MESSAGE FROM THE MAYOR

It gives me great pleasure to present the Honolulu Police Department 2020 Annual Report. This comprehensive document details the structure, functions, responsibilities and outstanding accomplishments of the department.

During the especially challenging year of 2020, the department remained steadfast in its commitment to our community and residents, innovating to address increasingly complex issues while continuing to serve and protect with aloha.

On behalf of the people of the City and County of Honolulu, I salute the officers and civilian employees of the Honolulu Police Department for their devotion to duty and service to our community, and recognize the excellent work of "Honolulu's finest" in safeguarding our community and the people of O'ahu.

A handwritten signature in black ink that reads "Rick Blangiardi". The signature is written in a cursive, flowing style.

Rick Blangiardi, Mayor
City and County of Honolulu

HONOLULU POLICE COMMISSION

COMMISSIONER

Jerry C. Gibson
VICE CHAIR

Carrie K.S. Okinaga
COMMISSIONER

Richard M. Parry
COMMISSIONER

Loretta A. Sheehan
COMMISSIONER

The Honolulu Police Commission is made up of seven members who are appointed by the Mayor and confirmed by the City Council. All members serve staggered terms of five years. They volunteer their services and do not receive any compensation.

A chair and vice chair are elected from within its membership every year. The commission chair for 2020 was Ms. Shannon L. Alivado. Mr. Jerry C. Gibson served as vice chair.

The commission has the following mandated responsibilities:

- Appoints and may remove the Chief of Police;
- Evaluates the performance of the Chief of Police at least annually;
- Reviews rules and regulations for the administration of the Honolulu Police Department;
- Reviews the annual budget prepared by the Chief of Police and may make recommendations thereon to the Mayor;
- Compares at least annually the actual achievements of the police department with the goals and objectives in the five-year plan; and
- Receives, considers, and investigates charges brought by the public against the conduct of the department or any of its members and submits a written report of its findings to the Chief of Police.

MESSAGE FROM THE CHIEF OF POLICE

Aloha,

It would be an understatement to say that 2020 was a tough and challenging year. In the midst of a worldwide pandemic, nearly every industry and government service was faced with a new, never-before-seen set of challenges and responsibilities. The Honolulu Police Department (HPD) was no exception.

Tragedy struck early in the year, when Officers Tiffany-Victoria Enriquez and Kaulike Kalama were killed while responding to a stabbing at a Diamond Head home. After shooting the young officers and his landlord, the gunman ignited a fire that completely destroyed multiple homes and took his own life. The community grieved alongside the HPD as we tried to process the overwhelming tragedy and to support the families left reeling in the aftermath.

In the spring, the coronavirus known as COVID-19 began to exact its toll. Across the world, millions died, national economies crumbled, and medical resources were stretched

to the breaking point. On Oahu, the number of sick and dying persons slowly climbed as tourism slowed to a trickle. State and city government agencies and nonprofit organizations pivoted to serve those in need of health services and economic aid.

For the HPD, this meant the reassignment of officers and shifts in funding and equipment. Youth and community programs were canceled due to school closures and social distancing, and recruit graduation and recognition ceremonies were restricted to immediate family members. The Homeless Outreach and Navigation for Unsheltered Persons (HONU) program was modified to accommodate COVID-19 screening, temperature checks, and physical distancing after community shelters shut down or began operating at a reduced capacity. Officers were used to staff the COVID-19 violations hotline, food distribution drives, virus testing locations, and vaccine sites. Dozens of vehicles were acquired to enforce beach and park closures and bans on large gatherings.

Throughout the pandemic, HPD employees continued to report to work and fulfill their duties as essential workers. Patrolling the streets and freeways, investigating crimes, dispatching officers, repairing vehicles and radios, and other critical services to the public were uninterrupted. The department's transition to updated Computer-Aided Dispatch and Records Management Systems continued, as did the migration to the P25 radio system that will provide interoperability with federal, state, and county agencies. New training simulators were installed at the academy, and advanced drug screening and DNA equipment were added to the crime lab. Other initiatives include the hiring of victim/witness counselors and the opening of a mobile assessment center for the Ho'opono Mamo juvenile diversion program.

