Written Testimony

I strongly oppose Resolution 21-194 and I am surprised the City Council of Honolulu would consider such a resolution that will help crumble our economy. It is to force, yes FORCE, people to take the Covid 19 vaccine in order to reach a 95% and higher vaccination rate in order to reach "herd immunity" but more so it is to protect the visitor industry and use emergency funds. The Hawaiian people are not being considered. Local people born and raised here. The health pass is a very broad and negative stroke that will cause a 2-tier society...counter to our culture. It does not consider people with strong religious beliefs, drug allergies, medical conditions, pregnant women and young people that have their lives ahead of them and should not be subjected to an experimental drug. Why is our State and City so opposed to exploring treatments vs. vaccination?

I STRONGLY OPPOSE this bill as it does not support the people of Hawaii and is NOT pono. This bill will only hurt local businesses and create even more division and drive more hate towards each other. The mayor and governor are not taking into consideration all the science and research that is being presented about vaccines and there is NO PROOF that the use of vaccine passports prevents any spread of the virus. This mandate is totalitarian and not in the true interests or health and safety of the people.

This is medical discrimination, against Nuremburg code; No informed consent, still experimental. Creating a two tiered society is wholly detrimental to the social fabric of our communities. You are sworn an oath to the constitution of the state of Hawaii and the US and our laws. This is in utter disregard of our rights. You have not done your job in protecting our rights. These actions are also based on a chosen narrative that disregards censored professionals who in ever greater numbers across the world have spoken out against these vaccines and the related policies.

I personally oppose vaccine passport. There are people who are unable to take the vaccine for health and immune-compromised reasons who would suffer and be seriously marginalized by society, if this were to pass. I am seriously opposed to it. There are saner ways to get the same result, and council should encourage a public dialogue regarding vaccine alternatives.
Thank you, Louise DiGrazia

Aloha,
Please submit into testimony my strong opposition to creating a two-tier society in Hawai'i based on medical status. No free citizen of our great state should ever have to provide "papers" or documentation to enter public or private establishments or be discriminated against based on his or her medical status. It is a deeply private matter, protected by numerous laws already, and should so remain. Discriminating against individuals, even and especially if they are a minority goes against everything we stand for Hawai'i. It goes against Aloha itself.

Auwe and shame on us for ever considering such separation and alienation of people. Maybe ship all the unvaccinated to Kalaupapa? This seems to be what you are suggesting. Never again!

With Aloha,
Keren Stonebraker, Waimanalo

I oppose this agenda and any mandates that is not clearly scientific disgusted and proven. The scientific community is divided on all of SARS-CoV2 topics. One side says only the vaccine is the solution while the other side presents hundreds of research paper studies and even a meta analysis of proven effective treatment for SARS-CoV2. While Fauci has personal financial gains with vaccine distribution is really disturbing to know that he is completely ignoring scientific data showing effectiveness of prophylactic and pos infection treatment. At least intriguing that Merck has received billions of dollars from federal government to develop a new drug to treat COVID-19, while Ivermectin for example has shown to be a safe and effective treatment for COVID-19 also listed on WHO list of essential drugs. This vaccines inserts are left "intentionally blank" there's no liability for none of the laboratories producing those vaccines.

It's clear nobody can question this unprecedented unproven measures forced on all of us. Government is breaking constitutional laws and the Nuremberg Code. These vaccines are clearly not safe nor effective as they do not protect individuals from getting infected nor from spreading. Masks are clearly not effective on stopping the spread of the virus nor stopping infections.

Anthony Fauci has clearly failed to put an end to this pandemic, lockdowns didn't work, masks doesn't work and these vaccines are not working.

Please investigate all sorts of data, justice cannot be looking for evidence from only one side of the disputed subject. Israel is prove that vaccine is not effective, VAERS shows that this vaccine has killed and hurt more people than all vaccines combined together from the last 70 years.

I'm not asking to people not to vaccinate, I'm asking for freedom of choice when there is scientific data backing up this choice.

Besides the fact that this virus hasn't been isolated, confirmed by a Canadian Court case.

I strongly oppose Resolution 21-194. It is a gross violation of our Constitutional Rights to mandate a digital vaccine passport program. It's invasive to ask patrons to show their health status of any kind. It's discrimination and segregation! I, and many others, will NOT patronize these small businesses and our local economy will hurt even more. PROTECT business and jobs.

Written Testimony

Furthermore, there are significant risks with the vaccine. According to the VAERS (Vaccine Adverse Event Reporting System), there were 2,122 cases of myocarditis/pericarditis associated with vaccination in the period Dec. 4, 2020. On the package insert it warns: "Postmarketing data demonstrate increased risks of myocarditis and pericarditis, particularly within 7 days following the second dose. Recovery from COVID and antibodies." It is irresponsible to coerce the public into taking a vaccine that carries serious health risks.

You don't have evidence that this vaccine passport program will significantly improve public health. Israel was the first to vaccinate the majority of their population, 80% of the adults. However, Israel now reports its largest number of new COVID-19 infections since the start of the pandemic. (Source: Reuters COVID-19 tracker).

Government's duty is to defend our Constitutional rights not to take away rights when you deem necessary. You took an oath to do so.

Instead of draconian unlawful mandates, start with making effective early treatment available to keep sick people out of the hospitals. I attached a short document about Ivermectin.

Imposing any type of restrictions on those who refuse a medical procedure is unconstitutional. To see any such idea being suggested points to an agenda to benefit your lobbyists. Yes, Covid is real, but most survive without needing hospital care. Myself and my family are among those who have natural antibodies from our natural infection and recovery from Covid19. Several studies have shown that natural immunity is stronger than immunity from the covid vaccines and that those who have recovered from covid receive no extra benefit from the vaccine. So, for me and my family, taking the vaccine would be all risk no reward. Every legislation being presented thus far fails to acknowledge natural immunity. This push to vaccinate everyone is nauseating...especially when we all see it failing to prevent the spread of the virus. Stand up to your lobbyists and Stand up for what is right. Stand up for the people. Stand up for the constitution! I have lived in Hawaii all of my life and it breaks my heart to see us following the same path of Nazi Germany. Please do not repeat those heinous crimes against humanity.

I strongly oppose a vaccine passport program of any type. It's unconstitutional and immoral. And in addition, the vaccines for Covid are still in trials therefore literally experimental. Thus a vaccine passport also would violate international law and the Nuremberg code which states in article 1:

Written
Testimony

"The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment."

https://media.tghn.org/medialibrary/2011/04/BMJ_No_7070_Volume_313_The_Nuremberg_Code.pdf

If you vote for and contribute your support for a vaccine passport, you are committing a 'crime against humanity'.

I strongly oppose any efforts to implement a Covid-19 passport for Maui.

This would infringe on the rights, responsibilities and liberties of a free and independent people and society. This would mean local government overreaching to enforce on its' citizens and businesses strict policies/orders which disrespect and disregard the sovereignty of our individual freedoms. plus cause unnecessary further harm to our economy.

Vaccine passports are not necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities. Individuals must retain their right to vote and to participate with their dollars to support businesses which promote values and practices similar to their own.

Written
Testimony

The vaccines are widely available and those who want to receive it have already done so. The injections have not not been proven to stop the contraction or transmission of the virus. In fact they have been shown to have very little effect as the variants are changing. Now people need a third shot, so will those people be prohibited from participating in society until they get the third shot. Absurd!

I can list 100s including personal friends, celebrities, politicians, movie stars, sports figures and sports teams who have contracted covid and been very ill. They are also transmitting when they are sick. By allowing vaccinated people only into places, you are creating a false sense of security and potentially creating super spreading events. The unvaccinated are not the reason this virus is spreading. absolutely not. No matter how much you blame this small percentage of people. You are punishing them for not being in lockstep with what you say.

Many people already have immunity. In fact, Josh Green said all the 100s of thousands of cases who caught covid have immunity. They should be allowed in everywhere. These are the

people who supported restaurants and small businesses. Why discriminate against people who obviously have stayed healthy, washed their hands and followed protocol? Covid can be killed with hot water and soap but I've noticed most public places don't even have hot water. The main thing is washing your hands. No need to go to such a strict vaccine passport.

There is only 16 percent of population Unvaccinated in Hawaii. Governor Ige said when we reached 70 percent the state would open completely with zero restrictions. We are there now! How can you completely deviate from promises made. and deceive your constituents like that?

We are not Idiots and we know how to protect ourselves. Maui has had one of the most vaccinated populations and strictest rules in the nation. And yet the rest of the United States is wide open, Huge concerts of 100,000. Sporting events. Life goes on. We can't live in a bubble. Many people are unable to get vaccinated because of pre-existing health issues. It's discriminatory and segregationist. And now we are learning the vaccine can cause adverse effects, extreme heart issues and even death. More and more countries are outlawing vaccines every day. Why do you continue to coerce and basically force people who want to live a normal life.

Plus there are therapeutics being use world wide like monoclonal antibodies and other medicines. Most people recover from catching Covid. Most with mild symptoms. It is time to move on. We've had 18 months and Maui needs to open up completely. We can protect the vulnerable but the rest of us cannot live under tyranny and unlimited emergency powers. Plus in other countries, the cases go down just as quickly as they rose. In fact, I can see the downward trend already. And these positive cases include a lot of false positives. How many positives do you encounter at a Kahulu Airport on secondary testing? Such a waste of time and money.

Please DO NOT INSTITUTE a vaccine passport. It's communism in disguise. Is that what you support?

Sincerely,

Martin Wyand

Dear Council,

I strongly oppose a digital pass. This pass is the sure route to digital aggregate of every single persons personal data. Eventually this pass could easily include all medical and financial information. This pass would track every single place a person enters, which is essentially a way of tracking an knowing where are person is at all times. This information will be abused. Who has access to this information? Who is storing this information? How is it guaranteed this information will not be breached or used inappropriately? The back end of this Covid pass software can easily be connected to everything that makes us individual and Governments (not just US) could easily make this a social pass not just in our state, country, but in the world. We will no longer be able to move freely unless we are “good little citizens” and we meet the criteria of what every the will of government is. This software is the end of democracy and individual liberty. This is an invasion of privacy and individual liberty. This is a dangerous slide towards totalitarianism and it is not the product of liberty and justice for all. This is medical tyranny and coercion. The vaccinated can catch and spread Covid as easily as the unvaccinated. Data out of Israel is a crystal ball into Hawaii’s future and it is showing that vaccinated will be hospitalized at the same rate as the unvaccinated. New variants are emerging and have been evaluated that they are circumventing current vaccine and any of their protective properties. While, at this day in time, the hospitals are full, this too will pass and we will reach heard immunity through both vaccination and infection. A new study reported in Scientific American, “The natural immune protection that develops after a SARS-CoV-2 infection offers considerably more of a shield against the Delta variant than two doses of the Pfizer-BioNTech vaccine. Previous infection have robust immune protection from Covid. Natural infection plays an important role in reaching herd immunity. This pass is discriminates, causes fear and discrimination. This is segregation. So dangerous. Medical coercion is against the principles of medicine. Informed Consent is the the foundation of medicine. If one is forced to get vaccinated or they can’t participate in society then it is not consent it is coercion. This violates individual bodily autonomy. Without that

we have no freedom. There is no evidence that only allowing vaccinated to go into facilities, will stop the spread of Covid. This excuse well then the unvaccinated can test is BS. If unvaccinated have to test then the vaccinated need to as well because they can and are spreading Covid. I personally know 9 people that are vaccinated and got Covid. It is spreading among the vaccinated and unvaccinated and it seems it is spreading just as equally, if not more in the vaccinated because they don't know they are really sick. We must not give up freedom for the guise of safety. This disease is not going away. The vaccine is already failing, as admitted by the CDC and the Hawaii Department of Health on public television. We cannot vaccinate our way out of the problem. Countries with the highest vaccination rates, are also seeing a surge in cases and deaths of the vaccinated. A Covid pass is not the way out of this. It is a death sentence to democracy. Please consider the long term consequences of implementing a digital passport. It is dangerous on a massive level and we should never take that risk to destroy what the United States was founded on, especially for policy that is not a proven method to reduce the spread of Covid. Our founding fathers are rolling in their graves.

Written
Testimony Im writing to oppose resolution 21-194 because as a free citizen of the United States, it should not be required that I inject my body with a foreign substance just so I can enter a private business in order to purchase food for my family.
Perfectly healthy people and businesses should not be punished and restricted to live their lives and make decisions based on their own concerns. Let people live their lives and stop controlling everything.

Please do not do something you won't be able to walk back. Once you cross this line of mandating for folks to live their everyday lives, you can't walk this back. There will be no going back to normal even if the numbers go down. Government will never lessen its grip on the citizens if this passes.

Written
Testimony

Hawaii will ultimately destroy their economy by doing this. If people think the HART is a money pit, wait till people stop eating at restaurants and shopping due to mandatory digital passes. We know a lot of people that have lived here their entire lives and are contemplating moving to the Mainland because of your actions.

I know this small paragraph will make no difference in your decision today and your minds are already made up going into this hearing. I write this while on my iPhone watching my children do something they love in a gymnasium, something I won't be able to do anymore once you pass this mandate.

Give people the choice.

MANDATING VACCINATION IS NOT THE WAY TO GO! We all have the choice an freedom to choose what we into our children and our own bodies! ALL COVID VACCINE ARE IN TRIALS AND WE ARE NOT Guinea pigs to the government agenda with mandatory vaccination especially over 98% survival rate. 2020 mask and social distancing low numbers of covid.
2021 over 60 %of people on Oahu are Vaccinated with covid shots now we have a so called medical crisis. How is this possible, ONE REASON . VACCINATED ARE SPREADING IT!!
STOP WITH THIS RIDICULOUS MANDATES AND POSSIBLE UNNECESSARY SHUT DOWNS!! STOP MESSING WITH PEOPLE'S LIVELIHOOD OVER A VIRUS!!

Written Testimony

I realize that we are in a very challenging time. However, I do not believe that implementing a COVID 19 health card for any establishment is the proper thing to do. The protocols in place have shown to be effective in the battle against this virus. Masks, social distancing, staying home when you are feeling ill, etc. Otherwise, why continue to have them? Also, it is a proven fact that whether you are vaccinated or not, you can transmit the virus to others. There are many studies from around the world, such as Israel that raises enough concern about the vaccine and its effectiveness to halt any attempt to mandate vaccinations. But at the end of the day, I oppose this on the basis of personal choice and freedom. Taking a vaccine should be a personal choice and not a mandate, especially when it affects a person's ability to earn an honest living. Losing the freedom of personal choice in matters like this is losing a part of what makes this nation great and special. Let's be governed by the values and principles that made this country great and not be governed by fear. As Edmund Burke said, "No power so effectually robs the mind of all its powers of acting and reasoning as fear." Let's trust the protocols in place, provide early treatment, be smart, be respectful of others, care for each and not allow fear to rule us by implementing anything that robs us of the freedom of personal choice, and becomes something that divides us, not bringing us together. I humbly and respectfully oppose RES21-194.

Aloha,

My name is Jonathan Apao. I am submitting this written testimony in opposition for the purposed vaccine passport set to take place on September 13th 2021 by Mayor Blangiardi. Approving this mandate is disturbing to say the least. That the government which is "For the people, by the people" would segregate medically into two classes of citizens, vaccinated and unvaccinated, this seems like a step back to the 1950s and 1960s with racial segregation.

Written
Testimony

Limiting access to such things as sit down dining, arcades, gyms and others listed in the mandate seems extremely prejudicial to those unvaccinated because the science proves that not only can those who are vaccinated can still catch (breakthrough cases) and transmit covid. Not only does it discriminate against the individual, but the business as well. Saying punishment up to shutting down a business for allowing everyone into the establishment is wrong. For months we were told to visit struggling places to "support local" now you want to punish those who want to visit and support local?

In closing, in the strongest wording possible. I oppose this mandate, and I urge others to do the same.

Written Testimony I oppose the Vaccine passport. It is illegal the way this vaccine/passport is being implemented; it's against our constitutional rights as Americans.
This isn't a person to person choice. It has become dictatorship; here are you choices A or B whether you believe in it or not.
One size does not fit all. To force a vaccine upon Americans is not only wrong it's against everything we as Americans stand for !

Written
Testimony

I strongly oppose this vaccine passport, it helps no one, all it will do is cause more division amongst the local people of Hawaii. The damage will be more than this state will be able to handle and the so called leaders of the state and county have been spreading unfounded numbers they believe in their minds are correct, this has never been about health and welfare of the people of Hawaii, it always and always will be about the money. Do your research, look into these numbers and statistics they are putting out, do they logically make any sense whatsoever? When we were first locked down, numbers were low, manageable, yet they kept us locked down. Vaccines come, open the state to tourism, numbers all of the sudden get out of control. Do you see where the the problem is? Thousands of vaccinated tourist pouring into the state, Hawaii close to 70% vaccinated, no social distancing, no mask in Waikiki, yet it's the locals fault that the so called numbers are spiking out of control? Over whelming our short staffed hospitals because the Governor and mayor want their tyrannical ways to be known and flex on the ones who worked through the whole plandemic, the first responders, the ones who had to go into the homes of possible covid sick citizens. As much as we all wanted to be home taking care of our families, we had to be out there taking card of yours, because that's the oath we all took when we signed up for this job. Now you want to pretty much segregate people by vax and non vax, taking away people's right to choose, it's been proven and said by Libby Char and also the CDC whom you all like to get all your Information from, have said that fully vaccinated can still and are getting infected with covid, these are facts you all can't deny. I personally know individuals who have gotten covid and are in fact fully vaccinated. You all want to see a spike in crime, keep going down this road with trying to control where people can come and go from, trying to control goods and services, people will get desperate. Stop following what the big cities like New York and California are doing, we are a small island with many different cultures, make decisions for yourselves and not that of other states. You work for the people, and not the other way around, you are ruining people's lives and livelihood with this proposed passport. This

resolution needs to go, it's not good for Hawai'i, that is why I strongly oppose this vaccine passport.

Written Testimony

As an African American veteran of the United States Army I'm discouraged by the heavy handedness and recklessness of our elected officials. My ancestors suffered, bled, marched, and fought too hard for you to remove my ability to choose freely, what I can do with my body. The African men subjected to the Tuskegee Experiments were treated as animals for the future financial gain of the same men in suits holding public offices whom you'd like me to blindly trust now. Its a shame that we've come from being 3/5 of a person to a whole human being and you still wont honor my God given right. I practice the same spiritual beliefs and cultural practices that began with my ancestors 100, 000 years ago. Natural immunity, healthy living, traditional medicine and remedies. 100,000 years of proof that our way of life works, because genetically you wouldn't be here if it didnt. So not today, or any other will I exchange a beautiful way of life for fear, segregation, and oppression.

Mahalo and equality for all

Written Testimony As a healthcare worker for 30 years, I understand the importance of personal health. I also understand the importance of personal research on medications that I put in my body. I do trust the science and research shows that it is a process which takes time and effort to determine if a therapeutic is safe and if it works. Then a third question that should be asked, "Do we need it?". I also believe that it is every person's right to determine what is right for them or in other words, a freedom to choose. We live in a country that is founded on this freedom. By implementing this resolution, you are taking the people's freedom away. I beseech you to reconsider. Respectfully, Lorna Wong

Written Testimony I oppose Resolution 21-194 because vaccinated people can contract the virus and they can spread the virus. Why should they be allowed in a restaurant if they can spread the disease? I have attained natural immunity. I am EQUAL or safer to be around than a vaccinated person. Why should I be treated any different than a vaccinated person. To be treated differently (UNEQUAL) would be discrimination in violation of my civil rights protected by the 14th Amendment of the US Constitution.

I oppose resolution 21-194. A digital vaccine passport will discriminate just as people discriminate against race, handicapped, age, equal employment, disabilities. If you/we will not tolerate those kinds of discrimination, we should not tolerate a vaccine passport as well.

Written
Testimony

DO NOT VIOLATE YOUR OWN NON-DISCRIMINATION STATEMENT:

Diversity and Non-Discrimination Statement

Among the greatest assets of the City and County of Honolulu is the ethnic, cultural, and social diversity of its population. The City and County of Honolulu takes great pride in this diversity, and values and respects its residents and welcomes its visitors. It is the policy of the City and County of Honolulu to provide services, programs and activities to the public without regard to race, color, age, sex, religion, national origin, ancestry, gender identity, gender expression, sexual orientation, disability, or any other classification protected by state or federal law.

Written Testimony

A vaccine passport will cause segregation and hate crimes. Per the CDC and our Department of Health Director, vaccinated individuals are just as contagious as unvaccinated individuals. Business establishments should have the CHOICE to determine their own policy of who they welcome into their business. They are owners of their OWN business and the government should not have power to control how they run their business! This is WORSE then a SHUTDOWN! Controlling what and where we go!!!! This is tyranny to its fullest! With all the VALID research coming back that anyone can get covid, whether you are vaccinated or not, is enough to stop anyone from continuing to push towards vaccine passports and mandates.

I oppose to have the governor or mayor control our freedom of choice. My vaccination status should not be held against me where ever I decide to go!

The vaccine does NOT stop transmission which is the problem! So a vaccine passport will not help stop the transmission of covid, the cases will remain high until this variant runs through the people of Hawai'i.

Research how viruses work and how to accept that covid will never go away! Figure out ways to live with what is happening plus fix our very broken healthcare system that is improperly treating covid!

Aloha, I hope that the committee will take into consideration that implementing a plan like this creates discrimination, and I personally cannot agree with that. I believe that this is choice and punishment to those who choose not to, thus creating discrimination against those. I personally am vaccinated and that was my choice. I feel confident in that my choice will protect myself and those around me, and I do not blame or fear those who are unvaccinated. The virus is not to blame with the unvaccinated, as we know that the vaccinated can still be infected and transmit the virus. This is just nature running it's course and nothing we can control. I'm asking to be mindful to those that will be discriminated against by enacting such a thing as vaccine passports. In ways it suggests that those who are unvaccinated are second class people to blame, which is morally incorrect. Thank you for letting us provide our thoughts on this matter.

I do not support this bill. This bill is taking away the freedoms of American citizens by punishing anyone who does not choose to become vaccinated. The last time I checked, America is still a free country where a citizen can choose what establishments to frequent, and what happens to their own body. This bill sounds a lot like when the Nazi's passed laws and decrees that segregated the Jews(ie vaccinated v. un-vaccinated) and prohibited them from entering establishments such as theaters and sport facilities (ie. bars, gyms). The Jews were also required to carry identification passports marked with the letter "J" just to get from point "A" to point "B" in daily life. This all preceded the the horrors to follow , the concentration camps. I urge everyone to take a step back and take a look at our history. This bill in my opinion is history repeating itself and nothing good can come from it.

