Self	Oppose	Nov 5, 2026 @ 08:01 AM

Testimony:

The overuse of cameras to monitor society has more negative outcomes than positive. Who is going to monitor them? If we're already down officers, are you relying on ai? Why are we putting peoples faces into ai when their likeliness can be used for whatever ill intentions a person has?

I also worry that this would leave to Honolulu turning into a surveillance state.

The tech this takes will also negatively the environment. We are living through a super el nino and suffering. Why would we add more waste and emissions to the atmosphere to make it all worse?