It was a demanding year, but by December, a sense of relief began to emerge as shipments of the COVID-19 vaccines made their way to Hawaii. At Leeward Community College, the HPD partnered with the state Department of Health and other agencies to make the vaccine available to first responders and essential workers. Vaccine distribution continued through the beginning of 2021. So while much remains to be done, there is much to be hopeful for.

DEPARTMENTAL ORGANIZATION

POWERS, DUTIES, AND FUNCTIONS

The Honolulu Police Department serves as the primary law enforcement agency for the entire island of Oahu.

The Chief of Police directs the operation and administration of the department and is responsible for the following:

- preservation of the public peace;
- protection of the rights of persons and property;
- prevention of crime;
- detection and arrest of offenders against the law;
- enforcement and prevention of violations of state laws and city ordinances; and
- service of processes and notices in civil and criminal proceedings.

The department's jurisdiction is the City and County of Honolulu. It includes the entire island of Oahu, which has a circumference of about 137 miles and an area of approximately 596 square miles. The estimated resident population is 974,600, which includes military personnel but not tourists.

For police operations, the island is divided into eight patrol districts; each district is subdivided into sectors and beats. The department's headquarters is at 801 South Beretania Street in downtown Honolulu. District stations are found in Kalihi, Kaneohe, Kapolei, Pearl City, and Wahiawa.

AT A GLANCE

In 2020, the Communications Division received 991,016 calls for service of which 859,164 (86.7 percent) were for police services. The division's operators routed 34,000 calls to the Honolulu Fire Department; 88,049 calls to the Emergency Medical Services Division and 436 to the Ocean Safety and Lifeguard Services Division, Honolulu Emergency Services Department. There were 9,367 calls for miscellaneous services which include, but are not limited to, calls for the Crisis Center, Poison Control, Regional Dispatch Center, and the neighbor island Public Safety Answering Points.

911 CALLS	2020	2019	% CHANGE
HONOLULU POLICE DEPARTMENT	859,164	935,012	-8.1%
EMERGENCY	378,037	427,953	-11.7%
NONEMERGENCY	481,127	507,059	-5.1%
HONOLULU FIRE DEPARTMENT	34,000	34,926	-2.7%
EMERGENCY MEDICAL SERVICES	88,049	97,094	-9.3%
OCEAN SAFETY AND LIFEGUARD SERVICES	436	399	+9.3%
MISCELLANEOUS	9,367	8,295	+12.9%
TOTAL	991,016	1,075,726	-7.9%

IN MEMORIAM

Officer Tiffany-Victoria B. Enriquez
1981–2020

Officer Kaulike S. G. Kalama
1985–2020

On January 19, 2020, Officer Tiffany-Victoria Enriquez and Officer Kaulike Kalama were shot and killed while responding to a stabbing call at a home in the Diamond Head area.

Officer Enriquez was one of the first officers to arrive at the scene. As the officers went down the driveway, the suspect opened fire and fatally shot Officer Enriquez. Officer Kalama was shot minutes later when he and additional officers arrived to assist.

Officer Enriquez is survived by three daughters, a grandson, and a granddaughter. She served with the Honolulu Police Department for seven years and is the first female officer in the department to die in the line of duty.

Officer Kalama served with the Honolulu Police Department for nine years and is survived by his wife and son.

NOTEWORTHY 2020

COVID-19 TRIAGE

Efforts to assist individuals living on the streets continued as the department deployed its second Homeless Outreach and Navigation for Unsheltered Persons (HONU) project at the Old Stadium Park from March to April of 2020. Despite the growing challenges brought on by the COVID-19 pandemic, the project helped 174 individuals and navigated 105 others to more permanent living arrangements within that period. The pandemic imposed greater challenges to the project's efficacy and the HONU project evolved to address these challenges.

Toward the end of March, the HONU project adjusted its operating model to become the Provisional Outdoor Screening and Triage (POST) facility. The POST facility formally opened in early April 2020 in the Keehi Lagoon Beach Park with a unique zone-based, rotational model. This new POST working model helped to increase the availability of bed space and enhance community safety by giving unsheltered individuals a place to self-quarantine with some measure of security. As of the end of 2020, the POST project provided overnight shelter for 810 persons, served 30,000 meals, and provided urgent medical care on site for hundreds more.

Throughout year 2020, the combination of the HONU and its derivative POST project provided shelter and services to 1,157 unsheltered individuals and navigated 632 of them into more permanent living arrangements.