Aloha!
I am in opposition for vaccine passports to be implemented here in the "ALOHA" state. Vaccine passports is the modern form of segregation and it will cause a division amongst all residents in the state that we all love so much. Hawaii is known for its melting pot of people that has come together to live in harmony. I want to ensure that Hawaii's people continue to show LOKAHI to each and every person. In order to do that, we must stay in opposition of this dangerous bill to be passed.
Very Respectfully,
Debbie Duldulao

Germ theory which this entire fraud of a “pandemic” is based on has been disproven. The scientists and virologists who can prove this are being censored because no one can rebut their claim, they can only try to hide and censor the truth. Many of us know exactly what’s going on which is a global communist takeover by the powers that should not be who are psychopathic pedophiles.

Hi! I am opposing the proposed vaccine passport order. I love my state, community, and people that live within my geographic areas. Please let me continue to be a participant in various community activities and still maintain my decision to not get a vaccine. I'm simply not ready to put the vaccine in my body. I don't have faith in what is being said. Be patient with me and my brothers and sisters who have similar convictions. Perhaps in the future I'd choose the vaccine. Perhaps I will continue to decline getting the vaccine. As I enjoy life and love those around me, please don't cut me off. Let me love on those around me, encourage others, and make memories that maybe will positively influence a generation. Please don't isolate me.

with joy and kindness,
Kelli Mukawa

Written Testimony This resolution is discriminatory. All of the recent studies demonstrate that vaccinated people contract and spread COVID as well as create variants. The CDC and Dr. Fauci have both made statements that the vaccinated actually carry higher viral loads than the unvaccinated. I strongly oppose this resolution.

Written Testimony

I oppose Resolution 21-194. This is an egregious idea that would bring back segregation and divide our island community further. Like many of the Covid policies this will do nothing other than hurt businesses and push people into a more dangerous and desperate position. It's obvious that the people who don't want to take this product are not going to fold because of these draconian measures. They are only going to gain momentum and have such an enormous amount of resentment toward you policy makers. I urge you to think very carefully about the position you are putting yourselves in. We all want to move forward safely and with our livelihood's in tact, but this is not the way. This is a time for you to build trust with you constituents not alienate them. And don't think for a second that just because someone was coerced to take this vaccine that they are on your side. Please do the right thing. Thank you.

I strongly OPPOSE this resolution. This is a horrible resolution. It is a vast infringement on the rights enshrined in the US Constitution and is against basic human decency. You have no authority to create a lower class of citizen. Put aside that massive issue for a second. If this passes in any way you're opening up the City to lawsuits that us as taxpayers will be on the hook. Please use common sense and have a legal review of any future resolutions so one such as this is shot down before it sees any public hearing. I am incredibly disappointed in the sponsors of this bill. Do better.

Written Testimony

If put in place this mandate would not allow for medical or religious exceptions. I had bad side effects from the 1st shot as did my friend who just got out of the hospital after a week on the highest pain medications from full body rash to spinal headaches. My other friend's son who has a heart condition is no longer allowed to play in sports due to him not having the shot. This mandate would cut off peoples dream job opportunities and cripple our businesses ability to thrive. It would also not allow for one to have privacy of their health status and impose of privacy rights or freedom of choice. I strongly oppose this health card on every level. It in fact puts in place a type of segregation and imposes on our religious freedom. This act can only set a precedent that will lead to more loss of our freedoms.

Written Testimony

I oppose the above resolution for the following reasons.

1. I am a Christian and it is against my religious beliefs to participate in medical procedures that use aborted fetal tissue for use and or development. My congregation is also against collection and storage of our DNA as we believe we are made in the image of GOD and there are mountains of historical evidence of governments and corporations using genetic information without our consent. This goes against our beliefs that others should be using christian DNA for science and marketing. For this reason, we are against PCR testing, however spit test and at home testing kits are acceptable.
2. It is religious discrimination to make it so difficult to participate in society that we have to provide official negative covid tests that cost around \$100 each for my family every single time to participate in recreational activities. When the accommodation is financially burdensome and unachievable, this is discrimination and retaliation for non compliance and I believe it is against the 1964 civil rights act. It also is unconstitutional due to our First Amendment rights. We are tax payers and should have equal access under the law.
3. In your resolution, it states that the population has to be 95% vaccinated to achieve herd immunity, however this is a potential and not a scientific fact. Taking away people's rights based on a probability that may or may not work is wrong. I am against that. If we know something for certain, than I am willing to consider these things but taking away rights and medical coercion because you "feel" powerless is not the way. Also, we will never reach 95% because of children aged 0-11 and mothers not willing to vaccinate their extremely low risk children for the "community". People have a right weight their risk benefit and you are trying to take that away from us. Shame on you!
4. You mentioned that many nations have implemented a passport but the reality is many nations have not and are completely open and are letting the virus pass through. You are trying to control something that is not controllable and you will not be successful at the cost of turning neighbors against each other and taking away freedom. You are on the wrong side

of history here. You are persecuting people. I will mention here that the Neremburg Code that came about during the Nazi trials states this" without the intervention of any element of force, fraud, deceit, duress, overreaching or other ulterior form of constraint or coercion" as it relates to medical science. You must see that what you are doing is coersion and finally force and is against international law.

5. Lastly, this will put such a huge burden on the economic system. There is already a nationwide labor shortage and in Hawaii there is a nursing shortage as well as food establishments and gyms unable to staff. If you pass this you will DESTROY our economy. More people will die of poverty than of covid and you will have to lay your head down at night and own that.

For the reasons, please vote nay.

I OPPOSE Resolution 21-194

Written Testimony

I am against creating a digital vaccine passport. We should not be limiting the peoples choice. This is a decision for the individual, this between a person and their doctor. This is not the role of the government;. This is more of a punishment for those who have decided not to get the covid vaccine. this is their choice and I support everyones decision to choose. Do not punish businesses. They have been throug enough. How about offering communities other resources, like healthy food, water, the basic nutrients of the immune system (vitamin D, A, zinc, selenium etc., free testing etc.

Please OPPOSE Resolution 21-194

Written Testimony I strongly oppose this bill. It goes against our family's personal, medical and religious freedoms. As a family with a history of vaccine injury, we know there's no "one size fits all" when it comes to health and medicine and to limit our family's freedoms because we are choosing our risk is completely wrong and unconstitutional.

I strongly oppose the mandating of “vaccine passports” to access businesses and services here in Hawaii. This Vaccine is not the “end all” cure to the pandemic that it has been advertised to the public as. Since the push to vaccinate our communities began in Hawaii our numbers have only gone up and the idea that those who choose natural immunity and health are second class citizens who do not deserve the right to eat at restaurants, attend movie theaters, or even exercise at a gym is nothing more than discrimination. Our businesses have already seen enough strain through this pandemic and mandatory lockdowns. We have lost many businesses already. To take away nearly half of their business markets you will only be pushing our economy further into a recession.

Written Testimony

I do not support segregation of any kind.
I do not believe that this vaccine is helping our public health situation.
The vaccine has effected my family and friends in more negative ways than positive. I know 3 people that have passed away no more than a week after receiving the shot.

Japan has stopped the use of the Moderna vaccine because of the harmful side effects.

Israel is having the worst outbreaks immediately following their mandates.

People should have the right to choose what you they put in their body. This is America!!

I agree that something must be done to stem the tide of infections, but this is not the answer. It has been shown that the vaccine does not keep you from spreading the virus. You can still spread it and can still get sick. Mandating a vaccine passport also doesn't account for people who aren't able to get vaccinated due to medical risk and those who already have natural immunity after being infected. Where is the data reflecting those numbers? Why are the naturally immune not included in the totals? Why are we no longer screening tourists or requiring them to quarantine? Why aren't we shutting things down entirely like we did last year, even for a month to get our community back on its feet?

These mandates are not based on science! They are a ridiculous means of control and suppression. The virus still has a 99.8% survival rate. The vaccine is neither safe or effective and those vaccinated can still contract and spread COVID. This is just another way our government is creating division and discrimination. The Phizer vaccine is actually NOT FDA approved under BioNtech. Our local government is creating fear mongering and division without looking at scientific facts. According to VAERS, over 13,000 deaths have been reported, and over 600,000 injuries, and those are just the ones reported. Also, there's been NO long term studies, so WE are the guinea pigs! I know several people who were previously healthy and had strokes, heart attacks, or auto immune disorders, within 72 hours of vaccine. I personally don't know one person who's died or even been hospitalized from covid. Why doesn't the state promote building up our immune systems with vitamins and minerals instead if injecting an experimental, poison into our bodies? I'm not afraid of a virus, I'm afraid of a new, rushed, experimental shot, that is not safe or effective!

To force vaccines and vaccine passports on people is one step closer to you snatching the same people up and locking them in internment camps. I completely understand that covid is a real thing but you are going to force people that may not be able to even get it to not be able to enjoy life. No more spontaneous family fun because you will require negative test 48 hours but workers only test 1 time a week. And the labs are back logged.

The government has no right to mandate or force any medical procedure on any individual. This vaccination passport is against our human rights and proves that this has never been about health. There is absolutely no liability for those who have and will be negatively effected by this experimental and nuanced injection. I urge you to reconsider and uphold our constitutional rights. We are a free country and deserve to make our own informed decisions.

In america health is the personal responsibility of the individual not the govt. The virus originally had a 99% recovery rate treatable with hydrochloroquine and/ or ivermectin . This pandemic did not need to last 2 yrs from the aforementioned 2 weeks. We also know that people who have chosen to be “vaccinated “ can still get and spread the virus therefore discriminating against those who have chosen not to makes no sense and appears to be about control and tyranny not health or safety . Please for the sake of free will, personal choice and constitutional freedom do not pass this now or ever. Thank you for your time.

Aloha!

Im writing in today to oppose Resolution 21-194. As an individual, parent, small business owner, I strongly disagree!! Our small businesses are already suffering here in the islands, our keiki are experiencing trauma from the mandates that are already in place and as a freedom loving American, as we all should be, I do not think that imposing more mandates will achieve the goals that this resolution bares in mind. There are so many opinions out there, but as a mom and business owner, you tend to have to fight for everything you accomplish. This is no different. I have listened to testimony after testimony from many doctors and scientists around the world, maybe not the ones you hear of in the media, but those smaller voices that are being silenced so that individuals like myself might never hear the opinions and studies of others. Im here to say that we are sadly and dangerously on the wrong track. Why should individuals be forced to be left out or treated differently because we choose not to be an experiment? Why would people knowingly take a "vaccine" that has many side effects, including deaths, that has poison in it, that has already been proven useless against the delta and is actually causing more harm than good at this point? Ok, I understand that the hospital beds DESIGNATED for patients are fuller, but what about the beds that are being used for vaccine injured, heart attacks, seizures and strokes that bo one seems to be talking about. I know, first hand a family member, in less than a month of getting vaccinated had 2 strokes, a cyst and tumor on his heart and had to get open heart surgery, none of which existed previously. The effectiveness of the vaccine has not "waned" as said in so many reports, the means in which it was created is poor quality. It was meant for specific strains, all of which have disappeared and been dominated by new ones (also scientifically proven variants have been encouraged by the vaccine). I understand that we all want to get back to normal, but THIS, a passport of any kind is not the answer. The worst part is there are effective treatments, which leaves people with their health and life intact compared to the vaccine, but again the media is not sharing that, nor is our "lt gov/dr" talking about other means of treatments, only the vaccine. Why is that? What about Regeneron, Ivermectin and

other suppressed meds not options? I could go on, but I understand there are many more who need to be heard and many other points of views. Taking away people's freedoms by force or coercion is not how America operates. We need way better solutions, not scare tactics and force. Find new sources of information and find new solutions. Looking through one or limited streams of info will only lead to unnecessary deaths, and not just by the virus.

I oppose ANYTHING that restricts the freedom of WE THE PEOPLE!

I wasn't born during the time of Nazi Germany, but I do study history. As a lifelong resident of Oahu with a growing family I am appalled at what had transpired here since March of 2020.

I no longer wonder how a man in the 1930s convinced a nation to murder millions of Jews, because our state government and representatives are doing EXACTLY what Hitler did in the beginning. What's next?

Aloha Sirs and Madams,
First and foremost, to cite what happened in Italy and France in this resolution is abominable! This is America, Land of the FREE! (?) The fact that we even need to have such a hearing; as this is Dismal!
The data and proof of treatments for covid as well as what these vaccinations are doing and causing, around the world; are out there; and I am Positive you are all WELL AWARE! And yet here we are discussing how NOT to lose the definition of America!
This has been an overwhelming 2020/2021, at this point no matter what I/we say, for some unknown reason you all will march on. Therefore, at this point, I am going to simply plead with all of you, please apply Common Sense, use what is out there and begin to truly help us instead of taking an already horrific situation and making it catastrophically worst!

May Gods Wisdom, be with each and every one of you; as you decide not only the fate for covid but the fate of this 50th state of these United States of America, Land of the ????

God Please Help Us All!
Gina M. Factora and
Brian W. Caspino

Written Testimony

I STRONGLY OPPOSE Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

The Committee on Transportation, Suitability and Health should immediately defer the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports ARE NOT necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals must retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

Furthermore, This comes after the CDC Director has said that the vaccine does not stop infection or transmission and the CDC's own data shows that the mRNA experiment has

killed more people than all other vaccines combined over the last 30-years.

In Hawaii, which has 600-deaths per influenza season, there have been 589-deaths in total from COVID-19 over the last 17-months with 39-deaths under the age of 50 and 0-deaths under the age of 18.

97% of those deaths have had an average of 4-comorbidities according to the CDC.

Governor David Ige announced a "successful vaccination program" on July 30, 2021 after 60% of residents were fully vaccinated.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

-Joseph Glade

We are writing in, to OPPOSE the following resolution 21-194
We feel that this has gone too far from “doing the right thing” to a complete dictatorship. As a mother & father, and also business owner- these mandates have completely stepped over their boundaries. We are not okay with the risks of the unknown that could Occur from these vaccines, and the fact that no one will be held accountable, except the individuals themselves, in the event that something goes array, should be more than enough reason, to understand why some people are uncomfortable with vaccinating. If there is any risks, there should Absolutely be a choice.
There has been no real transparency from our government officials. The main stream media sources hold no weight anymore and can no longer be trusted. This has caused more division than anything we’ve even known in our lifetimes. Enough is enough.
We are voicing our rights, and we hope that as Leaders of our communities, you hear us and never forget the oath taken to serve WE THE PEOPLE.

NO to this Resolution.

Written Testimony I am against the proposed digital vaccine passport program. There are many other ways to support the citizens through this situation and this is not one of them. The Covid vaccine carries risk, like all vaccines. This is a conversation between an individual and their physician. This is not the role of government.

Please OPPOSE Resolution 21-194

I strongly oppose this bill. This will create further divide within our community. Instead of working against each other we need to come together for all the people. This isn't about the unvaccinated anymore it is about the power and control the politicians are so desperately after. Covid is here to stay and whether or not a person decides to get vaccinated at this point isn't going to change anything. We cannot live in fear forever we need to live our lives without the division and segregation

Written Testimony

Establishment of a digital passport or anything akin to it is discriminatory and unlawfully results in HIPPA violations in that it identifies individuals as being either vaccinated or unvaccinated, or requires an individual to submit to unwarranted tests. The current vaccines neither protect individuals from contracting Covid-19, nor from spreading the virus to other individuals. Therefore, a passport like this does nothing for public health, rather, it serves only to identify and discriminate against unvaccinated individuals. In addition, as the vaccines have been, until very recently, and only in the case of the Phizer vax, been administered as an experimental drug (whose contents have been largely unknown under an EUA, an individual should be able to choose whether or not to take the risk without discrimination. 'A'ole pono kēia 'ōlelo ho'oholo!

Written Testimony

This Resolution would strip away our civil rights and usher in restrictions eerily similar to Jim Crow laws. These new mandates have already striped away my opportunity to become a Registered Nurse. Hawaii Community College changed the requirements the first day of school and decided they would not be accepting religious or medical exemptions from the vaccine requirement. Where has our freedom gone? We are given the option to deny our faith or disregard our medical exemptions and take this vaccine that has already killed thousands and harmed millions, or loose out on our education, or the right to participate in society. This mandate would give the government too much power over our lives. Once a vaccine passport is ushered in, would the people then be subject to every booster shot that the Government decides will give you the status of "fully vaccinated"? What studies have been conducted about repetitive injections of these new vaccinations? The science is sadly lacking on any long term health effects that these vaccines might cause. What about natural immunity being recognized as a medical exemption from the vaccine? This resolution would affect too many local families and our economy.

I am Strongly Opposed to Any Form Of Vaccine Passport! As a Registered Nurse who has worked through this entire ordeal I find it extremely upsetting to know that this state feels the need to Segregate and Discriminate against the Unvaccinated!!! All you have to do is look at what a failure using a vaccine card has been to stop the spread! We have freely allowed thousands to flood into our state, Many Carrying Covid because they possessed their Magic Card! Spread amongst the vaccinated and the unvaccinated is occurring all throughout this Island! I thought we fought hard to end segregation and the days of "show me your papers"?!? We are regressing so far as a society that I fear we will never return! Stop this now!!!

Attention Ester Kia'aina & Tommy Waters

I strongly oppose Resolution 21-194 for the following reasons: where in this resolutions show ALOHA for all people not justcon Oahu, but island wide. Aloha encompasses being willing to listen tval views, whether we afree withveach other, it also allow for dialogue between each other, as well as gathering t9gether to see how can come together for a positive solution for all side.

Written Testimony This will create financual hardship for all walks of citizens, businesses, communities, create barriers of discriminations, segregations, needed medical, retail & ttransportation, who need to travel for work.

Will you leave office is this the legacy, work ethic, or standing up for whats right, not jump on the mist current bandwagon of popularity.

Mahalo for your time,

W. Keanu

Aloha State Officials,

I write to remind you that you took an oath to the Hawaii State Constitution to protect the rights of the people. We the People have the power, you are servants to us.

It is not your place, or within the lawful constitution to restrict individual freedoms or discriminate against we the people. We are granted rights to self-determination.

Do NOT pass a Health passport/card, this is unlawful.

Hawaii State Constitution
The Bill of Rights
Article 1

Written
Testimony

POLITICAL POWER Section 1. All political power of this State is inherent in the people and the responsibility for the exercise thereof rests with the people. All government is founded on this authority. [Am Const Con 1978 and election Nov 7, 1978]

RIGHTS OF INDIVIDUALS Section 2. All persons are free by nature and are equal in their inherent and inalienable rights. Among these rights are the enjoyment of life, liberty and the pursuit of happiness, and the acquiring and possessing of property. These rights cannot endure unless the people recognize their corresponding obligations and responsibilities. [Am Const Con 1978 and election Nov 7, 1978]

EQUALITY OF RIGHTS Section 3. Equality of rights under the law shall not be denied or abridged by the State on account of sex. The legislature shall have the power to enforce, by appropriate legislation, the provisions of this section. [L 1972, SB No 1408-72 and election Nov 7, 1972; ren Const Con 1978 and election Nov 7, 1978]

I think this is a strong sense of discrimination to say the least. We all have rights don't we? Which means we should all have the freedom that this country was built on to say if we want to take it or not and if we choose not to we should not be penalized. This vaccine passport is going to cause division within our state something we do not need in times like these we should pull together not be divided.

I oppose this bill in full. We are a free country, and this bill infringes on my right as a free citizen. A covid 19 health card does not stop a person from getting infected, nor does it stop the infected person on the card from infecting others, nor does it guarantee the health of the carriers. This is proven as more and more as breakthrough cases are rising. And the numbers are not transparent. No one is immune.

Written Testimony

I humbly come before you all asking to please oppose this bill. I have ohana and friends who makes a living and the only way to feed their ohana is by their employment in restaurants, bars, recreational activities which will one day be mandatory to have a vaccination passport! This is not fair and this will turn out to be segregation between the people of hawai'i. I already see it everywhere. Vax/unvax and that is so hewa to our culture. Please STOP this before it's too late and causes an uproar in our aina. Go back to masking, social distancing and clean hygiene, that was working before this vaccination came out and before you opened our state back up! DO NOT blame our people only, when tourist come in they interact with locals their whole trip here. From the airport to the rental car, to the hotel, restaurants, stores, recreational places etc. Please STOP this and dead this bill for the people of Hawaii's state and especially for our small businesses owners who are finally getting back up on their feet's. I know many still struggling to make ends meet.

Mahalo,
Angel Morales

Written Testimony

According to the CDC, Vaccines do not prevent transmission, so what is the justification for this? "Because New York and San Francisco are doing it" is no justification- your oath as an elected official is to uphold the constitution, not play follow-the-leader.

Similar to the shameful ethnic/religious/racial segregation of the past, we are now seeing an elite ruling class attempting to create distinct categories of people who are marked and segregated in public, which is a blatant violation of basic human rights and constitutional rights as Americans. Some people may choose to forfeit their American freedom by staying home and restricting their encounters with the public, but that is not your decision to make for us.

It should also be noted that studies show the available covid vaccines are vastly underperforming and natural immunity is many times more effective. Why aren't you trusting the science?

In addition to violating our freedom, these policies will further decimate the hardworking local businesses that are vital for our community and economy.

I pray that you will find peace and wisdom and that the fear and hysteria that is consuming your minds will end soon.

I oppose the digital vaccine passport program for private industry to restrict individual access to employment, certain business establishments, and other venues and places of public accommodation. I believe it is a tool that segregates people and allows for legal discrimination based on personal health choices. It further divides our city and its people in a time when we so desperately need to come together.

Vaccine passports no longer make any sense. If vaccinated individuals can now carry and infect other people with Covid, how would allowing them any privileges be beneficial to the community? This would not be about health if implemented but more of a overreach of power and discrimination. If this was about health, our government would be watching other highly vaccinated countries and seeing the data coming out of them showing the vaccinations failing and start finding other solutions. The virus will continue to mutate further and further away from what the vaccine was originally made for. We already see the falling effectiveness with the delta variant and also with dropping antibodies just 6 months after being vaccinated. This is not only wrong on so many levels but this will not even work to stop the virus.

Written Testimony

Dear City Administration and State of Hawaii development,
Because of our high regard for you and your love of our precious state and God, I want to inform you that similar letters to all senators, Board of directors of pediatrics, CEOs of vaccine companies, Bill Gates, Dr. Fauci, Dr. Robert Redfield and have enclosed a letter that I want to send to all pediatricians worldwide. It has come to my attention that in 2013 a letter was written by the American Academy Pediatrics. This letter stated, "ALL parents and patients should be informed about the risks and benefits of preventative and therapeutic procedures including vaccination." Nowhere in said letter is anything stated concerning the risks of vaccines; conversely, only the benefits are described – a very slanted, one-sided story. Therefore, I am seeking your help to make these risks known to the American people, which has not been done, which is irresponsible and unconstitutional.

