salt Lake District Park facilities include a multi-purpose building with a gym and meeting rooms, a heated swimming pool, and a vast playing field. There are three program periods throughout the year: fall, spring, and summer. These activities are geared for all ages, including classes in arts and crafts, games and sports, seasonal activities and crafts, and excursions, all vital activities for the youth to gain valuable life lessons of sportsmanship, teamwork, loyalty, healthy life choices, and possibly may be the only safe outlet for some kids.

May the members of the City Council pass the final reading of this vital Resolution and enact the proper action to operate security videotaping of all municipal properties.

Testimony:

Aloha Councilmembers,

We must reclaim our public spaces. Citizens should not feel unsafe or threatened when utilizing our beautiful, outdoor public parks or beaches. I believe this resolution is a first step that must be tied with a greater, more significant public police presence.

I urge the Council to support this resolution!

Testimony:

I am in strong support of Resolution 25-128. Having video cams in our parks and other City locations gives the city another important tool to increase public safety. Many Cities global already use video cams mounted on building, poles, traffic lights etc. With the shortage of officers this will prove to be a valuable tool for HPD, HFD and other agencies. Instead of having to send an officer to check on a complaint the video cam display activity live. I suggest this body visit other cities to get an idea on proof of concept and what type of system that fits this city