Ho'opono Mamo Civil Citation Program

Over the last several years, it has been encouraging to see the Ho'opono Mamo program divert status and first-time criminal juvenile offenders away from the Family Courts. From its beginnings in District 5, the program continued to grow and expand its services this past year.

In 2020, the Mobile Ho'opono Mamo program began operating its Mobile Assessment Center (MAC) in District 8's Kapolei-Ewa Beach area. Maintaining the objectives of the program as well as its tools for assessing cases, the MAC made it even easier to provide for families by bringing services out to them instead of requiring families to travel to the service site. The MAC's ability to reach more participants enhances the program's potential to reduce individuals' further involvement in the juvenile justice system.

COVID-19 HOTLINE

The Community Affairs Division established a COVID-19 Enforcement Hotline to take COVID-related calls and emails from the public 24 hours a day, 7 days a week. This augmented efforts by the state and city to provide the public with information on the virus by adding evening and weekend hours for inquiries from citizens.

In addition to providing information on the latest COVID-19 enforcement rules, restrictions, etc., the hotline also took calls reporting violations and other related complaints. The reported violations and complaints were entered into the Computer Aided Dispatch System and forwarded to the Communications Division for assignment to field units for police response and investigation.

In year 2020, the COVID-19 Enforcement Hotline received and processed approximately 28,000 calls and emails.

Improved Efficiency in Recruitment and Hiring Process

The Human Resources Division's (HRD) Recruitment and Exams Unit, comprised of a sergeant and three officers, continued to utilize its recruitment website (www.joinhonolulupd.org) to allow prospective applicants to apply and get information online for the Metropolitan Police Recruit (MPR) and Police Communications Officer (formerly Police Radio Dispatcher) exams. Various social media outlets (e.g., Facebook, LinkedIn, Instagram, and Twitter) were utilized to generate interest and recruit applicants.

The HRD also utilized virtual technologies to adapt to social distancing restrictions. Video conferencing applications (such as Cisco's WebEx and Zoom) allowed recruits and background investigators to communicate without risking possible viral exposure. The Recruit and Exams Unit also utilized Freshchat, an online customer service platform that helped to provide interested applicants real time information about the department's application and selection process, servicing over 10,000 queries during the year 2020.

The HRD also successfully took over the MPR examination process from the Department of Human Resources (DHR), replacing the outdated civil service exam with a new police officer entry exam. As a result, the hiring process is now continuous throughout the year, whereas in the past it was only open twice a year. This continuous hiring should reduce the hiring/background investigative process to six months. Furthermore, to more efficiently address the

civilian vacancies, the HRD is currently in the process of purchasing a NeoGov software system that will give the department, rather than the DHR, the capability to conduct recruitment of civilian positions.

The division also began utilizing the Peace Officer Background Investigative Tracking System (POBITS) to track applicants. This program enabled recruitment staff to email applicants en masse, send and track the online personal history statement and questionnaire, and communicate more efficiently overall with applicants. In addition to helping maintain social distancing safety protocols by reducing the need for in-person visits, this system also reduced paper consumption and the need for storage of such paper documents, as well as expedited the entire application process.

In 2020, approximately 4,383 persons applied online to register for the MPR entrance exam. Fifty-three tests were held throughout the year. Approximately 1,386 applicants passed the MPR exam and were invited to undergo the selection process. A total of 190 applicants were selected for four recruit classes (195th, 196th, 197th, and 198th), which started in January, April, July, and October, respectively.

Additionally, 863 civilian applicants were processed, which eventually filled 145 positions, to include 34 permanent positions and 10 positions by promotion.

Computer Aided Dispatch System (CADS) and Records Management System (RMS) Upgrades

In late 2017, the HPD began the process of replacing the department's separate CADS and RMS with a new integrated system. The department contracted Tri-Tech/Central Square to develop the hardware, software, and infrastructure. While the CADS component of the project went live in August of 2020, work is currently being done to develop the RMS. The total project is expected to be completed at the end of 2021.