A. We implore you to address the state and inform the state of these eleven undeniable facts regarding the dangers of vaccines:

1. The U.S. Supreme Court rules all vaccines unavoidably unsafe.
<https://www.law.cornell.edu/supct/cert/09-152#>
2. None of the vaccines on the U.S. CDC recommended childhood vaccine schedule were tested against an inert saline placebo in clinical trials.
The Facts About the FDA's Questionable Practices • Children's Health Defense
3. This HHS lawsuit shows that no safety studies have been conducted on vaccines for thirty-three years.
<https://www.worldhealth.net/news/rfk-jr-wins-case-against-government-vaccine-safety-violations/>
4. Compensation for vaccine injury to date: 4.4 billion and counting.
<https://www.hrsa.gov/vaccine-compensation/data/index.html>
Description of the National Vaccine Injury Compensation Program (NVICP) • Children's Health Defense

5. The CDC, frankly, is a vaccine company; it owns at least fifty vaccine patents and buys and distributes \$4.6 billion in vaccines annually through the Vaccines for Children program. Examining RFK Jr.'s claim that the CDC "Owns over 20 vaccine (greenmedinfo.com) FY 2018 Budget in Brief - CDC | HHS.gov

6. In 1986, Congress passed the National Childhood Vaccine Injury Act freeing companies from liability for injuries resulting from childhood vaccines no matter how toxic the ingredients, how negligent the manufacturer, or how grievous the harm.

H.R.5546 - 99th Congress (1985-1986): National Childhood Vaccine Injury Act of 1986 | Congress.gov | Library of Congress

NCVIA: The Legislation that Changed Everything—Conflicts of Interest Undermine Children's

Health: Part II • Children's Health Defense

7. There are two Hepatitis B vaccines licensed for one day old babies in the United States—one manufactured by Merck and the other by GlaxoSmith Kline. Merck's Hepatitis B was licensed by the FDA after trials which solicited adverse reactions for only five days after vaccination. Similarly, GlaxoSmithKline's Hepatitis B Vaccine was licensed by the FDA after trials which solicited adverse reactions for only four days after vaccination.

recombivax_pi (merck.com)

8. Increase awareness: The law requires "reasonable efforts" to inform the public about the existence of the NVICP, but the total budget for publicity is just \$10,000 a year versus the \$4 billion budget for federal vaccine promotion and development.

9. Vaccines CAN and DO cause injuries. The message that vaccine injuries are rare is not supported by facts and anecdotal evidence. An HHS-sponsored study by the Agency for Healthcare Research and Quality found that vaccine injuries, when tracked using electronic medical records, occurs in one in thirty-nine vaccines given.

Electronic Support for Public Health - Vaccine Adverse Event Reporting System (ESP:VAERS)

(Massachusetts) | AHRQ Digital Healthcare Research: Informing Improvement in Care Quality,

Safety, and Efficiency

Vaccine Injuries Ratio: One for Every 39 Vaccines Administered • Children's Health Defense

10. Post-licensure vaccine safety surveillance is failing the American people and children around the world. The Vaccine Adverse Event Reporting System(VAERS), where doctors and patients voluntarily report adverse vaccine events, received 58,381 reports in 2018. including 412 deaths,1,237 permanent disabilities, and 4, 217 hospitalizations. An HHS-funded review of

VAERS concluded that "fewer than one per cent of vaccine adverse events are reported " to VAERS. The CDC has refused to mandate or automate VAERS reporting.

Electronic Support for Public Health–Vaccine Adverse Event Reporting System (ESP:VAERS)

(ahrq.gov)

ican-reply-december-31-2018.pdf (childrenshealthdefense.org)

11. The CDC vaccine researcher-turned whistleblower, Dr. William Thompson, Ph. D. was denied the ability to testify regarding scientific fraud and destruction of evidence by senior CDC

officials in critical CDC vaccine safety studies regarding an association between childhood vaccines and autism. Thompson invoked federal whistleblower status and alleges that the CDC

destroyed evidence that black boys are 3.36 times more likely to develop autism if they

receive
the MMR vaccine before age three.
CDC Blocks Testimony by Vaccine Whistleblower in Medical Malpractice Case • Children's Health Defense
The Statement of William W. Thompson • Children's Health Defense
B. Force vaccine manufacturers to make these eleven undeniable facts readily available to the public.
C. Force the American Academy of Pediatrics to also make these eleven facts readily available
to the nation on the websites and to make these facts clear in letters written to pediatricians.
D. On October 12, 2017, Eric D. Hargan and the U.S. Department of Health & Human Services
were put on notice with this letter.
<https://www.michiganvaccinechoice.org/single-post/2017/10/12/us-department-of-health-humanservices-put-on-notice>

It is your obligation to the citizens of Hawaii to make sure the request in - said letter is met.

E. Repeal the 1986 vaccine injury act. I implore you to present this information to congress and
the public at every opportunity, and citizens then will be armed with facts to put pressure on
their

elected leaders to repeal and replace the 1986 vaccine injury act.

I am sure you know President Reagan in 1986 signed into law the National Childhood Vaccine Injury Act (NCVIA) which eliminated all financial liability to the vaccine manufacturers due to vaccine injury claims or death unless they committed fraud (i.e., deceit, trickery, practice, or breach of confidence perpetrated for profit or to gain an unfair or dishonest advantage). I beg you to take action regarding the data and information provided in A-E within this letter to prevent vaccine companies from causing more harm to children and

committing fraud against Hawaii people. You could be held civilly or criminally liable for injury or death if these facts are not

addressed in a reasonable time frame. To protect you and to keep you from committing fraud, you have to rectify the situation ABOVE.

Mandating a digital vaccine passport program for private industry to restrict individual access to employment, certain business establishments, and other venues and places of public accommodation means you could be held civilly or criminally liable for injury or death if these facts are not

addressed. I oppose to these criminal acts to mandate a vaccine passport. Anyone who is injured or dies

from a vaccine thirty days from receiving this letter could hold you civilly or criminally liable for

injury or death By not addressing the four requests stated above, you are helping the vaccine companies commit fraud and can be held criminally and civilly libel

This Resolution is discriminatory and creates segregation based on personal medical choices. Segregation based on race, religion or medical status is wrong (remember Molokai and Hansen's disease?). Bodily autonomy is an important aspect of the right to privacy. Compulsory vaccination, as an involuntary medical treatment, amounts to an interference with the right to a private life. Health decisions should be left up to individuals.

Written Testimony

Furthermore, there are existing treatments already available to treat COVID patients, making it unnecessary to mandate experimental new "vaccines." In addition, research shows that those with natural immunity to COVID (they already had it) will see a 2 to 3 fold increase risk of adverse reactions from the COVID shots.

Lastly, there is no evidence to show the vaccine prohibits transmission of the virus, nor protects an individual from contracting the virus. Studies have shown the high viral load in those already vaccinated; thus, they continue to transmit the virus regardless of being fully vaccinated.

We the people of United States of America deserve to have the freedom to choose what goes into our bodies. Other people from all over the country wants and risk their lives to come to America for their freedom. Vaccine Passport is UNAMERICAN. Nazis had Jews show passports. Is this America? What is next? Sew a scarlet "U" on our chest? Take away our guns? Be honest with the facts of covid cases. Be honest to the people of Hawaii. honest, hard working people of Hawaii deserve so much more than this.

Creation of a two-tiered group of people based on vaccine status reeks of discrimination. A person should not be forced (Nuremberg Code) to participate in a program that in the future be potentially harmful. Long-term trials have not been adequately performed, and leading researchers and doctors have had their voices silenced when speaking out against the vaccines. The government and media have done an excellent job muzzling dissent.

Written Testimony Do we still live in a free country?

If this resolution passes, it'll be a slippery slope to a bigger authoritarian governance. And its constituents will become smaller and less free. I do not want this for the sake of my children and grandkids.

Please do not allow this resolution to go forward.

Written Testimony This is a way to cause more division amongst people, destroy our economy and is unconstitutional. This will only lead to more hatred, great anger. It is not ok to bully people into a vaccine and this is exactly that. As people the only thing we truly own is our bodies and we have the right to do with them as we choose.

I strongly oppose! 'A'ole tyranny!

The experimental gene therapy shot is still in experimental phase. I do not wish to be an experiment, especially since studies show that natural immunity is far superior to the shot.

CDC Director quotes that there is a “worsening of infections among vaccinated people over time”

Written
Testimony

According to Christina Parks, PhD in cellular and molecular biology, “These vaccines have no ability to prevent infection by and transmission of the delta variant”

On top of that, I know a handful of healthy people who died shortly after receiving this experimental shot. And there are thousands more who have had severe adverse reactions such as Bell’s palsy, heart attacks, myocarditis, miscarriages, and over 12k people are now permanently disabled.

I am ADAMANTLY opposed to any and all legislation that discloses personal, private medical information as well as discriminates and divides the community. As public service businesses and entities, you are required to provide accommodation and cannot discriminate against people based on their medical preferences. It is a proven fact that vaccinated individuals catch and spread covid. What is the purpose of this passport other than to divide and alienate a portion of the population? Spend time and resources on supplying and equipping the medical centers as you told the public you were doing during the time you shut down the state. Again, I urge you to reject this divisive piece of legislation. It is wrong and immoral to segregate people based on their own personal medical decisions.

Agenda Item RESOLUTION 21-194
Your position on the matter Oppose
Representing Self
Organization Aloha,

I am a licensed RN in the State of Hawaii. I am submitting testimony on behalf of myself as a Medic

My opposition is rooted in science and recent findings reported in the Media by Medical authorities :

A vaccine passport requirement on the private industry to restrict individual access to employment, c
accommodation is not supported by science.

Written Testimony The purpose of a vaccine is to 1. Trigger an immune response in an individual to create immunity to
vital measures in public health. However, Recent admissions by both the CDC and Hawaii Departme
neither ensure immunity nor prevent transmission.
https://www.realclearpolitics.com/video/2021/08/06/cdc_director_vaccines_no_longer_prevent_you.

In contrast, Vaccinated individuals have been found to carry a higher viral load compared to the unv:
<https://www.worldtribune.com/scientists-fully-vaccinated-carry-251-times-the-covid-viral-load-as-u>

Furthermore, recent research has emerged proving that natural immunity from recovering from Covi
individual. Unfortunately, the recovered and immune are not considered when creating public policy
https://www.theepochtimes.com/mkt_morningbrief/covid-19-survivors-have-broad-longer-term-immunity_3928732.html?utm_source=Morningbrief&utm_medium=email&utm_campaign=mb-20208&mktids=cd6dd79f5b811d67c9702ccedf953cb2&est=ehFg0nR8O%2B6NgphBJwDYm9o%2Bxx

Epidemiologists have raised an alarm informing the public that the areas with high vaccination rates

vaccine failure. It is therefore a reasonable conclusion to say that, as much as we wanted them to, th

With all of that being said, I conclude that the Vaccines have not been what the Public was sold that available vaccines do neither. The rise in cases despite high vaccination rate in our state has been de Covid-19 have more robust and longer lasting immunity, yet are not considered when creating publi social discrimination that has no place in our Beautiful State of Hawai`i.

Rather than implementing a divisive and unscientific program to prevent severe cases and deaths fro levels of infection or have implemented therapeutics that have a proven track record of success and with the implementation of safe drugs like Ivermectin in early treatment to prevent severe cases and <https://www.lifesitenews.com/news/breaking-japanese-medical-association-chairman-tells-doctors-t>

I implore you to do the right thing for Hawai`i. Stop the vaccine passport.

Mahalo,

A vaccine passport system would be detrimental and divisive to our community. With other options to prevent and treat covid, mandating vaccines and the use of a passport will cause division instead of unity. Under the USA and Hawaii constitutions, we have that right to choose what we believe is best for us. We need to work on ways to unite and face the issue instead of segregating and silencing a significant portion of our population. Mahalo for your time and consideration.

Please do not mandate, enforce, or put into place any vaccine passport or mandate that restricts the movement of a free people. We, the people of Hawaii, do not want this. Our elected representatives are not listening to us. They are not dealing with the real issue that has existed for decades in Hawaii: our lack of medical care options and resources. Please focus your time, energy, and money on 1. listening to the people you were elected to represent and actually represent us instead of telling us what to do and 2. strengthening our medical options and infrastructure. At this point we are begging you to represent us--which we should not have to do. Please do not move forward with a vaccine passport or mandate. The vaccine is not a one size fits all product. We are citizens of the United States--a free people--and proud to be part of the state of Hawaii and our local communities. Do not restrict us even more.

Written Testimony

I strongly oppose that the City Administration and State of Hawaii develop, implement, and mandate by executive order a digital vaccine passport program. I reject any vaccine passport programs because the government should not take on the role of physician and health care provider. Medical treatments should always be between a physician and patient. Medical treatment assessments should not be prescribed by politicians and government officials. Citizens of the USA are free people who have autonomy over their own body and medical decisions. Medical coercing is illegal. Medical treatments are voluntary and require informed consent.

Vaccine passport program is antithetical to our free society. We, the United States of America, have a Constitution that protect our freedom and rights. Our First Amendment protects free exercise of religion - religious groups who have beliefs that forbid them from seeking medical treatment will be violated. Our Ninth Amendment says, "The enumeration in the Constitution of certain rights shall not be construed to deny or disparage others retained by the people."

Vaccine passports will legalize discrimination and segregation treating vaccinated and unvaccinated differently reminiscent of history - the Nazi era and the civil rights movement. The United States of America fought tyranny during WWII. We fought against the evil Nazis who horrifically used concentration camps to segregate Jews and death camps to murder and extinguish the Jewish people because the Nazis viewed Jews as dangerous, racially inferior, physically unclean. Nazis used the Jewish badge to mark Jews, to segregate them from the rest of the population. The civil rights movement fought against the segregation between blacks and whites. History should never repeat itself when it comes to discrimination and segregation.

The covid vaccine is already showing less efficacy according to CDC Director, Rochelle

Walensky who said that data has shown "worsening of infections among vaccinated people over time." Hawaii Department of Health Director, Dr. Libby Char has said, "The chances of you becoming positive for COVID even though you're fully vaccinated are quite significant."

I am appalled that this is even a item up for discussion. Have we as a country not learned anything from Segregation? What about when the Jews were forced to wear patches of the star of David? Apparently you think that BOTH of those historical moments were ok. Apparently you would be the people standing aside while people were beaten or killed...it's not me so I don't have to worry about it. No, you wouldn't? So why is this ok? Why is it ok to take away our freedoms? To require passports is doing just that!! We live in a free country and once you've approved this then you will be perpetuating segregation and discrimination something we've fought hard in this country to rid ourselves of.

Instead of living in fear let's go back to testing everyone coming to the islands. WE ALL KNOW that the vaccinated carry and pass the covid so we should continue to testing everyone who comes here. Require visitors to get a test 72 hours before arrival VACCINATED OR NOT...REQUIRE IT!

As for our community why not help them get healthier. Supply people with the right vitamins that could help them. Don't you care about people? Even the senate (8-20-21) mentioned preventative treatments. Shouldn't you be looking into it? Not just what the media tells you, but what other doctors are saying and what's working in other countries.

My heart is saddened by the country, this state...the state of people in this country.

Please don't let this pass. For your freedoms, mine and generations to come.

I am not an Anti-Vaxer as the media and several officials have labeled us. I am simple a person who believes in taking care of my Immune system and trusting that it works. As an adult I have never been forced to take a Vaccine or any other medications without my consent. Even if offered by a doctor. I have not taken any medication including basic Tylenol or Advil and I have never been sick. Why now, am I being forced to put something into my body to be a part of society. This is pure evil an unacceptable for our voted officials For us to require us to put something in our bodies that we are not willing to put.

Written Testimony This is a terrible idea. New studies show vaccinated people can carry a very high viral load. Natural immunity from covid exposure is as good as or better than vaccine immunity but is not recognized by the proposed vaccine passport system. This Resolution does not follow the science.

Written Testimony

I oppose all vaccine (health) passports in the state of Hawaii (all counties) like the one being rolled out on Oahu September 13, 2021. This draconian measure is blatant discrimination against those who choose to not be vaccinated against Covid-19, those who can't for health reasons and those who have recovered from the disease and have natural immunity. This measure is coercive, targeting the small group of people who haven't been vaccinated in the hopes of forcing them, by means of public division. It also makes private businesses an arm of the government by forcing them to uphold unlawful mandates. This will bankrupt small businesses already hanging on by a thread after 19 months of restrictions. Finally, this mandate is unconstitutional by discriminating against a specific population and keeping them from patronizing public accommodations, something that the Americans with Disabilities Act is against.

Written
Testimony

Here's what I said... Mandating experimental medical treatments or drugs is not only unconstitutional, it's inhumane. Each individual has the God given right to choose what they put in their body, and we do not know enough about these injections to make an informed decision. Government cannot mandate these injections, as it is a violation of human rights and civil rights. This overreach must stop now before irreversible damage is done to our community.

Written Testimony

Implementing a "vaccine passport" violates Constitutional Rights as well as HIPPA Law. Also, it is a form of discrimination, as well as punishment directed solely towards the unvaccinated. If the main concern is regarding our health & safety, this will do nothing to meet those standards, since both the vaccinated and unvaccinated can be carriers of the virus and spread it. Furthermore, the vaccinated are more than likely to be asymptomatic, which means that they could possibly be "silent spreaders."

I do not believe that this bill should be implemented and I believe that it is against our constitutional rights and ability's to live a free and wholesome life.

The variant and COVID can be spread through vax and un vaxed, and held by each as well.

This is all facts by CDC and FDA.

WHY IS HAWAII THE MOST VAX STATE EITH THE MOST RESTRICTIONS. AND ALL RESTRICTIONS ON RESIDENCE.

LIMIT THE TOURISTS OR PUNISH THEM.

Written
Testimony

have some common sense in this. People are tested within 72 hr before they arrive. Within an asymptotic time frame. Then are not required to test here.... So they bring it into the state. Don't wear masks can go to large gatherings and parties then leave before they give a dang.

Why is everyone in power so ignorant to the fact that tourists are not following rules.

I'm opposed to all rules and regulations affecting way of life but if you are gonna punish, punish the people at fault. Not the hard working and tired residence of Oahu.

We need change and it starts now, and it starts here.

The “vaccine passport” initiative is a violation of basic constitutional rights. It is also a HIPAA compliance violation and Lt. Governor Josh Green is very aware of this. The Government has created its own distrust with the people of Hawaii and its malicious practices.

“FORCING” an agenda is not going to build any trust with the people which you have already lost.

Businesses have already been crushed by your “mandates” in 2020 continuing into 2021. Yet you don’t report that data accurately.

The media needs to report that the virus is treatable.

Written
Testimony

The media needs to report that 99.6% of people who catch it, survive it.

The media needs to report that you can still catch covid and spread it if you CHOOSE to get the shot.
(I say shot because it is not a “vaccine”).

If this is implemented the government will most likely create a mass exodus of Hawaii’s citizens and more businesses will be forced to shut their doors.

A MANDATE IS NOT A LAW.

That is why you’re pushing “EMERGENCY PROCLAMATION” because you know it will never hold up in the judicial system.

You were voted in by the people so listen to the people. Care for the people. The people are your reason.
YOU WORK FOR THE PEOPLE!!!!!!

I, Gilda Holy provide testimony against a vaccine mandate passport.

URGING THE STATE OF HAWAII CITY ADMINISTRATION TO STOP ANY MEASURERS IN IMPOSING A MEDICAL APARTHEID UNETHICAL MANDATE.

Urging for further investigation on the media obscuring the data of the the injured and dead through this experiamtnal Mrna injections.

A force mandate will only harm and kill more innocent people and this goes against the international Nuremberg Code violation

Written Testimony https://www.fhi360.org/sites/all/libraries/webpages/fhi-retc2/Resources/nuremburg_code.pdf
<https://aapsonline.org/category/vaccines/>

Urging to investigate and listen to hundreds of thousands physicians, scientists, nurses around the world being censored.

Urging to outweigh the dangers of these experiments for profits and the result of massive laws suits that such mandates will ensue.

<https://www.wsj.com/articles/universities-face-student-lawsuits-over-covid-19-vaccine-mandate-11628242202>

Respectfully,

Gilda Holy

People who decline to take the vaccine should not be punished. Private businesses should not be punished if they serve individuals who decline to take the vaccine. You have no right to restrict commerce due to an arbitrary health standard. You should be ashamed of yourself for considering an action like this. Resign in shame for supporting a health pass. Once you accept this standard you open the door for any standard. Why shouldn't the standard be a BMI index? Or workout regimen?

No vaccine passports! You are our elected officials, stop dividing the people!! EVERYONE can spread COVID whether they have taken the vaccine or not. Either mandatory testing for everyone, or for no one. It really doesn't matter if you go to a restaurant or movie or wherever and you've had the vaccine, you can still carry Covid and still spread it. PLEASE STOP pursuing things like vaccine passports which don't make any sense. We need to be better than Nazi Germany "Show me your papers".
Thank you.

Written Testimony I am opposed to the resolution 21-194 because its dividing people and causing discrimination, just like race, religion and its our constitutional right in the 1st amendment to choose what we want to put into our body.
Our medical health is guarded under HIPPA guidelines. Tb is way more contagious , HIV, etc and we don't ask about that. Please do not pass this resolution.

I strongly oppose resolution 21-194. The Covid-19 shots work as gene therapy. These vaccines (by the very disclosure of the vaccine manufacturers) contain carcinogens, neurotoxins, animal viruses, animal blood, allergens, and heavy metals. As the Covid-19 shots are still in the experimental phase of study, I do not believe the vaccines have sufficiently been proven to me to be safe and effective.

It is worthwhile to provide some context to these assertions by noting that COVID-19, being untreated, has a survivability rate of 99.98% under 50 years of age. Over 50, the survival rate is 99.5% These are numbers provided by the CDC. This continues to lend credibility to the fact that it would be sinful to seek to undertake a superfluous procedure when the risk of death is substantially low.

Finally this resolution does not address those who have had Covid and have the antibodies. The rush to create a mandatory vaccine passport would do nothing but cripple an already hurting economy and create a divide amongst the citizens.

Written Testimony

As a Hawaiian who has been on this earth for 50 years, with family lineage to this land from the beginning, it hurts deeply to think my right to choose and live my life with my sincerely held religious beliefs is being threatened by this proposal. I am a First Responder and have serviced my community for 22 years helping all in need at times of emergency saving many lives. I chose this occupation because i am that person who would risk my own life for others even understanding that it could cost everything for my own family (wife, and three beautiful daughters). To think that someone could take away my choice with no consideration of my beliefs regardless of my sacrifices feels inhumane. I risk to save life not take it. Vaccine passports would be immoral and a massive government overreach. There is no historical parallel for governments attempting to restrict the movements of healthy people over a respiratory virus in this manner.

New revelations are coming out throughout the world everyday that should put pause to these reactive decisions. People who have had COVID already have significantly more protection from the virus than people who've been vaccinated. Meanwhile, people who've not had COVID and choose to not get vaccinated may or may not be making an unwise decision. But if they are, they are principally putting only themselves at risk. Again it is a matter of choice. I choose to risk my life for my community as a First Responder. I ask that you allow me to choose (not to vaccinate) for myself. By allowing me to choose is no greater risk to others vaccinated or not. My continued work during this pandemic is proof of that. Mahalo for not only listening but hearing me. Aloha

I oppose Resolution 21-194 as it infringes on my constitutional rights and you are discriminating against the individuals who choose not to be vaccinated. You are putting vaccine profits ahead of your contingent's wishes and do not do enough to encourage building natural immunity and taking vitamins for preventative measures. Because of that, the hospital numbers are rising. Take a better stand so it doesn't seem that you just want to shove this investigational vaccine down our throats. Thank you

I oppose this tyrannical and unlawful bill for digital health passports. How dare you introduce segregation into our society because that is what this bill will do. It will segregate the vaxxed from the unvaxxed. Furthermore, this bill will oppress the unvaxxed by denying them services. You are creating a separate class of citizens that you will discriminate against based on whether or not they took a vaccine. Additionally you will hurt businesses because there are plenty of people who will not frequent these establishments. I am vaxxed but I will NOT show a passport and these business will lose my support. I believe people have the right to choose whether they get vaccinated or not. Shame on you for creating a discriminatory society. You have zero aloha if you pass this bill.

Written Testimony I am oppose to this resolution because it takes the away the rights of the citizen by forcing them to follow a mandate which is not a law. It's discriminatory and goes against the Nuremberg laws which were instituted following the Nazi killing many Jews. This was instituted so that there would be protection in the future for discrimination and attacks on human rights.

In this very troubling time & months ahead it is just unimaginable that more restrictions & negative intent is being enforced against Hawai'i residents. Your resolution 21-194 is just another vessel to divide all people; 'ohana, neighbors, co-workers, friends, business owners & establishments, even people who are not acquainted with each other will be prejudiced against anyone with or without your passport. I plead with you-please do not divide our people, to further damage and injure our already near explosive & fragile situation. We are all suffering emotionally from current issues & the division of human kind. Please do not cause more prejudice & distrust among us all. Respect us-not divide us.

Dear Council Members,

Written Testimony Considering that both Unvaccinated and Vaccinated persons can both catch and pass on Covid 19 and it's subsequent variants it is completely discriminatory to deny access to any venue, service, or employment based on vaccination status. Please be on notice that the county and state will be held liable for any discrimination committed by local or state governments. Since this resolution would disproportionately affect citizens of Native Hawaiian ancestry it will be a clear violation of Article I, Section 5 of the Hawai'i Constitution. Sincerely,

Written
Testimony

Dear council members,
I am a very concerned Honolulu resident. I am a mother of 3 healthy children who are at serious risk of being harmed by covid-19. They are likely to suffer and potentially die from the effects covid-19 has on our society. You see, they are physically healthy and according to the CDC have no chance of dying from the effects of SARS-COV-2 if they even catch it. However, the restrictions put on by the City and County in the form of vaccine mandates or testing requirements will effectively exclude them from society and particularly their sports activities. Sports has been the one thing keeping them sane. Especially my oldest son has been suffering from anxiety and depression related to the restrictions put in place. Tween and teen mental health issues, including suicidal thoughts have been going up astronomically. Deaths resulting from this are also Covid deaths and they are on you if you keep this up. The vaccine that is now approved by the FDA is not approved for kids under the age of 16. In addition, the vaccine carries risks such as myocarditis and blood clots among other dangerous things that we know of. I do not want to give my kids, who are going through massive hormonal and physical changes a vaccine that uses new DNA or mRNA technology that has been around for just about a year. We do not know long term effects. Long term being 5-10 and 15 years down the road. You are forcing parents to choose between giving an experimental vaccine with known side effects or potential suicide if excluded from society... for what? A virus that will absolutely not kill them and hospital beds that will not be filled by this age group? If you truly care about our keiki you will not coerce parents into giving their kids this shot. better yet, you will not coerce ANYONE into getting this shot.
Thank you, Katja Bajema

Written Testimony I strongly oppose mandated vaccine passports and resolution 21-194. Please wait until the proof comes out. People will suffer from these shots that are sponsored by big pharma. When the governments has the right to mandate what goes into our bodies we are no longer free human beings. This is a Pandora's box opening the end of our human rights as decreed by God and the constitution of the United States. This is the downfall of our human race

Aloha Council Members,

Written
Testimony

I strongly oppose Resolution 21-194 and ask you to kill it. I can not believe that the City Council is actually contemplating mandating a digital vaccine passport for private industry to restrict individual access to EMPLOYMENT???, certain business establishments and other venues and places of public accommodation. This is such an overreach of government power. So many Hawaii residents are already struggling due to previous lock downs and now you want to further block people from jobs and growing any kind of business? Through history we have seen the horrible decisions governments have made in trying to keep everyone safe, ie. the Japanese internment camps. Taking away people's freedoms and rights is never the way to protect people - it actually hurts people. You do not have the right to tell people what they must put into their bodies.
Stop Resolution 21-194

Written Testimony I oppose this bill because it is immoral and inequitable to restrict people from employment and basic public accommodations (which are paid for by us as taxpayers) based on their personal choice on whether or not to put a experimental vaccine—for which long-term affects to health are still not known—in their body. Furthermore, the CDC states that vaccinated and unvaccinated people carry the same amount of viral load, so the widely-promoted claim that getting vaccinated will prevent the spread of covid-19 is completely unfounded.

Aloha.

As a resident of Hawaii nei. I adamantly oppose this resolution that is being introduced. Health passes of any kind have no place in a current democracy. They violate people's medical privacy. They are an intrusion on ones freedom to practice their religion and be exempt from any kind of vaccine. Health passes that prohibit one person from entering an establishment based on a difference to another person is blatant discrimination. Lastly, I oppose this resolution because plain and simple, these COVID vaccines DO NOT prevent catching or transmitting this virus or it's variances. So, a health pass for only those who are vaccinated would do nothing to prevent spread. This virus has a 1% chance of death. Not a 50%, 30%, 20% or even 10% chance of death. It's time to move on with our lives. Oppose this ridiculous resolution. Mahalo.

Written Testimony I strongly oppose the digital vaccine passport program. In short, there is much data showing that vaccinated people can both catch and spread covid. How many outbreaks or widespread cases have occurred, in the last 18 months, in restaurants, fitness facilities, and other establishments that are being included in this program? What percentage of the entire state population falls into this category? Why is it necessary to create modern-day segregation in our community, especially if over 60% of the state population is “fully vaccinated” and the “vaccine prevents covid contraction?” The passport program is discriminatory and it disrespects our freedom of choice and religious beliefs to choose to decline the experimental shot.

Written Testimony

I strongly oppose this bill as it destroys the notion of medical freedom. The vaccine does not prevent transmission and has not been shown to be the equivalent of natural immunity to the virus. In fact, natural immunity gives 13x greater protection vs. vaccination. So why is natural immunity not being talked about? It feels like this crusade is driven by big pharma otherwise natural immunity would be a part of the conversation if public health was really the core tenant.

Since we reached the 60% population vaccination mark, much like the Israel, we have seen the biggest spike in positive cases since the beginning of the pandemic. It cannot be ruled out that the spike protein found within the vaccine is causing the rise in cases. In any case, a democratic government limiting the freedoms, medical or otherwise, of sovereign, free citizens is unconscionable and more importantly, unconstitutional.

“Thank you for the opportunity to submit written testimony in opposition to RESOLUTION 21-194.

As a resident of the State of Hawaii, I feel that this resolution, which requests that the City Administration and State of Hawaii develop, implement, and “mandate by executive order if necessary” a digital vaccine passport program, is a violation of my constitutional rights and freedoms.

Written Testimony

I believe that electing to take a COVID-19 Vaccine should be a personal, autonomous healthcare decision, and every individual should have the right to choose. The implementation of a vaccine passport program restricts individual access to both public and private businesses establishments and negatively penalizes individuals who have elected not to move forward with vaccination. The restriction essentially prevents unvaccinated individuals from accessing the same resources as vaccinated individuals, and discourages the freedom of the individual to chose not to vaccinate at this time.

Therefore, for the above reasons, I stand in strong opposition to RESOLUTION 21-194, thank you.”

Written Testimony I am writing you to urge you to oppose vaccine passports and mandatory vaccinations. Vaccines do not stop the spread of the coronavirus and it's mutations. As a young person in today's society, statistically, I have the lowest chance of dying, or being significantly ill from covid. Anything health related, especially where there is risk involved, should be allowed the choice of each and every person and their own body. Asking for proof of vaccinations violates each persons bodily autonomy.

1. The COVID vaccine is rooted in unethical clinical studies and an unethical EUA by the FDA. The cdc website clearly states vaccines can take up to 10-years to develop because of the safety standards to do no harm. One clear example of the unethical EUA of COVID vaccines is the vaccine was approved in December 2020 and just 6-months later, the CDC releases a warning of myocarditis, heart inflammation, and blood clotting. Why was this not found in the clinical trials? The answers is short cuts in the EUA that does harm and is unethical. What's the next adverse effects of this vaccine in another 4-6 months from now? Now the cdc is recommending boosters. This is the largest human clinical trial of all time and the VAERS reports show 16,000 plus deaths from the vaccine, this is not presented to the general public or discussed in the media. The vaccine is not ethically researched and does not follow the safety standards of the CDC and the FDA who granted the EUA is still granting EUAs bypassing the safety standards of the science to approve safe vaccines. There is no telling what the long standing affects are with the COVID vaccines.

Written
Testimony

2. Segregation and discrimination is the result when mandating vaccines and creating a vaccine passport. Creating a 2-class of people in our society of COVID vaccinated and COVID non-vaccinated. Many who choose not to be covid vaccinated are vaccinated in many if not all other vaccinations. The covid vaccines were not properly and ethically researched, for many this is something they do not want in their body. Discriminating and segregating our city/state would be shameful for this city council to promote division among our communities. The mayor and the governor mandating vaccines and punishing those who choose not to take an experimental vaccine is wrong at all levels.

3. Healthcare and first responders infrastructure should be ramping up for the future of pandemics, not pointing fingers to a population of those choosing not to take an experimental vaccine. The conversation of denying medical care or grudgingly providing medical care to the unvaccinated population is not how "do no harm" works, force vaccination is not the

answer. Better research and following safety standards of vaccine development is the answer. Investing in the infrastructure for health care providers and first responders is part of the solution also, not segregating and discriminating against a population of people in our community.

Written Testimony I oppose the Oahu safe access program. This creates a two tier system and essentially forces vaccination, doesn't consider natural immunity, or a vast number of other reasons a person would chose not to take an experimental injection.

Written
Testimony

I am strongly opposed to this bill as it is unconstitutional. It is also completely illogical to give those who are vaccinated the “privilege” to enter establishments without testing, and require testing or no entry for the unvaccinated when the vaccine DOES NOT prevent transmission. Therefore I see this as an attempt to segregate, not to promote public health and safety.

I strongly oppose to health cards or vax pass.
It will prevent healthy people from participating in society, affecting the economy hugely.
Business will die because whoever is not getting the shot, will not get the shot anyways! and they will figure out ways to live without these luxuries.
This is going to affect tourism hugely! therefore affect the livelihood of the majority of people who sustain themselves from tourism.
Vaccinated people does not mean healthy people. Someone can be vaccinated and be sick.
Health cards or vax pass are discriminatory and violate the constitution. Stop the fear and educate people on how to remain healthy sustainably. The shot does not create healthy individuals, does not prevent anything. NO VAX PASS OR HEALTH PASS!!!! It makes no sense. Stop destroying the economy and the livelihoods of the people of HAwaii!

This is all comes down to our rights. This is getting crazy. Forcing society to split amongst each other and cause discrimination. I'm being judged, even by certain family members, because I choose not to get vaccinated. that is not right. I have nothing against people who choose to get vaccinated, but why us gotta be judged for a choice we make for ourselves. I feel the social pressure to get vaccinated even worse than the virus itself already. Forcing something upon the people is wrong and everyone has a right to decide what they put in their own body.

"There is no justification in taking away individuals' freedom in the guise of public safety"
- Thomas Jefferson

Our founding fathers believed it. I believe it. I STRONGLY OPPOSE vaccine passports!

Written Testimony Vaccine passports are NOT the answer to stop the spread of Covid! I strongly believe we are failing to meet the classic tenets of bioethical medical research and in particular, not being given the full breadth of information of the adverse event risks. In addition, these vaccines have failed all 10 tenets of the Nuremberg Code.
The fact that vaccinated people can still contract and TRANSMIT the virus wouldn't it be more prudent to TEST EVERYONE!!!

As someone who has gone through treatments last year during the pandemic for Stage 2 Triple Negative Breast Cancer, I am against the mandating of the COVID Vaccinations and the Vaccine Passport.

Written Testimony The chemicals that I was treated with during my chemotherapy affects my heart. After researching the side effects on the vaccines, I am not confident that having myself take the vaccine, will not counteract with the Adriamycin and Taxol in my system.

Furthermore, the Vaccine Passport is discriminating and further divides our community.

Written Testimony

Vaccine mandates infringe upon our constitutional rights and violate our body autonomy. Scientific evidence points to vaccinated individuals carrying similar viral load in their nasal passages as unvaccinated individuals, and therefore presenting the same risk of spread. <https://www.medicalnewstoday.com/articles/delta-infection-unvaccinated-and-vaccinated-people-have-similar-levels-of-virus>

A vaccine passport system is then simply a discriminatory practice with no basis in sound science and public health policy and will do nothing to stop the spread of Covid while negatively impacting the lives of those who choose to exercise their rightful freedom to make their own choices about health and informed consent.

Written Testimony Aloha,
My name is Malcolm and I have been watching the "timely" and organized planning around the arising of the creation and designing of the COVID-19 virus. My concern has to do with the information that is not publicly shared. As a person that is considerate and practices Aloha. I see this vaccine passport as a means to corner and force people's stance against the vaccine as a tactical order by the chain of command that organized the COVID-19 agenda to remove the free will of the people of these islands and the world.

I oppose vaccine passports, and segregation. Due to personal health experiences my family is physically unable to receive the new vaccine, we have focused on getting healthy and being conscious about our lifestyle changes to respect and honor others during this time. It is unconstitutional to implement such measures and it's a slippery slope to go down. Mahalo Nui Loa for taking all of The People into heart when voting NO against this mandate.

Adsum

Written Testimony

I strongly oppose this bill. This bill will violate civil rights laws protecting someone from discrimination especially the 14th Amendment. The 14th Amendment to the US Constitution states..."No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States; nor shall any State deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws."

This law violates my right to liberty, abridged my privileges as a citizen, and deprives me of my right to due process of law, and denies the people who do not want the vaccine equal protection of the laws.

This bill egregiously violates the basic fundamental rights guaranteed by the highest law in our land. If the City of Honolulu proceeds to pass this bill, YOU will be acting in direct opposition to the vows you have taken to uphold the Constitution of the United States. This is unconscionable and you should be brought up on charges if you pass this bill.

Written Testimony I have health issues with my heart, I fear taking the vaccine will cause greater health issues with my health. My son and daughter in law took the vaccine and both got COVID from it. My daughter in law now has lung problems due to the vaccine and she is doing further testing and has yet to resolve her now health issues with breathing. I believe I have the right to reject a vaccine that I fear and should not be discriminated because of my right to choose.

Written
Testimony

I strongly oppose RESOLUTION 21-194. It is a doorway for discrimination and persecution. Denying people access to society based on their vaccination status will bring our communities to a level so low, we may never recover. Families, friendships, and communities will suffer as division grows between the vaxxed and the unvaxxed. For the sake of my children and the generations to come, I oppose this initiative that will lead us down a path of social destruction and compromised integrity. This bill is detrimental to humanity and the spirit of compassion that has always thrived in this beautiful place I have called home for all my life. Again, I strongly oppose RESOLUTION 21-194.

Written Testimony

I am a small business owner on Oahu and am in strong opposition of Resolution 21-194. I do not agree with any form of vaccine passport or mandate. I believe in medical freedom and body autonomy. I think a vaccine passport will divide our community, is discriminatory, and is not in the favor of public health or safety. I cannot help but think of pregnant or nursing women who were not a part of vaccine trials, and who should have the choice of what goes into their bodies, without losing their livelihood or getting to participate in society. We are the Aloha State, please do not divide us. Thank you for listening.

I strongly oppose this proposed "Covid health card" based on simple scientific and medical facts. Dr.'s, PhD's and scientists have come out and said that this Vaccination does not ward off Covid-19 or the delta variant that's run rampant and doesn't always lessen the symptoms. It doesn't make any sense to mandate something that needs boosters now because it's simply not working how it was intended to. Also, it's still a trial until at least 2023 and if some CHOOSE to be a part of the trial then that's wonderful for them, but if some CHOOSE not to be a part of the trial and wait and see how this all pans out, that should be their constitutional right. You cannot mandate an experimental drug. It is against the Nuremberg Code of 1947 that was established after WWII. HIPPA is still in place and that states that people have the right to keep their medical records private. That is a law. Getting vaccinated doesn't make you immune to the disease and you can still spread it, so doesn't that defeat the purpose?

Written Testimony You simply cannot mandate the vaccine. Please find the CDC quote against Vaccine Mandate Page 56, 3rd paragraph: <https://www.cdc.gov/vaccines/acip/meetings/downloads/min-archive/min-2020-08-508.pdf>

Vaccines take 7-8 years to test, not 7-8 months. This vaccine is for emergency use only and is not fully tested and approved by the FDA. FDA approved a different similar test that's not available in the USA. They do not know the short and long-term effects of the vax and many people still get sick and die even after taking the vax.

There are many vax injuries reported on VARES. This link is from the CDC website and will show you the vaccine injuries from the covid vax <https://www.openvaers.com/covid-data>

Cases are not deaths. Most people with a positive test have no symptoms. Plus, covid deaths, in the state, are less than the regular flu.

Our main issue started once more and more people started getting vaccinated and when you stop testing all incoming travelers into the state of Hawaii.

Please hear us and do not implement this “health passport”.

I strongly oppose! This is completely against our inalienable rights, life, liberty, and the pursuit of happiness shall not be infringed upon in any way ! Show me your papers is one step closer to something that we as humans in this lifetime decided would never happen again. This is all too close to Nuremberg, and everyone that is in favor of this will have to answer for their part in furthering this overreach, just like they did in 1949. I choose what goes in and on my body as a sovereign being. We the people do not consent!!

Please oppose this bill for the good of our future generations to have the beautiful gift of choice that we all have had being in this country. Not only will we hurt our already struggling small businesses but we will hurt the whole of our economy for years to come. Please use your sense to understand that a mandate on a vaccine that doesn't keep someone from spreading and being infected with the disease won't keep people from on spreading the disease. Aloha

Written Testimony

As a Big Island resident, we've seen what shut downs and mandatory restrictions have done to our small businesses, restaurants, hospitality companies, and those indirectly involved with these businesses. Mandating vaccine passport will further destroy more businesses that are currently hanging on. My wife and I have been trying to become pregnant and are currently starting the IVF journey. Because of this, we've chosen not to vaccinate as there has not been enough evidence of what the vaccines can do to mother and/or baby. Creating a vaccine passport will further keep us isolated on an already isolating island. Big island does not have nearly a fraction of restaurants and other options that Maui or Oahu have; and to be told that we wouldn't even be allowed to visit any restaurant or other place of recreation would cause further mental health issues. We do not have the parks or convenient access to outdoor activities as other islands and towns do. We look forward to being able to see a movie every once in a while, or have a nice dinner out and now we're being threatened that this unavailable to us that choose not to be vaccinated. We **STRONGLY** oppose ANY vaccine passport or vaccine requirements to visit a private business.

I am strongly opposed to the vaccine passports because it segregates our communities which is at a minimum discrimination, it goes against the Aloha spirit of supporting one another, and is a form of Totalitarianism. Trampling on our freedom of choice, individual rights to privacy, and our basic constitutional rights. This resolution would only move our Government closer to Socialism which is 180 degrees from what our Founding Fathers envisioned, which is a Government of the people, by the people, and for the people.

I oppose this agenda of Covid digital passports. How will implementing these passports help the spread of covid? Help the people of Hawaii? Help the small business of Hawaii? This is just bad all around! Bad for the human spirit even more the ALOHA SPIRIT that the media, government officials ask of the local people to role model???you want the Aloha Spirit? Then Be the example of theAloha Spirit and your people will follow... Bad for the small business owners who rely on week over week financially. Enough of this segregation you're causing based on a flu that has a 99% survival rate? Killing the economy!! Killing the human spirit, killing our freedoms and liberty? Preventing our kids from growing, going after their dreams etc. I stand against this Agenda that makes no sense at all!

I OPPOSE THE VACCINE PASSPORT / HEALTH PASS / GREEN PASS / SMART HEALTH C. other known names).

As a person who works in the protection of a person's confidential information, I believe this resolution is a breach of an individual's Personal Health Information (PHI) according to HIPAA. To be clear, this Resolution 21-194 breaks the HIPAA Act of 1996.

Citing HIPAA ACT OF 1996 Reference:

The Health Insurance Portability and Accountability Act of 1996 is a United States federal statute enacted by the 104th United States Congress and signed into law by President Bill Clinton on August 21, 1996. Privacy Rule & Security Rule is subject to be breached.

Written
Testimony

The Health Insurance Portability and Accountability Act of 1996 (HIPAA or the Kennedy-Kassebaum Act[1][2]) is a United States federal statute enacted by the 104th United States Congress and signed by President Bill Clinton on August 21, 1996. It was created primarily to modernize the flow of health information, stipulate how personally identifiable information maintained by the healthcare and health insurance industries should be protected from fraud and theft, and address limitations on healthcare insurance coverage.[3]

The act consists of five titles. Title I of HIPAA protects health insurance coverage for workers and their families when they change or lose their jobs.[4] Title II of HIPAA, known as the Administrative Simplification (AS) provisions, requires the establishment of national standards for electronic health transactions and national identifiers for providers, health insurance plans, and employers.[5] Title III sets guidelines for pre-tax medical spending accounts, Title IV sets guidelines for group health plans, and

governs company-owned life insurance policies.