The goal of the project is to modernize the CADS and RMS to create a system that provides long-term efficiency and reliability. Once completed, the new CADS and RMS will offer the HPD the following benefits:

- The ability to access CADS or RMS data through a single interface; previous systems required multiple methods to obtain connected information. This will expedite the process of getting information to those who need it in the interest of serving the public;
- Real-time awareness of the location of different resources that will allow the CADS to dispatch the closest officer to any given location, resulting in improved response times;
- A new interface that makes CADS information available to field officers through their mobile data computers (MDCs). This newly available wealth of data can be used by officers to see the history of calls involving any given location, address, vehicle, or individual thus giving them more information on which to base decisions at crime scenes; and
- A more secure network and software environment. With regular maintenance conducted by a trusted vendor, the software can be patched automatically to help secure the extremely sensitive data for which the HPD is responsible.

This new, integrated system is designed to be the long-term solution to the HPD's responsibility to collect, store, access, and secure the CADS and RMS.

Domestic Violence Detail: Improving Victim and Witness Support

The Criminal Investigation Division took steps to improve relationships with domestic violence service providers by hiring two victim/witness counselors in 2020. Ms. Allyson Affonso was hired in May and works with the Sex Crimes Detail. In October, Ms. Maxine Smith-Sullivan became a part of the Domestic Violence Detail.

With extensive counselling background and experience with service providers, both new counselors will further the department's efforts to help victims of sexual and domestic violence crimes. Toward this end, their many responsibilities include helping to contact victims and witnesses for interviews with detectives, connecting victims to service providers, and personally counselling victims.

COVID-19 Safety for Arrestees

Court proceedings at the Central Receiving Division (CRD) underwent major adjustments to continue the efficient processing of arrestees while ensuring everyone's safety amidst the COVID-19 pandemic. With the closure of the State Judiciary in March 2020, the CRD made arrangements to hold court hearings at the Alapai headquarters. Teleconferencing hearings were held each day at the station in lieu of transporting arrestees en masse and risking viral transmission.

From the onset of the pandemic, the CRD also modified its standard procedure of booking arrestees within the cell block facility. All arrestees were screened with a questionnaire and those whose response indicated a health risk (e.g., having tested positive for COVID-19 or awaiting pending test results) were sent to a health facility or accommodated appropriately. The booking of such arrestees was performed outside the building. The division also made physical changes to its holding area so that arrestees could be detained in a manner that complied with COVID-19 social distancing guidelines.

COVID-19 Surge Testing

In August and September of 2020, the City and County of Honolulu activated its Incident Management Team (IMT) for the COVID-19 Surge Testing 1.0 operation. The Major Events Division (MED) assisted in the facilitation, coordination, and logistical support of the operation that was able to test approximately 61,000 citizens throughout the island for the virus.

In October and November of 2020, the IMT activated the Surge Testing 2.0 operation. The newly established COVID-19 Command Center on the third floor of the Alapai headquarters was used as the command post for this operation. The MED was integrated into the IMT, filling IMT command and general staff positions for this second operation, which provided virus tests for another 24,892 citizens.

COVID-19 Economic Impact Food Distribution

In May and June of 2020, the Major Events Division (MED) worked with the Department of Emergency Management (DEM) to plan and coordinate the City and County of Honolulu's "Rise Resiliently Oahu" project. With the assistance of the Hawaii Food Bank, other organizations, and numerous volunteers, the project addressed secondary impacts of the COVID-19 pandemic.

Law enforcement support was provided for the project's effort to distribute 50-pound parcels of food to 4,000 households. MED officers were deployed to support the city's Emergency Operations Center as the division utilized the Incident Command System to plan, coordinate, and facilitate the food distribution operation.

Anticipating the volume of traffic that would be generated by such massive food drives and the potential impact throughout adjoining neighborhoods, the MED reached out to the Aloha Stadium and Leeward Community College staff to utilize those facilities to host the distribution events.

During the operations, the HPD was tasked with ensuring public safety as well as traffic management. Therefore, in addition to implementing traffic control measures inside and outside of the venues, officers monitored and enforced city COVID-19 safety mandates.

Use of Technology: New Use of Force Simulators

After a long and involved process, the first of three use of force simulators arrived and was assembled in the Training Division's gymnasium in mid-December of 2020. Each simulator features approximately 800 different scenarios with up to 3,000 different outcomes. The scenarios engage officers in a range of situations such as split-second life or death decisions, use of less-lethal options, and application of de-escalation techniques. Other features that enhance training efficiency are the recording of officers' reaction times, providing immediate performance feedback, and tracking performances over time. Fourteen Training Division staff were trained and certified to operate the simulators and will also be certified as train-the-trainer instructors.