There are five sections to the act, known as titles.

Title I: Health Care Access, Portability, and Renewability

Title I of HIPAA regulates the availability and breadth of group health plans and certain individual insurance policies. It amended the Employee Retirement Income Security Act, the Public Health Service Act, and the Internal Revenue Code.

Title I requires the coverage of and also limits restrictions that a group health plan can place on benefits for preexisting conditions. Group health plans may refuse to provide benefits in relation to preexisting conditions for either 12 months following enrollment in the plan or 18 months in the case of late enrollment.[6] Title I allows individuals to reduce the exclusion period by the amount of time that they have had "creditable coverage" before enrolling in the plan and after any "significant breaks" in coverage.[7] "Creditable coverage" is defined quite broadly and includes nearly all group and individual health plans, Medicare, and Medicaid.[8] A "significant break" in coverage is defined as any 63-day period without any creditable coverage.[9] Along with an exception, allowing employers to tie premiums or co-payments to tobacco use and body mass index.

Title I[10] also requires insurers to issue policies without exclusion to those leaving group health plans with creditable coverage (see above) exceeding 18 months, and[11] renew individual policies for as long as they are offered or provide alternatives to discontinued plans for as long as the insurer stays in the market without exclusion regardless of health condition.

Some health care plans are exempted from Title I requirements, such as long-term health plans and limited scope plans like dental or vision plans offered separately from the general health plan. However, if such benefits are part of the general health plan, then HIPAA still applies to such benefits. For example, if a plan offers dental benefits, then it must count creditable continuous coverage under the old health plan towards any of its exclusion periods for dental benefits.

An alternate method of calculating creditable continuous coverage is available to the health plan under Title I. That is, 5 categories of health coverage can be considered separately, including dental and vision coverage. Anything not under those 5 categories must use the general calculation (e.g., the beneficiary may be excluded for 18 months of general coverage, but only 6 months of dental coverage, because the beneficiary could not have a general health plan that covered dental until 6 months prior to the application date). Since limited scope coverage plans are exempt from HIPAA requirements, the odd case exists in which the applicant to a new group health plan cannot obtain certificates of creditable continuous coverage for independent limited scope plans, such as dental to apply towards exclusion periods of the new plan that does include those covered by the old plan.

Hidden exclusion periods are not valid under Title I (e.g., "The accident, to be covered, must have occurred while the beneficiary was covered under this exact same health insurance contract"). Such clauses must be acted upon by the health plan. Also, they must be re-written so they can comply with HIPAA. [12]

Title II: Preventing Health Care Fraud and Abuse; Administrative Simplification; Medical Liability

This section needs additional citations for verification. Please help improve this article by adding citations to reliable sources. Unsourced material may be challenged and removed. (April 2010) (Learn how and how to remove this template message)

Title II of HIPAA establishes policies and procedures for maintaining the privacy and the security of individually identifiable health information, outlines numerous offenses relating to health care, and establishes civil and criminal penalties for violations. It also creates several programs to control fraud.

abuse within the health-care system.[13][14][15][16] However, the most significant provisions of Title II are its Administrative Simplification rules. Title II requires the Department of Health and Human Services to increase the efficiency of the health-care system by creating standards for the use and dissemination of health-care information.[16]

These rules apply to "covered entities", as defined by HIPAA and the HHS. Covered entities include health plans, health care clearinghouses (such as billing services and community health information systems), and health care providers that transmit health care data in a way regulated by HIPAA.[17][18]

Per the requirements of Title II, the HHS has promulgated five rules regarding Administrative Simplification: the Privacy Rule, the Transactions and Code Sets Rule, the Security Rule, the Unique Identifiers Rule, and the Enforcement Rule.

Privacy Rule

The HIPAA Privacy Rule is composed of national regulations for the use and disclosure of Protected Health Information (PHI) in healthcare treatment, payment and operations by covered entities.

The effective compliance date of the Privacy Rule was April 14, 2003, with a one-year extension for "small plans". The HIPAA Privacy Rule regulates the use and disclosure of protected health information (PHI) held by "covered entities" (generally, health care clearinghouses, employer-sponsored health plans, health insurers, and medical service providers that engage in certain transactions).[19] By regulation, the HHS extended the HIPAA privacy rule to independent contractors of covered entities who fit within the definition of "business associates".[20] PHI is any information that is held by a covered entity regarding health care, the provision of health care, or health care payment that can be linked to any individual.[17] This is interpreted rather broadly and includes any part of an individual's medical record or payment history. Covered entities must disclose PHI to the individual within 30 days upon request.[21] Also, they must disclose PHI when required to do so by law such as reporting suspected child abuse to state child welfare agencies.[22]

Covered entities may disclose protected health information to law enforcement officials for law enforcement purposes as required by law (including court orders, court-ordered warrants, subpoenas) and administrative requests; or to identify or locate a suspect, a fugitive, a material witness, or a missing person.[23]

A covered entity may disclose PHI to certain parties to facilitate treatment, payment, or health care coordination without a patient's express written authorization.[24] Any other disclosures of PHI require the covered entity to obtain written authorization from the individual for the disclosure.[25] In any case, when a covered entity discloses any PHI, it must make a reasonable effort to disclose only the minimum necessary information required to achieve its purpose.[26]

The Privacy Rule gives individuals the right to request a covered entity to correct any inaccurate PHI. Also, it requires covered entities to take some reasonable steps on ensuring the confidentiality of communications with individuals.[28] For example, an individual can ask to be called at their work number instead of home or cell phone numbers.

The Privacy Rule requires covered entities to notify individuals of uses of their PHI.[29] Covered entities must also keep track of disclosures of PHI and document privacy policies and procedures.[30] They must appoint a Privacy Official and a contact person[31] responsible for receiving complaints and train all members of their workforce in procedures regarding PHI.[32]

An individual who believes that the Privacy Rule is not being upheld can file a complaint with the Department of Health and Human Services Office for Civil Rights (OCR).[33][34] In 2006 the Wall Street Journal reported that the OCR had a long backlog and ignores most complaints. "Complaints of privacy violations are piling up at the Department of Health and Human Services, but the agency is not doing much to address them."

violations have been piling up at the Department of Health and Human Services. Between April of 2006 and November 2006, the agency fielded 23,886 complaints related to medical-privacy rules, but it has not taken any enforcement actions against hospitals, doctors, insurers or anyone else for rule violations. A spokesman for the agency says it has closed three-quarters of the complaints, typically because it found a violation or after it provided informal guidance to the parties involved." [35] However, in July 2011, the University of California, Los Angeles agreed to pay \$865,500 in a settlement regarding potential HIPAA violations. An HHS Office for Civil Rights investigation showed that from 2005 to 2008, unauthorized employees repeatedly and without legitimate cause looked at the electronic protected health information of numerous UCLAHS patients. [36]

It is a misconception that the Privacy Rule creates a right for any individual to refuse to disclose any information (such as chronic conditions or immunization records) if requested by an employer or business associate. HIPAA Privacy Rule requirements merely place restrictions on disclosure by covered entities and their business associates without the consent of the individual whose records are being requested; they do not place any restrictions upon requesting health information directly from the subject of that information. [37]

2013 Final Omnibus Rule Update

In January 2013, HIPAA was updated via the Final Omnibus Rule. [40] The updates included changes to the Security Rule and Breach Notification portions of the HITECH Act. The most significant changes were the expansion of requirements to include business associates, where only covered entities had originally been held to uphold these sections of the law. [41]

In addition, the definition of "significant harm" to an individual in the analysis of a breach was updated to provide more scrutiny to covered entities with the intent of disclosing breaches that previously were not reported. Previously, an organization needed proof that harm had occurred whereas now organizations must prove that harm had not occurred.

Protection of PHI was changed from indefinite to 50 years after death. More severe penalties for violating PHI privacy requirements were also approved. [42]

The HIPAA Privacy rule may be waived during natural disaster. This was the case with Hurricane Katrina in 2005. [43]

HITECH Act: Privacy Requirements

See the Privacy section of the Health Information Technology for Economic and Clinical Health Act (HITECH Act).

Right to access one's PHI

The Privacy Rule requires medical providers to give individuals access to their PHI. [44] After an individual requests information in writing (typically using the provider's form for this purpose), a provider has 30 days to provide a copy of the information to the individual. An individual may request the information in electronic form or hard-copy, and the provider is obligated to attempt to conform to the requested format. For providers using an electronic health record (EHR) system that is certified using CEHRT (Certified Electronic Health Record Technology) criteria, individuals must be allowed to obtain the PHI in electronic form. Providers are encouraged to provide the information expediently, especially in the case of electronic requests.

Individuals have the right to access all health-related information, including health condition, treatment notes, images, lab results, and billing information. [45] [46] Explicitly excluded are the private psychological notes of a provider, and information gathered by a provider to defend against a lawsuit. [47]

Providers can charge a reasonable amount that relates to their cost of providing the copy, however, it is allowable when providing data electronically from a certified EHR using the "view, download, and transfer" feature which is required for certification. When delivered to the individual in electronic form, the individual may authorize delivery using either encrypted or un-encrypted email, delivery using media drive, CD, etc., which may involve a charge), direct messaging (a secure email technology in common use in the healthcare industry), or possibly other methods. When using un-encrypted email, the individual must understand and accept the risks to privacy using this technology (the information may be intercepted and examined by others). Regardless of delivery technology, a provider must continue to fully secure the information while in their system and can deny the delivery method if it poses additional risk to PHI while in the system.[48]

An individual may also request (in writing) that their PHI is delivered to a designated third party such as a family care provider.

An individual may also request (in writing) that the provider send PHI to a designated service used to store or manage their records, such as a Personal Health Record application. For example, a patient can request in writing that her ob-gyn provider digitally transmit records of her latest pre-natal visit to a pregnancy app that she has on her mobile phone.

Disclosure to relatives

According to their interpretations of HIPAA, hospitals will not reveal information over the phone to family members of admitted patients. This has in some instances impeded the location of missing persons. After the Air France Flight 214 San Francisco crash, some hospitals were reluctant to disclose the identities of patients that they were treating, making it difficult for Asiana and the relatives to locate them.[49] In one instance, a man in Washington state was unable to obtain information about his injured mother.[50]

Janlori Goldman, director of the advocacy group Health Privacy Project, said that some hospitals are "overcautious" and misapplying the law, the Times reports. Suburban Hospital in Bethesda, Md., has interpreted a federal regulation that requires hospitals to allow patients to opt out of being included in the hospital directory as meaning that patients want to be kept out of the directory unless they specifically request otherwise. As a result, if a patient is unconscious or otherwise unable to choose to be included in the directory, relatives and friends might not be able to find them, Goldman said.[51]

Transactions and Code Sets Rule

HIPAA was intended to make the health care system in the United States more efficient by standardizing health care transactions. HIPAA added a new Part C titled "Administrative Simplification" to Title X of the Social Security Act. [52] This is supposed to simplify healthcare transactions by requiring all health care providers to engage in health care transactions in a standardized way.

The HIPAA/EDI (electronic data interchange) provision was scheduled to take effect from October 1, 2000 with a one-year extension for certain "small plans". However, due to widespread confusion and difficulty implementing the rule, CMS granted a one-year extension to all parties.[citation needed] On January 1, 2003, newer versions, ASC X12 005010 and NCPDP D.0 become effective, replacing the previous ASC X12 004010 and NCPDP 5.1 mandate.[53] The ASC X12 005010 version provides a mechanism allowing for the use of ICD-10-CM as well as other improvements.

After July 1, 2005 most medical providers that file electronically had to file their electronic claims using HIPAA standards in order to be paid.[54]

Under HIPAA, HIPAA-covered health plans are now required to use standardized HIPAA electronic transactions. See, 42 USC § 1320d-2 and 45 CFR Part 162. Information about this can be found in the

rule for HIPAA electronic transaction standards (74 Fed. Reg. 3296, published in the Federal Register January 16, 2009), and on the CMS website.[55]

Key EDI (X12) transactions used for HIPAA compliance are:[citation needed]

EDI Health Care Claim Transaction set (837) is used to submit health care claim billing information, encounter information, or both, except for retail pharmacy claims (see EDI Retail Pharmacy Claim Transaction). It can be sent from providers of health care services to payers, either directly or via intermediary billers and claims clearinghouses. It can also be used to transmit health care claims and billing payment information between payers with different payment responsibilities where coordination of benefits is required or between payers and regulatory agencies to monitor the rendering, billing, and/or payment of health services within a specific health care/insurance industry segment.

For example, a state mental health agency may mandate all healthcare claims. Providers and health care trade professional (medical) health care claims electronically must use the 837 Health Care Claim: Professional standard to send in claims. As there are many different business applications for the Health Care claim, there can be slight derivations to cover off claims involving unique claims such as for institutional professionals, chiropractors, and dentists etc.

EDI Retail Pharmacy Claim Transaction (NCPDP Telecommunications Standard version 5.1) is used to submit retail pharmacy claims to payers by health care professionals who dispense medications, either directly or via intermediary billers and claims clearinghouses. It can also be used to transmit claims for pharmacy services and billing payment information between payers with different payment responsibilities where coordination of benefits is required or between payers and regulatory agencies to monitor the rendering, billing, and/or payment of retail pharmacy services within the pharmacy health care/insurance industry segment.

EDI Health Care Claim Payment/Advice Transaction Set (835) can be used to make a payment, send an Explanation of Benefits (EOB), send an Explanation of Payments (EOP) remittance advice, or make a payment and send an EOP remittance advice only from a health insurer to a health care provider either directly or via a financial institution.

EDI Benefit Enrollment and Maintenance Set (834) can be used by employers, unions, government associations or insurance agencies to enroll members to a payer. The payer is a healthcare organization that pays claims, administers insurance or benefit or product. Examples of payers include an insurance company, healthcare professional (HMO), preferred provider organization (PPO), government agency (Medicaid/Medicare etc.) or any organization that may be contracted by one of these former groups.

EDI Payroll Deducted and another group Premium Payment for Insurance Products (820) is a transaction for making a premium payment for insurance products. It can be used to order a financial institution to make a payment to a payee.

EDI Health Care Eligibility/Benefit Inquiry (270) is used to inquire about the health care benefits and eligibility associated with a subscriber or dependent.

EDI Health Care Eligibility/Benefit Response (271) is used to respond to a request inquiry about the health care benefits and eligibility associated with a subscriber or dependent.

EDI Health Care Claim Status Request (276) This transaction set can be used by a provider, recipient of health care products or services or their authorized agent to request the status of a health care claim.

EDI Health Care Claim Status Notification (277) This transaction set can be used by a healthcare provider or authorized agent to notify a provider, recipient or authorized agent regarding the status of a health care claim or encounter, or to request additional information from the provider regarding a health care claim or encounter. This transaction set is not intended to replace the Health Care Claim Payment/Advice Transaction Set (835) and therefore, is not used for account payment posting. The notification is at a summary or line detail level. The notification may be solicited or unsolicited.

EDI Health Care Service Review Information (278) This transaction set can be used to transmit health care service information, such as subscriber, patient, demographic, diagnosis or treatment data for the purpose of the request for review, certification, notification or reporting the outcome of a health care services review.

EDI Functional Acknowledgement Transaction Set (997) this transaction set can be used to define transaction set structures for a set of acknowledgments to indicate the results of the syntactical analysis of the electronically encoded documents. Although it is not specifically named in the HIPAA Legislation or Final Rule, it is necessary for X12 transaction set processing. The encoded documents are the transaction sets, which are grouped in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

Brief 5010 Transactions and Code Sets Rules Update Summary

Transaction Set (997) will be replaced by Transaction Set (999) "acknowledgment report".

The size of many fields {segment elements} will be expanded, causing a need for all IT providers to update their corresponding fields, element, files, GUI, paper media, and databases.

Some segments have been removed from existing Transaction Sets.

Many segments have been added to existing Transaction Sets allowing greater tracking and reporting of services and patient encounters.

Capacity to use both "International Classification of Diseases" versions 9 (ICD-9) and 10 (ICD-10-CM) has been added.[56][57]

Security Rule

The Final Rule on Security Standards was issued on February 20, 2003. It took effect on April 21, 2005, with a compliance date of April 21, 2005, for most covered entities and April 21, 2006, for "small plans". [58] The Security Rule complements the Privacy Rule. While the Privacy Rule pertains to all Protected Health Information (PHI) including paper and electronic, the Security Rule deals specifically with Electronic Protected Health Information (EPHI). It lays out three types of security safeguards required for covered entities: administrative, physical, and technical.[58] For each of these types, the Rule identifies various security standards, and for each standard, it names both required and addressable implementation specifications. Required specifications must be adopted and administered as dictated by the Rule. Addressable specifications are more flexible. Individual covered entities can evaluate their own situation and determine the best way to implement addressable specifications. Some privacy advocates have argued that this "flexibility" may provide too much latitude to covered entities.[59] Software tools have been developed to assist covered entities with risk analysis and remediation tracking. The standards and specifications are as follows:

Administrative Safeguards – policies and procedures designed to clearly show how the entity will comply with the act

Covered entities (entities that must comply with HIPAA requirements) must adopt a written set of policies and procedures and designate a privacy officer to be responsible for developing and implementing all required policies and procedures.

The policies and procedures must reference management oversight and organizational buy-in to comply with the documented security controls.

Procedures should clearly identify employees or classes of employees who have access to electronic health information (E PHI). Access to E PHI must be restricted to only those employees who have a right to complete their job function.

The procedures must address access authorization, establishment, modification, and termination. Entities must show that an appropriate ongoing training program regarding the handling of PHI is provided to employees performing health plan administrative functions.

Covered entities that out-source some of their business processes to a third party must ensure that the vendors also have a framework in place to comply with HIPAA requirements. Companies typically provide assurance through clauses in the contracts stating that the vendor will meet the same data protection requirements that apply to the covered entity. Care must be taken to determine if the vendor further out-sources any data handling functions to other vendors and monitor whether appropriate contracts and controls are in place.

A contingency plan should be in place for responding to emergencies. Covered entities are responsible for backing up their data and having disaster recovery procedures in place. The plan should document disaster priority and failure analysis, testing activities, and change control procedures.

Internal audits play a key role in HIPAA compliance by reviewing operations with the goal of identifying potential security violations. Policies and procedures should specifically document the scope, frequency, and procedures of audits. Audits should be both routine and event-based.

Procedures should document instructions for addressing and responding to security breaches that are identified either during the audit or the normal course of operations.

Physical Safeguards – controlling physical access to protect against inappropriate access to protected health information. Controls must govern the introduction and removal of hardware and software from the network. (When equipment is retired it must be disposed of properly to ensure that PHI is not compromised.)

Access to equipment containing health information should be carefully controlled and monitored.

Access to hardware and software must be limited to properly authorized individuals.

Required access controls consist of facility security plans, maintenance records, and visitor sign-in and escorts.

Policies are required to address proper workstation use. Workstations should be removed from high-traffic areas and monitor screens should not be in direct view of the public.

If the covered entities utilize contractors or agents, they too must be fully trained on their physical access responsibilities.

Technical Safeguards – controlling access to computer systems and enabling covered entities to protect electronic communications containing PHI transmitted electronically over open networks from being intercepted by anyone other than the intended recipient.

Information systems housing PHI must be protected from intrusion. When information flows over open networks, some form of encryption must be utilized. If closed systems/networks are utilized, existing security controls are considered sufficient and encryption is optional.

Each covered entity is responsible for ensuring that the data within its systems has not been changed in an unauthorized manner.

Data corroboration, including the use of a checksum, double-keying, message authentication, and digital signature may be used to ensure data integrity.

Covered entities must also authenticate entities with which they communicate. Authentication consists

corroborating that an entity is who it claims to be. Examples of corroboration include password systems or three-way handshakes, telephone callback, and token systems.

Covered entities must make documentation of their HIPAA practices available to the government to determine compliance.

In addition to policies and procedures and access records, information technology documentation should include a written record of all configuration settings on the components of the network because these components are complex, configurable, and always changing.

Documented risk analysis and risk management programs are required. Covered entities must carefully consider the risks of their operations as they implement systems to comply with the act. (The requirement for risk analysis and risk management implies that the act's security requirements are a minimum standard that places responsibility on covered entities to take all reasonable precautions necessary to prevent PHI from being used for non-health purposes.)

Unique Identifiers Rule (National Provider Identifier): HIPAA covered entities such as providers conducting electronic transactions, healthcare clearinghouses, and large health plans must use only the National Provider Identifier (NPI) to identify covered healthcare providers in standard transactions by May 23, 2007. Small health plans must use only the NPI by May 23, 2008. Effective from May 2006 (May 2007 for small health plans), all covered entities using electronic communications (e.g., physicians, hospitals, health insurance companies, and so forth) must use a single new NPI. The NPI replaces all other identifiers used by health plans, Medicare, Medicaid, and other government programs.[60] However, the NPI does not replace a provider's DEA number, state license number, or tax identification number. The NPI is 10 digits (mostly alphanumeric), with the last digit being a checksum. The NPI cannot contain any embedded intelligence or other words, the NPI is simply a number that does not itself have any additional meaning. The NPI is unique and national, never re-used, and except for institutions, a provider usually can have only one. An institution may obtain multiple NPIs for different "sub-parts" such as a free-standing cancer center or rehab facility.

Enforcement Rule: On February 16, 2006, HHS issued the Final Rule regarding HIPAA enforcement. The rule became effective on March 16, 2006. The Enforcement Rule sets civil money penalties for violating HIPAA rules and establishes procedures for investigations and hearings for HIPAA violations. For many years there were few prosecutions for violations.[61]

This may have changed with the fining of \$50,000 to the Hospice of North Idaho (HONI) as the first entity to be fined for a potential HIPAA Security Rule breach affecting fewer than 500 people. Rachel Seeger, spokeswoman for HHS, stated, "HONI did not conduct an accurate and thorough risk analysis to the confidentiality of ePHI [electronic Protected Health Information] as part of its security management from 2005 through Jan. 17, 2012." This investigation was initiated with the theft from an employee of an unencrypted laptop containing 441 patient records.[62]

Wikisource has original text related to this article:

American Recovery and Reinvestment Act of 2009/Division A/Title XIII/Subtitle D

As of March 2013, the U.S. Dept. of Health and Human Services (HHS) has investigated over 19,300 cases that have been resolved by requiring changes in privacy practice or by corrective action. If noncompliance is determined by HHS, entities must apply corrective measures. Complaints have been investigated against many different types of businesses such as national pharmacy chains, major health care centers, insurance groups, hospital chains and other small providers. There were 9,146 cases where the HHS investigation determined that HIPAA was followed correctly. There were 44,118 cases that HHS did not find eligible for enforcement; for example, a violation that started before HIPAA started; cases withdrawn by the provider; or an activity that does not actually violate the Rules. According to the HHS website,[63] the following

issues that have been reported according to frequency:

Misuse and disclosures of PHI

No protection in place of health information

Patient unable to access their health information

Using or disclosing more than the minimum necessary protected health information

No safeguards of electronic protected health information.

The most common entities required to take corrective action to be in voluntary compliance according are listed by frequency:[63]

Private Practices

Hospitals

Outpatient Facilities

Group plans such as insurance groups

Pharmacies

Title III: Tax-related health provisions governing medical savings accounts: Title III standardizes the that may be saved per person in a pre-tax medical savings account. Beginning in 1997, medical savings account ("MSA") are available to employees covered under an employer-sponsored high deductible small employer and self-employed individuals.

Title IV: Application and enforcement of group health insurance requirements: Title IV specifies coverage for group health plans regarding coverage of persons with pre-existing conditions, and modifies continuation of coverage requirements. It also clarifies continuation coverage requirements and includes COBRA clarification.

Title V: Revenue offset governing tax deductions for employers: Title V includes provisions related company-owned life insurance for employers providing company-owned life insurance premiums, the tax-deduction of interest on life insurance loans, company endowments, or contracts related to the company. It also repeals the financial institution rule to interest allocation rules. Finally, it amends provisions of law relating to people who give up United States citizenship or permanent residence, expanding the expatriation tax to be assessed against those deemed to be giving up their U.S. status for tax reasons, making ex-citizens' names part of the public record through the creation of the Quarterly Publication Individuals Who Have Chosen to Expatriate.[64]

Effects on research and clinical care: The enactment of the Privacy and Security Rules has caused many changes in the way physicians and medical centers operate. The complex legalities and potentially steep penalties associated with HIPAA, as well as the increase in paperwork and the cost of its implementation, were causes for concern among physicians and medical centers. An August 2006 article in the *Journal of Internal Medicine* detailed some such concerns over the implementation and effects of HIPAA.[65]

Effects on research: HIPAA restrictions on researchers have affected their ability to perform retrospective chart-based research as well as their ability to prospectively evaluate patients by contacting them for follow-up. A study from the University of Michigan demonstrated that implementation of the HIPAA Privacy Rule resulted in a drop from 96% to 34% in the proportion of follow-up surveys completed by study patients followed after a heart attack.[66] Another study, detailing the effects of HIPAA on recruitment for a cancer prevention, demonstrated that HIPAA-mandated changes led to a 73% decrease in patient accrual, a tripling of time spent recruiting patients, and a tripling of mean recruitment costs.[67]

In addition, informed consent forms for research studies now are required to include extensive detail about the participant's protected health information will be kept private. While such information is important

addition of a lengthy, legalistic section on privacy may make these already complex documents even user-friendly for patients who are asked to read and sign them.

These data suggest that the HIPAA privacy rule, as currently implemented, may be having negative impacts on the cost and quality of medical research. Dr. Kim Eagle, professor of internal medicine at the University of Michigan, was quoted in the Annals article as saying, "Privacy is important, but research is also important in improving care. We hope that we will figure this out and do it right." [65]

Effects on clinical care: The complexity of HIPAA, combined with potentially stiff penalties for violations, may lead physicians and medical centers to withhold information from those who may have a right to it. A report of the implementation of the HIPAA Privacy Rule by the U.S. Government Accountability Office for health care providers were "uncertain about their legal privacy responsibilities and often responded with an overly guarded approach to disclosing information ... than necessary to ensure compliance with the HIPAA rule". [65] Reports of this uncertainty continue. [68]

Costs of implementation: In the period immediately prior to the enactment of the HIPAA Privacy and Security Acts, medical centers and medical practices were charged with getting "into compliance". With the early emphasis on the potentially severe penalties associated with violation, many practices and centers turned to private, for-profit "HIPAA consultants" who were intimately familiar with the details of the legislation and offered their services to ensure that physicians and medical centers were fully "in compliance". In addition to the costs of developing and revamping systems and practices, the increase in paperwork and staff time necessary to meet the legal requirements of HIPAA may impact the finances of medical centers and practices at a time when insurance companies' and Medicare reimbursement is also declining. [citation needed]

Education and training: Education and training of healthcare providers is a significant requirement for the implementation of the HIPAA Privacy and Security Acts. Effective training must describe the statutory and regulatory background and purpose of HIPAA and a general summary of the principles and key provisions of the Privacy Rule. [citation needed] Although each HIPAA training course should be tailored towards the needs of employees attending the course, there are some vital elements that should be included: [69] [according to whom?]

What is HIPAA? Why HIPAA is important?

HIPAA Definitions; Patient's rights; HIPAA Privacy Rule; Disclosures of PHI; Breach Notifications; HIPAA Agreements

HIPAA Security Rule; Safeguarding ePHI; Potential Violations; Employee Sanctions

HIPAA acronym; Although the acronym HIPAA matches the title of the 1996 Public Law 104-191, the Privacy Insurance Portability and Accountability Act, HIPAA is sometimes incorrectly referred to as "Health Information Privacy and Portability Act (HIPPA)". [70] [71]

Violations

HIPAA Chart illustrating HIPAA violations by Type

A breakdown of the HIPAA violations that resulted in the illegal exposure of personal information. According to the US Department of Health and Human Services Office for Civil Rights, between April and January 2013, it received 91,000 complaints of HIPAA violations, in which 22,000 led to enforcement actions of varying kinds (from settlements to fines) and 521 led to referrals to the US Department of Justice for criminal actions. [72] Examples of significant breaches of protected information and other HIPAA violations include:

The largest loss of data that affected 4.9 million people by Tricare Management of Virginia in 2011 [73] The largest fines of \$5.5 million levied against Memorial Healthcare Systems in 2017 for accessing

confidential information of 115,143 patients [74] and of \$4.3 million levied against Cignet Health of Maryland in 2010 for ignoring patients' requests to obtain copies of their own records and repeated inquiries of federal officials' inquiries[75] The first criminal indictment was lodged in 2011 against a Virginia physician who shared information with a patient's employer "under the false pretenses that the patient posed a serious and imminent threat to the safety of the public, when in fact he knew that the patient was not a threat." [76] According to Koczkodaj et al., 2018,[77] the total number of individuals affected since 2009 is 173,398,820.

The differences between civil and criminal penalties are summarized in the following table:
Type of Violation: CIVIL Penalty (min) - CIVIL Penalty (max): Individual did not know (and by exercising reasonable diligence would not have known) that he/she violated HIPAA
\$100 per violation, with an annual maximum of \$25,000 for repeat violations
\$50,000 per violation, with an annual maximum of \$1.5 million

HIPAA violation due to reasonable cause and not due to willful neglect
\$1,000 per violation, with an annual maximum of \$100,000 for repeat violations
\$50,000 per violation, with an annual maximum of \$1.5 million

HIPAA violation due to willful neglect but violation is corrected within the required time period
\$10,000 per violation, with an annual maximum of \$250,000 for repeat violations
\$50,000 per violation, with an annual maximum of \$1.5 million

HIPAA violation is due to willful neglect and is not corrected
\$50,000 per violation, with an annual maximum of \$1,000,000
\$50,000 per violation, with an annual maximum of \$1.5 million

Type of Violation

CRIMINAL Penalty- Covered entities and specified individuals who "knowingly" obtain or disclose individually identifiable health information: A fine of up to \$50,000 Imprisonment up to 1 year

Offenses committed under false pretenses: A fine of up to \$100,000 Imprisonment up to 5 years

Offenses committed with the intent to sell, transfer, or use individually identifiable health information for commercial advantage, personal gain or malicious harm: A fine of up to \$250,000 Imprisonment up to 5 years

Written Testimony

Early this year I joined a study on monoclonal antibody therapy for COVID. The protocol called for early diagnosis, early ambulatory treatment with a one-time IV infusion of monoclonal antibodies. The goal of treatment was to keep us out of the hospital and off a ventilator.

I was accepted for the study because they needed people like me, over 65 with co-morbidities which in my case included diabetes and obesity. The caveat? No vaccine. Instead, if I get COVID I follow the early diagnosis, prompt treatment and infusion therapy protocol to stay out of the hospital. This was not a decision I took lightly. Like all the unvaccinated I was vilified unrelentingly from all sides in all mediums from people who didn't know me or the reasons for my choice.

Mandates compel, vaccine passports discriminate, and both divide the body politic. There is no reason to punish and separate us. That is what I find distressing, the very people we elected to bring us together have chosen the easy way out and are setting us apart. There are so many good reasons for people to make the choices they've made and so many ways to bring us together to fight this scourge instead of punitive separation.

Like me there are many out there who have good reasons for their choice. I know many parents with children who practice "ai pono," eating right: putting healthy things into their bodies and the bodies of their children. They carefully question and consider the medications they allow in their bodies because they are health conscious. They ask their primary care physicians detailed, thoughtful questions. Yes, they are different from many of us who were raised to say, "yes doctor".

They are not against vaccines. They know that there is still so much to learn about the virus and its variants and the evolving efficacy and safety of the vaccines in the long term. There is no data on efficacy and safety in the long term, data which will have an impact on their children. They with great deliberation and intent have decided to be prudent and wait for

further developments.

I am astounded that we hear no mention of monoclonal antibody therapy that keeps people with Covid out of the hospital. Because of the success of the studies the U.S. has stockpiled millions of doses of these antibodies. When I enrolled in the study there were under 100 doses in the state and less than 70 on Oahu. I hear nothing of this from my leaders.

For the vaccinated and unvaccinated who get Covid, I am stunned that we seem to have taken no steps to treat people early and keep them out of the hospital. Didn't you ever hear your mother say, "nip it in the bud". We should listen to our moms and treat the infection more aggressively at home and keep people out of the hospital.

Unlike many countries no ambulatory protocols to treat COVID19 at home have been officially developed in the U.S. since the pandemic began. Encourage and take away roadblocks to Hawaii's physicians so they start treating patients at home using their clinical skills and their drive to heal and treat illness. Get them into the fight. "A guide to home based COVID treatment from the Association of American Physicians and Surgeons" and other protocols are already available to treat people early and keep them out of the hospital. Using home care kits and instructions like many countries do plus early treatment by PCPs will not only keep people out of the hospital but reduce, fear, anxiety, isolation and depression.

Anything is better than what we have been advised to do since the pandemic started: stay home, use over the counter medications, drink plenty of water, get plenty of fresh air and if you have difficulty breathing and feel pain in your chest go to the hospital.

There is so much we can do together without resorting to the ugliness of separating the body politic.

Aloha,

Written
Testimony

I Coral Schiller, strongly appose this resolution to make vaccination mandatory on small businesses and patrons. There is not enough science to show this is even a safe resolution. The Vaers website which is a government website shows far too much adverse effects/deaths due to this brand new vaccine which is using every person it injects as a test subject. I feel far less safe knowing that everyone in an establishment is vaccinated and feel they are "safe", however are still able to spread this virus. I know more friends and family that have gotten COVID post vaccine then friends and family who have contracted the virus with out having received the vaccine. There is simply not enough data on anything to make a drastic decision on a persons health for them. This is completely not an American way. We live in a country of the FREE, not a dictatorship. I will fight for mine and every Americans freedom! Mahalo for listening.

I strongly oppose any legislation that proposes vaccine passports. We don't live in a communist country or in Nazi Germany. Passports are another way of subverting people. As far as I can remember, Hawaii is still a part of the United States of America.

Written Testimony If people don't want to take the vaccine, that is their choice. Correct me if I'm wrong, but being a vaccinated person myself, I can still transmit the this virus the same as an unvaccinated person. Vaccinations don't protect anybody but myself.

Vaccine passports will just divide our community.

And what about people who are immune, why should they be forced to get vaccinated?

Aloha,

My name is Brianne Cabebe and I am strongly opposing Resolution 21-194. Taking away my freedom to choose what goes into my body is unconstitutional. This is no longer the land of the free or the Aloha State.

Mahalo for the opportunity to strongly oppose Resolution 21-194.

Brianne Cabebe

Written Testimony

This is absolutely unconstitutional and a direct violation of our human rights (HIPPA). This cannot be forced upon the people of Hawaii! This is supposed to be America the land of the FREE! Not a communistic dictatorship!! And that is exactly what this resolution is leading to. Frankly I am appalled at how far this charade has gone and the people of Hawaii won't stand for it!! Governor Ige along with many of our legislators need to make a huge shift in their decision makings related to COVID-19 and start doing the real research themselves. Actually stand up for the people and not the pharmaceutical giants with their big pockets! Mahalo

Agenda Item COVID Vaccine Passports and pre-Travel Testing
Your position on the matter Oppose
Representing Self
Organization

The idea that nearly two years after the pandemic began, and with billions of dollars in federal aid provided to the state, that any elected official or bureaucrat would entertain pre-travel COVID-19 testing, regardless of vaccination status, and the overtly racist and coercive use of a vaccine passport to be a part of regular society is simply abhorrent. What did you do with all that money and time?

Written
Testimony

We know that our minority diasporas of Polynesian and certain Asian demographics are the least vaccinated of any groups on our islands. Yet you are choosing to segregate and discriminate against them, those with religious and medical reasons, and those that have weighed liberty against risk simply because they didn't take the jab. In essence, you are making the jab mandatory by exclusion or, more simply, coercion. There is little doubt that this can be viewed as a Nuremberg violation which states that no person should be subjected to any medical experiment. So unless you intend to honor only those with the exceedingly quickly approved Pfizer vaccine, I would argue any other vaccine is still in the experimental phase and getting one of those shots in order to be a part of society, e.g. being coerced, would be a violation:

"...without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

But why stop there? Since we know STDs are often passed by drunk people who lose their inhibitions through alcohol, and with Hawaii being known as a place where singles come to party and hook up, why not expand the pre-travel testing requirement for STDs? Herpes, which is very transmissible with nearly 1 out of 4 being a carrier of some form, is extremely endemic and yet preventable. Perhaps we should also have patrons and employees of bars,

night clubs, and even gyms show proof of Gardasil vaccination.

Also, I think travelers from certain countries and states should have to take a TB test before arriving as well. TB infects nearly 10 million a year; TB is highly transmissible with over 1.5 million deaths per annum. Though, to be fair, just like COVID 19, if TB is treated properly, the disease is generally easy to overcome.

Do you see where this kind of idiocy is headed? 15 months ago no one thought we we have to show our papers to travel and to patronize any public or commercial establishment. Seems the conspiracy theorists were correct in their slippery slope argument.

Not Pono.

Written Testimony

I am a teacher and a volleyball coach. I believe each person has the right, as written in the Constitution of the United States, to make a choice of what they put into their bodies. There is no absolute scientific proof that this "shot" has any validity toward immunity of any kind. In fact, it's been proven to be a false narrative and it's harmful to the human body. I will not put it into my body, being a physical education major, professional athlete and coach. I have been a role model for many years and teach things that are right and good. Truth and love is what I teach. My children, athletes and parents deserve respect. They also deserve to have their Constitutional Rights held in place. There is so much more to say, but I'm working on being as kind as possible without bringing anger and disbelief to the table.

This agenda goes against all rights of the people and our constitution. Bringing upon discrimination against employers who don't want to get a vaccine. It's our choice and our bodies to do what we feel is right for ourselves not the government. This has gone way to far. It's going to be the governments fault when businesses close down, more families on the streets, and crime rates going up. Just watch! You guys keep pushing a narrative for a virus that has a 99.8 survival rate! There's no point in wearing a mask that don't even work. Now you want people to put an experimental drug into our bodies? It's all about government control. Evil will not win. The truth will surface and it will always prevail!

Written Testimony

I am opposed to Vaccine Mandate for several reasons but first and foremost this is against our Constitutional Rights as American Citizens! It's our body our choice! This Vaccine is an experimental drug trial that I am not comfortable being a part of. I don't respond well to medications and I know many other people with similar issues. It's also a Religious issue due to how it was made and myself and many others are not ok with that. God made our bodies to live in harmony with nature, flus and viruses come and we adapt to nature naturally if we keep our bodies healthy and take care of ourselves mentally and physically. This whole thing is a disgrace scaring and bullying people into taking your damn tests and vaccines it's a Big Pharma Money Making Works take over situation and it's scary how fast you all have turned people into zombie scared sheep. I for one choose not to play in your game and that should be my choice as an American!!! Mahalo for your time

Vaccine mandates for experimental covid shots are against the law in the US.

Mandates create all sorts of problems with HIPAA (medical-privacy) law – in case you care to see the list of ongoing lawsuits that have arisen when people’s HIPAA rights are violated, you can [click here](#).

The opening frame of the Nuremberg Code—written after WWII to make sure no one is ever again forced to participate in medical interventions without their consent—states this:

"The voluntary consent of the human subject is absolutely essential.

Written Testimony

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision."

-Residents have NOT been supplied with sufficient information regarding what protocols will be in place once this passport exists or how it will work. It is the duty of the state, city and all oblique officials and address the concerns of its citizens and offer clarity and long term plan of action regarding said passport.

-The public has never been informed or educated on who is responsible/ liable should there be adverse reaction or death from said mandated vaccinations.

-These passports create further division & discriminate against the countless citizens who cannot receive these shots for health including children or who choose not to for religious or personal reasons. How are our children protected in this?

-How can this even be considered we have seen statistically & scientifically that trying to replace testing & other safety measures with these vaccinations DOES NOT WORK. In fact our State cases rose dramatically immediately when Hawaii stopped requiring testing for those vaccinated arriving to the Islands BECAUSE THEY DO NOT STOP TRANSMISSION. How & why then are we already implementing this?

-How can such mandates be imposed legally or conscientiously when residents have not been provided with long term results of the long-term safety studies, (because there aren't any.) - Clinical Trials for these "vaccines" have not ended and will not end until end of 2022 or sometime in 2023.

-There is large scale unease with concerns of personal safety, that of our children, that of our community which have not been addressed and have in fact been ignored.

-This is another sad reminder that this government continues to put profit before people. Doing this only furthers the distrust of our officials and the systems meant to serve us.

-This is gross abuse of power, control, and profit. The residents of Hawaii deserve better and will NOT STAND for further abuse of our rights, our livelihood, our safety, and our medical sovereignty.

Written Testimony I strongly oppose the digital vaccine passport program. Only harm can come of such a divisive, discriminatory implement. Harm to businesses who will need to exclude clientele and become, in effect, police of the public. Harm to people trying to work and provide for their families. We are a nation of freedom to choose. Vaccine passports will create a nation of discrimination.

I think it is such a travesty that people elected to represent us would go so far as to try to actually suppress individual freedom of choice in such a manner. I believe it's shameful and downright illegal that our government would even consider this. Seriously? I have to show proof of vaccination in order to participate in daily activities? There's obviously a reason why many people are hesitant to take this vaccine, but typical government, you would rather railroad people and bully them into taking it despite their deeply held concerns and beliefs. The governor, mayor, and anyone else supporting this should be deeply ashamed of themselves. This is absolutely despicable.

Written Testimony

I am opposing a vaccine passport for the state of Hawaii the island of Oahu. I represent myself but also the aloha freedom coalition. They are out there fighting for our rights every night and every weekend. there are thousands of people on this island that agree with them and agree with what they are doing and that is to fight against the government controls over our own bodies.

First the masks even though it's annoying it's not putting something into my body, that's where it stops. you cannot mandate something to go into my body and everyone that doesn't go along with it is going to be unemployed or on the fringe of society, that isn't right. that's human rights.

By the way I voted for Rick blangiardi and I hoped that he would do a better job of dealing with these politicians like Ige and Caldwell but all we have seen so far is the same control as California. I oppose a mandatory vaccine mandate because just because the choice to show a test from the last 48 hours isn't much of a choice for all the residents that live here.

do you know how hard it is to go find a test and wait in a three hour line for a Covid test just so that you can go eat at a dinner or a restaurant with your family or a birthday or special occasion. no one is going to go take a test just so that they can go to Dave & Buster's . it's really stupid and I don't know who would do that unless they were a tourist and they already had a test in their hand.

I oppose Resolution 21-194.

Vaccinated individuals can still catch and spread the virus (which has a 99% survival rate in most age groups).

There are no long term studies on these vaccines, and the manufacturers have no liability for injury.

Choosing to be vaccinated should be an informed decision made without fear, coercion or incentives.

Written Testimony As much as we would love to support local restaurants during this time, that's not a good reason to get vaccinated.

(Getting tested every 48 hours is not reasonable or sustainable.)

Already struggling small businesses will suffer, especially in communities with lower percentages of vaccinated individuals, while Costco, Target, Walmart, Home Depot, and many other big retailers do business as usual.

Starting September 13th, the tens of thousands of visitors arriving daily will have more freedom than many local families.

Written Testimony I am incredibly PRO vaccination of any kind. I'm deeply concerned that This resolution would curtail liberties and personal choice on such a broad level. When we enable the limiting of personal autonomy in such important matters, we only set the stage for agency to be further bound in the future.

Reason #1 This passport and any mandates on the community is causing DIVISION, SEGREGATION, DISCRIMINATION. The words of those in leadership that put blame on the unvaccinated is tearing families apart. This is causing more and more harrassment and striping ALOHA from our community, from our people, from families. Please do not approve this.

Reason #2: This will be an economic hit to our local businesses who have survived the first hit. Local people suffer while tourist enjoy their idea of paradise. This will HURT OUR LOCAL BUSINESSES. Please stop hurting us.

I am STRONGLY against vaccine passports. It is 100% an infringement of privacy.
This has become a tyrannical agenda and is robbing people of their freedoms.
Think about it, what vaccine in history have we as a nation ever expected EVERYONE to get and then checked to make sure that they do get or else they're not welcome in our communities.
Most have already received the vaccination. Leave it at that. That stands with all other medical issues that have come up. We should not exclude those who CHOOOOOOOOOSE (hi, freedoms, remember me?) not to get a vaccine. Period.

I do not support vaccine passports here in Hawaii. My whole life growing up we were able to visit friends and family as free people. And because this is a part of our culture it helps bridge the islands. I am Hawaiian however, of all the countries in all the world I am so blessed that it was America that occupied us. We are able to live free under the Constitution and the bill of rights. Please don't take away our Liberty and yet again subject us to unlawful control and mandates. Do not let another injustice happen to the people of Hawaii.

A vaccine mandate and/or passport is unconstitutional and violates my personal rights to medical freedom. The government is not HIPPA compliant. I am a retired EMT serving the Hawaii communities and I refuse to have an experimental genetic therapy injected into me so I can go to a restaurant or to the stores. I have had allergic reactions to 2 vaccines in the past and am genuinely terrified to get the vaccine. My allergist recommends I don't, but if you politicians force me to get it, you will be requiring me to directly go against medical advice from an MD.