Recruit Class Social Distancing

Though the COVID-19 pandemic imposed various adjustments for the HPD, the department's training academy was able to operate smoothly throughout 2020 due to the continued mitigation planning and efforts by the entire staff. One of the steps taken was placing Annual Recall Training (ART) online in order to utilize the largest classroom on campus to house a large recruit class as well as keep officers in ART socially distant. This change was made to fall in line with COVID-19 social distancing guidelines of placing recruits at least six feet apart while in the classroom. The recruits and instructors are also required to wear masks at all times while indoors and around the academy.

Temperature Check Station

Practices initiated by the Training Division to minimize the spread of COVID-19 addressed more than classroom situations. From the early days of the virus, the division set up a tent at the entrance of the academy to perform temperature checks on all visitors.

Leica RT360 and Small Unmanned Aircraft System (sUAS)

Officers who investigate motor vehicle collisions (MVCs) have to be thorough and they have the compulsion at a scene to minimize traffic hazards and inconveniences for the public. In 2020, the Traffic Division's Vehicular Homicide Section (VHS) initiated an update of its crime scene mapping tools and adoption of new technology to help reduce road closure times during MVC investigations.

Environmental laser scanners are a valuable law enforcement tool with the capability of capturing accurate and three-dimensional digital images of an area. Investigators can then manipulate the captured image for different perspectives and have the software perform the necessary calculations. This replaces time consuming scene diagramming and applying of formulas. The VHS worked throughout 2020 to acquire the newest, advanced (i.e., faster and more accurate) Leica RTC360 laser scanner which can dramatically reduce the duration of road closures at MVC scenes. Compared to the older scanner, the Leica RTC360 will reduce the scan time from approximately 15 minutes per scan to less than 5 minutes; overall scan time at a scene will take less than 30 minutes, not 75 minutes.

The section also completed the groundwork to acquire an sUAS, commonly referred to as a drone, to assist with mapping crime scenes. The broad, topical view of a scene obtained with an sUAS can be viewed live as well as recorded. With its mobility, the unit can relay consequential situations (e.g., hazardous traffic situation) unobservable by officers investigating an MVC.

Waikiki Camera Project

The Waikiki Camera Project was completed in 2020 after facing unforeseen delays brought on by the COVID-19 pandemic. The credit for completion was mainly due to a collaborative effort, as District 6 worked in partnership with the City and County of Honolulu's Department of Information Technology and Department of Transportation Services to overcome the challenges and complete the project by the end of the year.

Waikiki now has 49 security cameras that rotate 360-degrees. By replacing cameras with only pan, tilt, and zoom capabilities, the new units' more comprehensive viewing enhances the ability to monitor traffic and other street activities. The technology/equipment upgrade owes much to the Waikiki Business Improvement District Association and Hawaii Tourism Authority for their generous financial support toward installing the security cameras throughout Waikiki.

In addition to improving overall visual coverage of Waikiki on a daily basis, the new cameras proved particularly advantageous monitoring major events such as protest gatherings, Halloween night crowds, New Year's Eve celebrations, parades, and other events.

Gas Chromatograph for Methamphetamine Purity Testing

A gas chromatograph for methamphetamine purity testing was finally delivered to the Scientific Investigation Section (SIS) in November of 2020, after the section worked nearly the entire year through fiscal and logistical challenges. To prepare for and minimize delays in employing the unit, two laboratory analysts received training in February 2020 at the Southwest Drug Enforcement Administration (DEA) Laboratory.

While the emergence of gas chromatography technology dates back to the early 1900s, it has now become globally accepted as the gold standard for drug analysis. Using state-of-the-art gas chromatographic instrumentation, the SIS has the ability to identify controlled substances and soon determine the purity of methamphetamine. This expanded capability will potentially aid our state and federal partners in the prosecution of drug traffickers. Chromatographic methodology is, in fact, one profiling approach being explored in the field of pharmaceutical analysis to map the worldwide movement of illicit drugs. Advancements in this field show promise in identifying and profiling drug impurities that could be used to establish drug trafficking patterns and distribution networks of different countries.