Written
Testimony

I strongly oppose RESOLUTION 21-194. It is a doorway for discrimination and persecution. Denying people access to society based on their vaccination status will bring our communities to a level so low, we may never recover. Families, friendships, and communities will suffer as division grows between the vaxxed and the unvaxxed. For the sake of my children and the generations to come, I oppose this initiative that will lead us down a path of social destruction and compromised integrity. This bill is detrimental to humanity and the spirit of compassion that has always thrived in this beautiful place I have called home for all my life. Again, I strongly oppose RESOLUTION 21-194.

Written Testimony

I am a small business owner on Oahu and am in strong opposition of Resolution 21-194. I do not agree with any form of vaccine passport or mandate. I believe in medical freedom and body autonomy. I think a vaccine passport will divide our community, is discriminatory, and is not in the favor of public health or safety. I cannot help but think of pregnant or nursing women who were not a part of vaccine trials, and who should have the choice of what goes into their bodies, without losing their livelihood or getting to participate in society. We are the Aloha State, please do not divide us. Thank you for listening.

I strongly oppose this proposed "Covid health card" based on simple scientific and medical facts. Dr.'s, PhD's and scientists have come out and said that this Vaccination does not ward off Covid-19 or the delta variant that's run rampant and doesn't always lessen the symptoms. It doesn't make any sense to mandate something that needs boosters now because it's simply not working how it was intended to. Also, it's still a trial until at least 2023 and if some CHOOSE to be a part of the trial then that's wonderful for them, but if some CHOOSE not to be a part of the trial and wait and see how this all pans out, that should be their constitutional right. You cannot mandate an experimental drug. It is against the Nuremberg Code of 1947 that was established after WWII. HIPPA is still in place and that states that people have the right to keep their medical records private. That is a law. Getting vaccinated doesn't make you immune to the disease and you can still spread it, so doesn't that defeat the purpose?

Written Testimony You simply cannot mandate the vaccine. Please find the CDC quote against Vaccine Mandate Page 56, 3rd paragraph: <https://www.cdc.gov/vaccines/acip/meetings/downloads/min-archive/min-2020-08-508.pdf>

Vaccines take 7-8 years to test, not 7-8 months. This vaccine is for emergency use only and is not fully tested and approved by the FDA. FDA approved a different similar test that's not available in the USA. They do not know the short and long-term effects of the vax and many people still get sick and die even after taking the vax.

There are many vax injuries reported on VARES. This link is from the CDC website and will show you the vaccine injuries from the covid vax <https://www.openvaers.com/covid-data>

Cases are not deaths. Most people with a positive test have no symptoms. Plus, covid deaths, in the state, are less than the regular flu.

Our main issue started once more and more people started getting vaccinated and when you stop testing all incoming travelers into the state of Hawaii.

Please hear us and do not implement this “health passport”.

I strongly oppose! This is completely against our inalienable rights, life, liberty, and the pursuit of happiness shall not be infringed upon in any way ! Show me your papers is one step closer to something that we as humans in this lifetime decided would never happen again. This is all too close to Nuremberg, and everyone that is in favor of this will have to answer for their part in furthering this overreach, just like they did in 1949. I choose what goes in and on my body as a sovereign being. We the people do not consent!!

Written Testimony

As a Big Island resident, we've seen what shut downs and mandatory restrictions have done to our small businesses, restaurants, hospitality companies, and those indirectly involved with these businesses. Mandating vaccine passport will further destroy more businesses that are currently hanging on. My wife and I have been trying to become pregnant and are currently starting the IVF journey. Because of this, we've chosen not to vaccinate as there has not been enough evidence of what the vaccines can do to mother and/or baby. Creating a vaccine passport will further keep us isolated on an already isolating island. Big island does not have nearly a fraction of restaurants and other options that Maui or Oahu have; and to be told that we wouldn't even be allowed to visit any restaurant or other place of recreation would cause further mental health issues. We do not have the parks or convenient access to outdoor activities as other islands and towns do. We look forward to being able to see a movie every once in a while, or have a nice dinner out and now we're being threatened that this unavailable to us that choose not to be vaccinated. We **STRONGLY** oppose ANY vaccine passport or vaccine requirements to visit a private business.

I am strongly opposed to the vaccine passports because it segregates our communities which is at a minimum discrimination, it goes against the Aloha spirit of supporting one another, and is a form of Totalitarianism. Trampling on our freedom of choice, individual rights to privacy, and our basic constitutional rights. This resolution would only move our Government closer to Socialism which is 180 degrees from what our Founding Fathers envisioned, which is a Government of the people, by the people, and for the people.

I oppose this agenda of Covid digital passports. How will implementing these passports help the spread of covid? Help the people of Hawaii? Help the small business of Hawaii? This is just bad all around! Bad for the human spirit even more the ALOHA SPIRIT that the media, government officials ask of the local people to role model???you want the Aloha Spirit? Then Be the example of theAloha Spirit and your people will follow... Bad for the small business owners who rely on week over week financially. Enough of this segregation you're causing based on a flu that has a 99% survival rate? Killing the economy!! Killing the human spirit, killing our freedoms and liberty? Preventing our kids from growing, going after their dreams etc. I stand against this Agenda that makes no sense at all!

I OPPOSE THE VACCINE PASSPORT / HEALTH PASS / GREEN PASS / SMART HEALTH C. other known names).

As a person who works in the protection of a person's confidential information, I believe this resolution is a breach of an individual's Personal Health Information (PHI) according to HIPAA. To be clear, this Resolution 21-194 breaks the HIPAA Act of 1996.

Citing HIPAA ACT OF 1996 Reference:

The Health Insurance Portability and Accountability Act of 1996 is a United States federal statute enacted by the 104th United States Congress and signed into law by President Bill Clinton on August 21, 1996. The Privacy Rule & Security Rule is subject to be breached.

Written
Testimony

The Health Insurance Portability and Accountability Act of 1996 (HIPAA or the Kennedy-Kassebaum Act[1][2]) is a United States federal statute enacted by the 104th United States Congress and signed by President Bill Clinton on August 21, 1996. It was created primarily to modernize the flow of health information, stipulate how personally identifiable information maintained by the healthcare and health insurance industries should be protected from fraud and theft, and address limitations on healthcare insurance coverage.[3]

The act consists of five titles. Title I of HIPAA protects health insurance coverage for workers and their families when they change or lose their jobs.[4] Title II of HIPAA, known as the Administrative Simplification (AS) provisions, requires the establishment of national standards for electronic health transactions and national identifiers for providers, health insurance plans, and employers.[5] Title III sets guidelines for pre-tax medical spending accounts, Title IV sets guidelines for group health plans, and

governs company-owned life insurance policies.

There are five sections to the act, known as titles.

Title I: Health Care Access, Portability, and Renewability

Title I of HIPAA regulates the availability and breadth of group health plans and certain individual insurance policies. It amended the Employee Retirement Income Security Act, the Public Health Service Act, and the Internal Revenue Code.

Title I requires the coverage of and also limits restrictions that a group health plan can place on benefits for preexisting conditions. Group health plans may refuse to provide benefits in relation to preexisting conditions for either 12 months following enrollment in the plan or 18 months in the case of late enrollment.[6] Title I allows individuals to reduce the exclusion period by the amount of time that they have had "creditable coverage" before enrolling in the plan and after any "significant breaks" in coverage.[7] "Creditable coverage" is defined quite broadly and includes nearly all group and individual health plans, Medicare, and Medicaid.[8] A "significant break" in coverage is defined as any 63-day period without any creditable coverage.[9] Along with an exception, allowing employers to tie premiums or co-payments to tobacco use and body mass index.

Title I[10] also requires insurers to issue policies without exclusion to those leaving group health plans with creditable coverage (see above) exceeding 18 months, and[11] renew individual policies for as long as they are offered or provide alternatives to discontinued plans for as long as the insurer stays in the market without exclusion regardless of health condition.

Some health care plans are exempted from Title I requirements, such as long-term health plans and limited scope plans like dental or vision plans offered separately from the general health plan. However, if such benefits are part of the general health plan, then HIPAA still applies to such benefits. For example, if a plan offers dental benefits, then it must count creditable continuous coverage under the old health plan towards any of its exclusion periods for dental benefits.

An alternate method of calculating creditable continuous coverage is available to the health plan under Title I. That is, 5 categories of health coverage can be considered separately, including dental and vision coverage. Anything not under those 5 categories must use the general calculation (e.g., the beneficiary may be excluded for 18 months of general coverage, but only 6 months of dental coverage, because the beneficiary could not have a general health plan that covered dental until 6 months prior to the application date). Since limited scope coverage plans are exempt from HIPAA requirements, the odd case exists in which the applicant to a new group health plan cannot obtain certificates of creditable continuous coverage for independent limited scope plans, such as dental to apply towards exclusion periods of the new plan that does include those covered by the old plan.

Hidden exclusion periods are not valid under Title I (e.g., "The accident, to be covered, must have occurred while the beneficiary was covered under this exact same health insurance contract"). Such clauses must be acted upon by the health plan. Also, they must be re-written so they can comply with HIPAA. [12]

Title II: Preventing Health Care Fraud and Abuse; Administrative Simplification; Medical Liability

This section needs additional citations for verification. Please help improve this article by adding citations to reliable sources. Unsourced material may be challenged and removed. (April 2010) (Learn how and how to remove this template message)

Title II of HIPAA establishes policies and procedures for maintaining the privacy and the security of individually identifiable health information, outlines numerous offenses relating to health care, and establishes civil and criminal penalties for violations. It also creates several programs to control fraud.

abuse within the health-care system.[13][14][15][16] However, the most significant provisions of Title II are its Administrative Simplification rules. Title II requires the Department of Health and Human Services to increase the efficiency of the health-care system by creating standards for the use and dissemination of health-care information.[16]

These rules apply to "covered entities", as defined by HIPAA and the HHS. Covered entities include health plans, health care clearinghouses (such as billing services and community health information systems), and health care providers that transmit health care data in a way regulated by HIPAA.[17][18]

Per the requirements of Title II, the HHS has promulgated five rules regarding Administrative Simplification: the Privacy Rule, the Transactions and Code Sets Rule, the Security Rule, the Unique Identifiers Rule, and the Enforcement Rule.

Privacy Rule

The HIPAA Privacy Rule is composed of national regulations for the use and disclosure of Protected Health Information (PHI) in healthcare treatment, payment and operations by covered entities.

The effective compliance date of the Privacy Rule was April 14, 2003, with a one-year extension for "small plans". The HIPAA Privacy Rule regulates the use and disclosure of protected health information (PHI) held by "covered entities" (generally, health care clearinghouses, employer-sponsored health plans, health insurers, and medical service providers that engage in certain transactions).[19] By regulation, the HHS extended the HIPAA privacy rule to independent contractors of covered entities who fit within the definition of "business associates".[20] PHI is any information that is held by a covered entity regarding health care, the provision of health care, or health care payment that can be linked to any individual.[17] This is interpreted rather broadly and includes any part of an individual's medical record or payment history. Covered entities must disclose PHI to the individual within 30 days upon request.[21] Also, they must disclose PHI when required to do so by law such as reporting suspected child abuse to state child welfare agencies.[22]

Covered entities may disclose protected health information to law enforcement officials for law enforcement purposes as required by law (including court orders, court-ordered warrants, subpoenas) and administrative requests; or to identify or locate a suspect, a fugitive, a material witness, or a missing person.[23]

A covered entity may disclose PHI to certain parties to facilitate treatment, payment, or health care coordination without a patient's express written authorization.[24] Any other disclosures of PHI require the covered entity to obtain written authorization from the individual for the disclosure.[25] In any case, when a covered entity discloses any PHI, it must make a reasonable effort to disclose only the minimum necessary information required to achieve its purpose.[26]

The Privacy Rule gives individuals the right to request a covered entity to correct any inaccurate PHI. Also, it requires covered entities to take some reasonable steps on ensuring the confidentiality of communications with individuals.[28] For example, an individual can ask to be called at their work number instead of home or cell phone numbers.

The Privacy Rule requires covered entities to notify individuals of uses of their PHI.[29] Covered entities must also keep track of disclosures of PHI and document privacy policies and procedures.[30] They must appoint a Privacy Official and a contact person[31] responsible for receiving complaints and train all members of their workforce in procedures regarding PHI.[32]

An individual who believes that the Privacy Rule is not being upheld can file a complaint with the Department of Health and Human Services Office for Civil Rights (OCR).[33][34] In 2006 the Wall Street Journal reported that the OCR had a long backlog and ignores most complaints. "Complaints of privacy

violations have been piling up at the Department of Health and Human Services. Between April of 2006 and November 2006, the agency fielded 23,886 complaints related to medical-privacy rules, but it has not taken any enforcement actions against hospitals, doctors, insurers or anyone else for rule violations. A spokesman for the agency says it has closed three-quarters of the complaints, typically because it found a violation or after it provided informal guidance to the parties involved." [35] However, in July 2011, the University of California, Los Angeles agreed to pay \$865,500 in a settlement regarding potential HIPAA violations. An HHS Office for Civil Rights investigation showed that from 2005 to 2008, unauthorized employees repeatedly and without legitimate cause looked at the electronic protected health information of numerous UCLAHS patients. [36]

It is a misconception that the Privacy Rule creates a right for any individual to refuse to disclose any information (such as chronic conditions or immunization records) if requested by an employer or business associate. HIPAA Privacy Rule requirements merely place restrictions on disclosure by covered entities and their business associates without the consent of the individual whose records are being requested; they do not place any restrictions upon requesting health information directly from the subject of that information. [37]

2013 Final Omnibus Rule Update

In January 2013, HIPAA was updated via the Final Omnibus Rule. [40] The updates included changes to the Security Rule and Breach Notification portions of the HITECH Act. The most significant changes were the expansion of requirements to include business associates, where only covered entities had originally been held to uphold these sections of the law. [41]

In addition, the definition of "significant harm" to an individual in the analysis of a breach was updated to provide more scrutiny to covered entities with the intent of disclosing breaches that previously were not reported. Previously, an organization needed proof that harm had occurred whereas now organizations must prove that harm had not occurred.

Protection of PHI was changed from indefinite to 50 years after death. More severe penalties for violating PHI privacy requirements were also approved. [42]

The HIPAA Privacy rule may be waived during natural disaster. This was the case with Hurricane Katrina in 2005. [43]

HITECH Act: Privacy Requirements

See the Privacy section of the Health Information Technology for Economic and Clinical Health Act (HITECH Act).

Right to access one's PHI

The Privacy Rule requires medical providers to give individuals access to their PHI. [44] After an individual requests information in writing (typically using the provider's form for this purpose), a provider has 30 days to provide a copy of the information to the individual. An individual may request the information in electronic form or hard-copy, and the provider is obligated to attempt to conform to the requested format. For providers using an electronic health record (EHR) system that is certified using CEHRT (Certified Electronic Health Record Technology) criteria, individuals must be allowed to obtain the PHI in electronic form. Providers are encouraged to provide the information expediently, especially in the case of electronic requests.

Individuals have the right to access all health-related information, including health condition, treatment notes, images, lab results, and billing information. [45] [46] Explicitly excluded are the private psychotherapy notes of a provider, and information gathered by a provider to defend against a lawsuit. [47]

Providers can charge a reasonable amount that relates to their cost of providing the copy, however, it is allowable when providing data electronically from a certified EHR using the "view, download, and transfer" feature which is required for certification. When delivered to the individual in electronic form, the individual may authorize delivery using either encrypted or un-encrypted email, delivery using media drive, CD, etc., which may involve a charge), direct messaging (a secure email technology in common use in the healthcare industry), or possibly other methods. When using un-encrypted email, the individual must understand and accept the risks to privacy using this technology (the information may be intercepted and examined by others). Regardless of delivery technology, a provider must continue to fully secure the information while in their system and can deny the delivery method if it poses additional risk to PHI while in the system.[48]

An individual may also request (in writing) that their PHI is delivered to a designated third party such as a family care provider.

An individual may also request (in writing) that the provider send PHI to a designated service used to store or manage their records, such as a Personal Health Record application. For example, a patient can request in writing that her ob-gyn provider digitally transmit records of her latest pre-natal visit to a pregnancy app that she has on her mobile phone.

Disclosure to relatives

According to their interpretations of HIPAA, hospitals will not reveal information over the phone to the next of kin of admitted patients. This has in some instances impeded the location of missing persons. After the Air France Flight 214 San Francisco crash, some hospitals were reluctant to disclose the identities of patients that they were treating, making it difficult for Asiana and the relatives to locate them.[49] In one instance, a man in Washington state was unable to obtain information about his injured mother.[50]

Janlori Goldman, director of the advocacy group Health Privacy Project, said that some hospitals are "overcautious" and misapplying the law, the Times reports. Suburban Hospital in Bethesda, Md., has interpreted a federal regulation that requires hospitals to allow patients to opt out of being included in the hospital directory as meaning that patients want to be kept out of the directory unless they specifically request otherwise. As a result, if a patient is unconscious or otherwise unable to choose to be included in the directory, relatives and friends might not be able to find them, Goldman said.[51]

Transactions and Code Sets Rule

HIPAA was intended to make the health care system in the United States more efficient by standardizing health care transactions. HIPAA added a new Part C titled "Administrative Simplification" to Title X of the Social Security Act. [52] This is supposed to simplify healthcare transactions by requiring all health care providers to engage in health care transactions in a standardized way.

The HIPAA/EDI (electronic data interchange) provision was scheduled to take effect from October 1, 2000 with a one-year extension for certain "small plans". However, due to widespread confusion and difficulty implementing the rule, CMS granted a one-year extension to all parties.[citation needed] On January 1, 2003, newer versions, ASC X12 005010 and NCPDP D.0 become effective, replacing the previous ASC X12 004010 and NCPDP 5.1 mandate.[53] The ASC X12 005010 version provides a mechanism allowing for the use of ICD-10-CM as well as other improvements.

After July 1, 2005 most medical providers that file electronically had to file their electronic claims using HIPAA standards in order to be paid.[54]

Under HIPAA, HIPAA-covered health plans are now required to use standardized HIPAA electronic transactions. See, 42 USC § 1320d-2 and 45 CFR Part 162. Information about this can be found in the

rule for HIPAA electronic transaction standards (74 Fed. Reg. 3296, published in the Federal Register January 16, 2009), and on the CMS website.[55]

Key EDI (X12) transactions used for HIPAA compliance are:[citation needed]

EDI Health Care Claim Transaction set (837) is used to submit health care claim billing information, encounter information, or both, except for retail pharmacy claims (see EDI Retail Pharmacy Claim Transaction). It can be sent from providers of health care services to payers, either directly or via intermediary billers and claims clearinghouses. It can also be used to transmit health care claims and billing payment information between payers with different payment responsibilities where coordination of benefits is required or between payers and regulatory agencies to monitor the rendering, billing, and/or payment of health services within a specific health care/insurance industry segment.

For example, a state mental health agency may mandate all healthcare claims. Providers and health care trade professional (medical) health care claims electronically must use the 837 Health Care Claim: Professional standard to send in claims. As there are many different business applications for the Health Care Claim, there can be slight derivations to cover off claims involving unique claims such as for institutional professionals, chiropractors, and dentists etc.

EDI Retail Pharmacy Claim Transaction (NCPDP Telecommunications Standard version 5.1) is used to submit retail pharmacy claims to payers by health care professionals who dispense medications, either directly or via intermediary billers and claims clearinghouses. It can also be used to transmit claims for pharmacy services and billing payment information between payers with different payment responsibilities where coordination of benefits is required or between payers and regulatory agencies to monitor the rendering, billing, and/or payment of retail pharmacy services within the pharmacy health care/insurance industry segment.

EDI Health Care Claim Payment/Advice Transaction Set (835) can be used to make a payment, send an Explanation of Benefits (EOB), send an Explanation of Payments (EOP) remittance advice, or make a payment and send an EOP remittance advice only from a health insurer to a health care provider either directly or via a financial institution.

EDI Benefit Enrollment and Maintenance Set (834) can be used by employers, unions, government associations or insurance agencies to enroll members to a payer. The payer is a healthcare organization that pays claims, administers insurance or benefit or product. Examples of payers include an insurance company, healthcare professional (HMO), preferred provider organization (PPO), government agency (Medicaid/Medicare etc.) or any organization that may be contracted by one of these former groups.

EDI Payroll Deducted and another group Premium Payment for Insurance Products (820) is a transaction for making a premium payment for insurance products. It can be used to order a financial institution to make a payment to a payee.

EDI Health Care Eligibility/Benefit Inquiry (270) is used to inquire about the health care benefits and eligibility associated with a subscriber or dependent.

EDI Health Care Eligibility/Benefit Response (271) is used to respond to a request inquiry about the health care benefits and eligibility associated with a subscriber or dependent.

EDI Health Care Claim Status Request (276) This transaction set can be used by a provider, recipient of health care products or services or their authorized agent to request the status of a health care claim.

EDI Health Care Claim Status Notification (277) This transaction set can be used by a healthcare provider or authorized agent to notify a provider, recipient or authorized agent regarding the status of a health care claim or encounter, or to request additional information from the provider regarding a health care claim or encounter. This transaction set is not intended to replace the Health Care Claim Payment/Advice Transaction Set (835) and therefore, is not used for account payment posting. The notification is at a summary or line detail level. The notification may be solicited or unsolicited.

EDI Health Care Service Review Information (278) This transaction set can be used to transmit health care service information, such as subscriber, patient, demographic, diagnosis or treatment data for the purpose of the request for review, certification, notification or reporting the outcome of a health care services review.

EDI Functional Acknowledgement Transaction Set (997) this transaction set can be used to define transaction structures for a set of acknowledgments to indicate the results of the syntactical analysis of the electronically encoded documents. Although it is not specifically named in the HIPAA Legislation or Final Rule, it is necessary for X12 transaction set processing. The encoded documents are the transaction sets, which are grouped in functional groups, used in defining transactions for business data interchange. This standard does not cover the semantic meaning of the information encoded in the transaction sets.

Brief 5010 Transactions and Code Sets Rules Update Summary

Transaction Set (997) will be replaced by Transaction Set (999) "acknowledgment report".

The size of many fields {segment elements} will be expanded, causing a need for all IT providers to update corresponding fields, element, files, GUI, paper media, and databases.

Some segments have been removed from existing Transaction Sets.

Many segments have been added to existing Transaction Sets allowing greater tracking and reporting of services and patient encounters.