Handheld Drug Analyzer

The laboratory acquired a handheld Raman Spectroscopy analyzer that is capable of screening for drugs through various containers. While testing with this equipment is presumptive, it can be used as a preliminary screener for fentanyl. If the possible presence of fentanyl is indicated, an analyst can take additional safety precautions when performing confirmation testing. The laboratory is continuing to perform studies on the analyzer's capability prior to implementation on casework.

Property Crime Deoxyribonucleic Acid (DNA) Processing

Expediting the forensic processing of property crimes has been a continuous effort by the SIS as such cases have the highest success rate for obtaining a Deoxyribonucleic acid (DNA) profile for the purpose of identifying individuals and contributing to the national Combined DNA Index System (CODIS). Toward this end, the section took several measures in 2020 to enhance the forensic aspect of property crime investigations.

An in-house evidence processing workflow was developed as a time- and cost-saving measure. Beginning in January 2020, a "batch-testing" workflow was beta tested and formally implemented in April 2020 with current laboratory personnel. Measures of success with the new process were a 70 percent decrease in the number of backlogged requests and a reduction of analysis time from 90 days to a targeted 60 days.

STATISTICS 2020

Violent and property crimes are categorized into seven serious offenses called index crimes, which are used to define trends over time and make comparisons across the nation. The statistics for index crimes are prepared and submitted to the Federal Bureau of Investigation's Uniform Crime Reporting Program on a regular basis. Index crimes consist of four types of violent crimes (murder, forcible rape, robbery, and aggravated assault) and three types of property crimes (burglary, larceny-theft, and motor vehicle theft). Definitions for the crimes are on page 25.

**TABLE 1
CRIME INDEX**

OFFENSES	2020	2019	2018	2017	2016
Murder	19	24	24	32	16
Forcible Rape	328	342	333	285	382
Robbery	739	955	803	908	836
Aggravated Assault	1,300	1,324	1,280	1,214	1,164
VIOLENT CRIME	2,386	2,645	2,440	2,439	2,398
Burglary	3,291	3,869	3,544	3,331	3,758
Larceny-Theft	17,843	21,578	20,945	20,540	22,488
Motor Vehicle Theft	3,947	3,842	4,162	3,606	4,346
PROPERTY CRIME	25,081	29,289	28,651	27,477	30,592
TOTAL	27,467	31,934	31,091	29,916	32,990

*SOURCE: Federal Bureau of Investigation Uniform Crime Reports

In 2020, the Honolulu Police Department's Case Report System was used to prepare the following 2020 tabular count data:

- * All index and non-index crime data except Murder;
- * Weapon type used in Robbery and Aggravated Assault;
- * Adult and Juvenile Arrests; and
- * District and Beat Offenses.

Murder and murder-related counts in Tables 1, 2, and 5 were obtained from the Honolulu Police Department's Homicide Detail, Criminal Investigation Division. Traffic fatality numbers were provided by the Traffic Division.

All count data, except for Curfew and Runaway in Table 4, were obtained from our department's Case Report System and converted from the National Incident-Based Report System to the Summary Reporting System.

TABLE 2. WEAPONS USED

FIREARMS USED	2020	2019
Murder	8	10
Robbery	129	152

**TABLE 5
BREAKDOWN OF
INDEX CRIMES**

INDEX CRIME DEFINITIONS

Index crime definitions from the Federal Bureau of Investigation's Uniform Crime Reporting Program, Summary Reporting System Manual 1.0, are listed below:

INDEX	CRIME
MURDER	The willful (non-negligent) killing of one human being by another.
FORCIBLE RAPE	Penetration, no matter how slight, of the vagina or anus with any body part or object, or oral penetration by a sex organ of another person, without the consent of the victim.
ROBBERY	The taking or attempted taking of anything of value from the care, custody, or control of a person or persons by force or threat of force or violence and/or by putting the victim in fear.
AGGRAVATED ASSAULT	An unlawful attack by one person upon another for the purpose of inflicting severe or aggravated bodily injury. This type of assault usually is accompanied by the use of a weapon or by means likely to produce death or great bodily harm.
BURGLARY	The unlawful entry of a structure to commit a felony or a theft.
LARCENY-THEFT	The unlawful taking, carrying, leading, or riding away of property from the possession or constructive possession of another.
MOTOR VEHICLE THEFT	The theft or attempted theft of a motor vehicle.