Capacity to use both "International Classification of Diseases" versions 9 (ICD-9) and 10 (ICD-10-CM) has been added.[56][57]

Security Rule

The Final Rule on Security Standards was issued on February 20, 2003. It took effect on April 21, 2005, with a compliance date of April 21, 2005, for most covered entities and April 21, 2006, for "small plans". [58] The Security Rule complements the Privacy Rule. While the Privacy Rule pertains to all Protected Health Information (PHI) including paper and electronic, the Security Rule deals specifically with Electronic Protected Health Information (EPHI). It lays out three types of security safeguards required for covered entities: administrative, physical, and technical.[58] For each of these types, the Rule identifies various security standards, and for each standard, it names both required and addressable implementation specifications. Required specifications must be adopted and administered as dictated by the Rule. Addressable specifications are more flexible. Individual covered entities can evaluate their own situation and determine the best way to implement addressable specifications. Some privacy advocates have argued that this "flexibility" may provide too much latitude to covered entities.[59] Software tools have been developed to assist covered entities with risk analysis and remediation tracking. The standards and specifications are as follows:

Administrative Safeguards – policies and procedures designed to clearly show how the entity will comply with the act

Covered entities (entities that must comply with HIPAA requirements) must adopt a written set of policies and procedures and designate a privacy officer to be responsible for developing and implementing all required policies and procedures.

The policies and procedures must reference management oversight and organizational buy-in to comply with the documented security controls.

Procedures should clearly identify employees or classes of employees who have access to electronic health information (E PHI). Access to E PHI must be restricted to only those employees who have a r to complete their job function.

The procedures must address access authorization, establishment, modification, and termination. Entities must show that an appropriate ongoing training program regarding the handling of PHI is pr employees performing health plan administrative functions.

Covered entities that out-source some of their business processes to a third party must ensure that th vendors also have a framework in place to comply with HIPAA requirements. Companies typically assurance through clauses in the contracts stating that the vendor will meet the same data protection requirements that apply to the covered entity. Care must be taken to determine if the vendor further sources any data handling functions to other vendors and monitor whether appropriate contracts and are in place.

A contingency plan should be in place for responding to emergencies. Covered entities are responsib backing up their data and having disaster recovery procedures in place. The plan should document d priority and failure analysis, testing activities, and change control procedures.

Internal audits play a key role in HIPAA compliance by reviewing operations with the goal of identi potential security violations. Policies and procedures should specifically document the scope, freque procedures of audits. Audits should be both routine and event-based.

Procedures should document instructions for addressing and responding to security breaches that are identified either during the audit or the normal course of operations.

Physical Safeguards – controlling physical access to protect against inappropriate access to protected Controls must govern the introduction and removal of hardware and software from the network. (WI equipment is retired it must be disposed of properly to ensure that PHI is not compromised.)

Access to equipment containing health information should be carefully controlled and monitored.

Access to hardware and software must be limited to properly authorized individuals.

Required access controls consist of facility security plans, maintenance records, and visitor sign-in a escorts.

Policies are required to address proper workstation use. Workstations should be removed from high areas and monitor screens should not be in direct view of the public.

If the covered entities utilize contractors or agents, they too must be fully trained on their physical ac responsibilities.

Technical Safeguards – controlling access to computer systems and enabling covered entities to prot communications containing PHI transmitted electronically over open networks from being intercept anyone other than the intended recipient.

Information systems housing PHI must be protected from intrusion. When information flows over o networks, some form of encryption must be utilized. If closed systems/networks are utilized, existi controls are considered sufficient and encryption is optional.

Each covered entity is responsible for ensuring that the data within its systems has not been changed in an unauthorized manner.

Data corroboration, including the use of a checksum, double-keying, message authentication, and dig signature may be used to ensure data integrity.

Covered entities must also authenticate entities with which they communicate. Authentication consis

corroborating that an entity is who it claims to be. Examples of corroboration include password systems or three-way handshakes, telephone callback, and token systems.

Covered entities must make documentation of their HIPAA practices available to the government to determine compliance.

In addition to policies and procedures and access records, information technology documentation should include a written record of all configuration settings on the components of the network because these components are complex, configurable, and always changing.

Documented risk analysis and risk management programs are required. Covered entities must carefully consider the risks of their operations as they implement systems to comply with the act. (The requirement for risk analysis and risk management implies that the act's security requirements are a minimum standard that places responsibility on covered entities to take all reasonable precautions necessary to prevent PHI from being used for non-health purposes.)

Unique Identifiers Rule (National Provider Identifier): HIPAA covered entities such as providers conducting electronic transactions, healthcare clearinghouses, and large health plans must use only the National Provider Identifier (NPI) to identify covered healthcare providers in standard transactions by May 23, 2007. Small health plans must use only the NPI by May 23, 2008. Effective from May 2006 (May 2007 for small health plans), all covered entities using electronic communications (e.g., physicians, hospitals, health insurance companies, and so forth) must use a single new NPI. The NPI replaces all other identifiers used by health plans, Medicare, Medicaid, and other government programs.[60] However, the NPI does not replace a provider's DEA number, state license number, or tax identification number. The NPI is 10 digits (mostly alphanumeric), with the last digit being a checksum. The NPI cannot contain any embedded intelligence or other words; the NPI is simply a number that does not itself have any additional meaning. The NPI is unique and national, never re-used, and except for institutions, a provider usually can have only one. An institution may obtain multiple NPIs for different "sub-parts" such as a free-standing cancer center or rehab facility.

Enforcement Rule: On February 16, 2006, HHS issued the Final Rule regarding HIPAA enforcement. The rule became effective on March 16, 2006. The Enforcement Rule sets civil money penalties for violating HIPAA rules and establishes procedures for investigations and hearings for HIPAA violations. For many years, there were few prosecutions for violations.[61]

This may have changed with the fining of \$50,000 to the Hospice of North Idaho (HONI) as the first entity to be fined for a potential HIPAA Security Rule breach affecting fewer than 500 people. Rachel Seeger, spokeswoman for HHS, stated, "HONI did not conduct an accurate and thorough risk analysis to the confidentiality of ePHI [electronic Protected Health Information] as part of its security management from 2005 through Jan. 17, 2012." This investigation was initiated with the theft from an employee of an unencrypted laptop containing 441 patient records.[62]

Wikisource has original text related to this article:

American Recovery and Reinvestment Act of 2009/Division A/Title XIII/Subtitle D

As of March 2013, the U.S. Dept. of Health and Human Services (HHS) has investigated over 19,300 cases that have been resolved by requiring changes in privacy practice or by corrective action. If noncompliance is determined by HHS, entities must apply corrective measures. Complaints have been investigated against many different types of businesses such as national pharmacy chains, major health care centers, insurance groups, hospital chains and other small providers. There were 9,146 cases where the HHS investigation determined that HIPAA was followed correctly. There were 44,118 cases that HHS did not find eligible for enforcement; for example, a violation that started before HIPAA started; cases withdrawn by the provider; or an activity that does not actually violate the Rules. According to the HHS website,[63] the following

issues that have been reported according to frequency:

Misuse and disclosures of PHI

No protection in place of health information

Patient unable to access their health information

Using or disclosing more than the minimum necessary protected health information

No safeguards of electronic protected health information.

The most common entities required to take corrective action to be in voluntary compliance according are listed by frequency:[63]

Private Practices

Hospitals

Outpatient Facilities

Group plans such as insurance groups

Pharmacies

Title III: Tax-related health provisions governing medical savings accounts: Title III standardizes the that may be saved per person in a pre-tax medical savings account. Beginning in 1997, medical savings account ("MSA") are available to employees covered under an employer-sponsored high deductible small employer and self-employed individuals.

Title IV: Application and enforcement of group health insurance requirements: Title IV specifies coverage for group health plans regarding coverage of persons with pre-existing conditions, and modifies continuation of coverage requirements. It also clarifies continuation coverage requirements and includes COBRA clarification.

Title V: Revenue offset governing tax deductions for employers: Title V includes provisions related company-owned life insurance for employers providing company-owned life insurance premiums, the tax-deduction of interest on life insurance loans, company endowments, or contracts related to the company. It also repeals the financial institution rule to interest allocation rules. Finally, it amends provisions of law relating to people who give up United States citizenship or permanent residence, expanding the expatriation tax to be assessed against those deemed to be giving up their U.S. status for tax reasons, making ex-citizens' names part of the public record through the creation of the Quarterly Publication Individuals Who Have Chosen to Expatriate.[64]

Effects on research and clinical care: The enactment of the Privacy and Security Rules has caused many changes in the way physicians and medical centers operate. The complex legalities and potentially steep penalties associated with HIPAA, as well as the increase in paperwork and the cost of its implementation, were causes for concern among physicians and medical centers. An August 2006 article in the *Journal of Internal Medicine* detailed some such concerns over the implementation and effects of HIPAA.[65]

Effects on research: HIPAA restrictions on researchers have affected their ability to perform retrospective chart-based research as well as their ability to prospectively evaluate patients by contacting them for follow-up. A study from the University of Michigan demonstrated that implementation of the HIPAA Privacy Rule resulted in a drop from 96% to 34% in the proportion of follow-up surveys completed by study patients followed after a heart attack.[66] Another study, detailing the effects of HIPAA on recruitment for a cancer prevention, demonstrated that HIPAA-mandated changes led to a 73% decrease in patient accrual, a tripling of time spent recruiting patients, and a tripling of mean recruitment costs.[67]

In addition, informed consent forms for research studies now are required to include extensive detail about the participant's protected health information will be kept private. While such information is important

addition of a lengthy, legalistic section on privacy may make these already complex documents even user-friendly for patients who are asked to read and sign them.

These data suggest that the HIPAA privacy rule, as currently implemented, may be having negative impacts on the cost and quality of medical research. Dr. Kim Eagle, professor of internal medicine at the University of Michigan, was quoted in the Annals article as saying, "Privacy is important, but research is also important in improving care. We hope that we will figure this out and do it right." [65]

Effects on clinical care: The complexity of HIPAA, combined with potentially stiff penalties for violations, may lead physicians and medical centers to withhold information from those who may have a right to it. A report of the implementation of the HIPAA Privacy Rule by the U.S. Government Accountability Office found that health care providers were "uncertain about their legal privacy responsibilities and often responded with an overly guarded approach to disclosing information ... more than necessary to ensure compliance with the HIPAA rule". [65] Reports of this uncertainty continue. [68]

Costs of implementation: In the period immediately prior to the enactment of the HIPAA Privacy and Security Acts, medical centers and medical practices were charged with getting "into compliance". With the early emphasis on the potentially severe penalties associated with violation, many practices and centers turned to private, for-profit "HIPAA consultants" who were intimately familiar with the details of the legislation and offered their services to ensure that physicians and medical centers were fully "in compliance". In addition to the costs of developing and revamping systems and practices, the increase in paperwork and staff time necessary to meet the legal requirements of HIPAA may impact the finances of medical centers and practices at a time when insurance companies' and Medicare reimbursement is also declining. [citation needed]

Education and training: Education and training of healthcare providers is a significant requirement for implementation of the HIPAA Privacy and Security Acts. Effective training must describe the statutory and regulatory background and purpose of HIPAA and a general summary of the principles and key provisions of the Privacy Rule. [citation needed] Although each HIPAA training course should be tailored towards the needs of employees attending the course, there are some vital elements that should be included: [69] [according to whom?]

What is HIPAA? Why HIPAA is important?

HIPAA Definitions; Patient's rights; HIPAA Privacy Rule; Disclosures of PHI; Breach Notifications; HIPAA Agreements

HIPAA Security Rule; Safeguarding ePHI; Potential Violations; Employee Sanctions

HIPAA acronym: Although the acronym HIPAA matches the title of the 1996 Public Law 104-191, the Privacy, Insurance Portability and Accountability Act, HIPAA is sometimes incorrectly referred to as "Health Information Privacy and Portability Act (HIPPA)". [70] [71]

Violations

HIPAA Chart illustrating HIPAA violations by Type

A breakdown of the HIPAA violations that resulted in the illegal exposure of personal information. According to the US Department of Health and Human Services Office for Civil Rights, between April and January 2013, it received 91,000 complaints of HIPAA violations, in which 22,000 led to enforcement actions of varying kinds (from settlements to fines) and 521 led to referrals to the US Department of Justice for criminal actions. [72] Examples of significant breaches of protected information and other HIPAA violations include:

The largest loss of data that affected 4.9 million people by Tricare Management of Virginia in 2011 [73] The largest fines of \$5.5 million levied against Memorial Healthcare Systems in 2017 for accessing

confidential information of 115,143 patients [74] and of \$4.3 million levied against Cignet Health of Maryland in 2010 for ignoring patients' requests to obtain copies of their own records and repeated inquiries of federal officials' inquiries[75] The first criminal indictment was lodged in 2011 against a Virginia physician who shared information with a patient's employer "under the false pretenses that the patient posed a serious and imminent threat to the safety of the public, when in fact he knew that the patient was not a threat." [76] According to Koczkodaj et al., 2018,[77] the total number of individuals affected since 2009 is 173,398,820.

The differences between civil and criminal penalties are summarized in the following table:
Type of Violation: CIVIL Penalty (min) - CIVIL Penalty (max): Individual did not know (and by exercising reasonable diligence would not have known) that he/she violated HIPAA
\$100 per violation, with an annual maximum of \$25,000 for repeat violations
\$50,000 per violation, with an annual maximum of \$1.5 million

HIPAA violation due to reasonable cause and not due to willful neglect
\$1,000 per violation, with an annual maximum of \$100,000 for repeat violations
\$50,000 per violation, with an annual maximum of \$1.5 million

HIPAA violation due to willful neglect but violation is corrected within the required time period
\$10,000 per violation, with an annual maximum of \$250,000 for repeat violations
\$50,000 per violation, with an annual maximum of \$1.5 million

HIPAA violation is due to willful neglect and is not corrected
\$50,000 per violation, with an annual maximum of \$1,000,000
\$50,000 per violation, with an annual maximum of \$1.5 million

Type of Violation

CRIMINAL Penalty- Covered entities and specified individuals who "knowingly" obtain or disclose individually identifiable health information: A fine of up to \$50,000 Imprisonment up to 1 year

Offenses committed under false pretenses: A fine of up to \$100,000 Imprisonment up to 5 years

Offenses committed with the intent to sell, transfer, or use individually identifiable health information for commercial advantage, personal gain or malicious harm: A fine of up to \$250,000 Imprisonment up to 5 years

Written Testimony

Early this year I joined a study on monoclonal antibody therapy for COVID. The protocol called for early diagnosis, early ambulatory treatment with a one-time IV infusion of monoclonal antibodies. The goal of treatment was to keep us out of the hospital and off a ventilator.

I was accepted for the study because they needed people like me, over 65 with co-morbidities which in my case included diabetes and obesity. The caveat? No vaccine. Instead, if I get COVID I follow the early diagnosis, prompt treatment and infusion therapy protocol to stay out of the hospital. This was not a decision I took lightly. Like all the unvaccinated I was vilified unrelentingly from all sides in all mediums from people who didn't know me or the reasons for my choice.

Mandates compel, vaccine passports discriminate, and both divide the body politic. There is no reason to punish and separate us. That is what I find distressing, the very people we elected to bring us together have chosen the easy way out and are setting us apart. There are so many good reasons for people to make the choices they've made and so many ways to bring us together to fight this scourge instead of punitive separation.

Like me there are many out there who have good reasons for their choice. I know many parents with children who practice "ai pono," eating right: putting healthy things into their bodies and the bodies of their children. They carefully question and consider the medications they allow in their bodies because they are health conscious. They ask their primary care physicians detailed, thoughtful questions. Yes, they are different from many of us who were raised to say, "yes doctor".

They are not against vaccines. They know that there is still so much to learn about the virus and its variants and the evolving efficacy and safety of the vaccines in the long term. There is no data on efficacy and safety in the long term, data which will have an impact on their children. They with great deliberation and intent have decided to be prudent and wait for

further developments.

I am astounded that we hear no mention of monoclonal antibody therapy that keeps people with Covid out of the hospital. Because of the success of the studies the U.S. has stockpiled millions of doses of these antibodies. When I enrolled in the study there were under 100 doses in the state and less than 70 on Oahu. I hear nothing of this from my leaders.

For the vaccinated and unvaccinated who get Covid, I am stunned that we seem to have taken no steps to treat people early and keep them out of the hospital. Didn't you ever hear your mother say, "nip it in the bud". We should listen to our moms and treat the infection more aggressively at home and keep people out of the hospital.

Unlike many countries no ambulatory protocols to treat COVID19 at home have been officially developed in the U.S. since the pandemic began. Encourage and take away roadblocks to Hawaii's physicians so they start treating patients at home using their clinical skills and their drive to heal and treat illness. Get them into the fight. "A guide to home based COVID treatment from the Association of American Physicians and Surgeons" and other protocols are already available to treat people early and keep them out of the hospital. Using home care kits and instructions like many countries do plus early treatment by PCPs will not only keep people out of the hospital but reduce, fear, anxiety, isolation and depression.

Anything is better than what we have been advised to do since the pandemic started: stay home, use over the counter medications, drink plenty of water, get plenty of fresh air and if you have difficulty breathing and feel pain in your chest go to the hospital.

There is so much we can do together without resorting to the ugliness of separating the body politic.

Aloha,

Written
Testimony

I Coral Schiller, strongly appose this resolution to make vaccination mandatory on small businesses and patrons. There is not enough science to show this is even a safe resolution. The Vaers website which is a government website shows far too much adverse effects/deaths due to this brand new vaccine which is using every person it injects as a test subject. I feel far less safe knowing that everyone in an establishment is vaccinated and feel they are "safe", however are still able to spread this virus. I know more friends and family that have gotten COVID post vaccine then friends and family who have contracted the virus with out having received the vaccine. There is simply not enough data on anything to make a drastic decision on a persons health for them. This is completely not an American way. We live in a country of the FREE, not a dictatorship. I will fight for mine and every Americans freedom! Mahalo for listening.

I strongly oppose any legislation that proposes vaccine passports. We don't live in a communist country or in Nazi Germany. Passports are another way of subverting people. As far as I can remember, Hawaii is still a part of the United States of America.

Written Testimony If people don't want to take the vaccine, that is their choice. Correct me if I'm wrong, but being a vaccinated person myself, I can still transmit the this virus the same as an unvaccinated person. Vaccinations don't protect anybody but myself.

Vaccine passports will just divide our community.

And what about people who are immune, why should they be forced to get vaccinated?

This is absolutely unconstitutional and a direct violation of our human rights (HIPPA). This cannot be forced upon the people of Hawaii! This is supposed to be America the land of the FREE! Not a communistic dictatorship!! And that is exactly what this resolution is leading to. Frankly I am appalled at how far this charade has gone and the people of Hawaii won't stand for it!! Governor Ige along with many of our legislators need to make a huge shift in their decision makings related to COVID-19 and start doing the real research themselves. Actually stand up for the people and not the pharmaceutical giants with their big pockets! Mahalo

Agenda Item COVID Vaccine Passports and pre-Travel Testing
Your position on the matter Oppose
Representing Self
Organization

The idea that nearly two years after the pandemic began, and with billions of dollars in federal aid provided to the state, that any elected official or bureaucrat would entertain pre-travel COVID-19 testing, regardless of vaccination status, and the overtly racist and coercive use of a vaccine passport to be a part of regular society is simply abhorrent. What did you do with all that money and time?

Written
Testimony

We know that our minority diasporas of Polynesian and certain Asian demographics are the least vaccinated of any groups on our islands. Yet you are choosing to segregate and discriminate against them, those with religious and medical reasons, and those that have weighed liberty against risk simply because they didn't take the jab. In essence, you are making the jab mandatory by exclusion or, more simply, coercion. There is little doubt that this can be viewed as a Nuremberg violation which states that no person should be subjected to any medical experiment. So unless you intend to honor only those with the exceedingly quickly approved Pfizer vaccine, I would argue any other vaccine is still in the experimental phase and getting one of those shots in order to be a part of society, e.g. being coerced, would be a violation:

"...without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision."

But why stop there? Since we know STDs are often passed by drunk people who lose their inhibitions through alcohol, and with Hawaii being known as a place where singles come to party and hook up, why not expand the pre-travel testing requirement for STDs? Herpes, which is very transmissible with nearly 1 out of 4 being a carrier of some form, is extremely endemic and yet preventable. Perhaps we should also have patrons and employees of bars,

night clubs, and even gyms show proof of Gardasil vaccination.

Also, I think travelers from certain countries and states should have to take a TB test before arriving as well. TB infects nearly 10 million a year; TB is highly transmissible with over 1.5 million deaths per annum. Though, to be fair, just like COVID 19, if TB is treated properly, the disease is generally easy to overcome.

Do you see where this kind of idiocy is headed? 15 months ago no one thought we we have to show our papers to travel and to patronize any public or commercial establishment. Seems the conspiracy theorists were correct in their slippery slope argument.

Not Pono.

Pana O Hawaii Sand Volleyball Club

Written Testimony

I am a teacher and a volleyball coach. I believe each person has the right, as written in the Constitution of the United States, to make a choice of what they put into their bodies. There is no absolute scientific proof that this "shot" has any validity toward immunity of any kind. In fact, it's been proven to be a false narrative and it's harmful to the human body. I will not put it into my body, being a physical education major, professional athlete and coach. I have been a role model for many years and teach things that are right and good. Truth and love is what I teach. My children, athletes and parents deserve respect. They also deserve to have their Constitutional Rights held in place. There is so much more to say, but I'm working on being as kind as possible without bringing anger and disbelief to the table.

This agenda goes against all rights of the people and our constitution. Bringing upon discrimination against employers who don't want to get a vaccine. It's our choice and our bodies to do what we feel is right for ourselves not the government. This has gone way to far. It's going to be the governments fault when businesses close down, more families on the streets, and crime rates going up. Just watch! You guys keep pushing a narrative for a virus that has a 99.8 survival rate! There's no point in wearing a mask that don't even work. Now you want people to put an experimental drug into our bodies? It's all about government control. Evil will not win. The truth will surface and it will always prevail!

Written Testimony

I am opposed to Vaccine Mandate for several reasons but first and foremost this is against our Constitutional Rights as American Citizens! It's our body our choice! This Vaccine is an experimental drug trial that I am not comfortable being a part of. I don't respond well to medications and I know many other people with similar issues. It's also a Religious issue due to how it was made and myself and many others are not ok with that. God made our bodies to live in harmony with nature, flus and viruses come and we adapt to nature naturally if we keep our bodies healthy and take care of ourselves mentally and physically. This whole thing is a disgrace scaring and bullying people into taking your damn tests and vaccines it's a Big Pharma Money Making Works take over situation and it's scary how fast you all have turned people into zombie scared sheep. I for one choose not to play in your game and that should be my choice as an American!!! Mahalo for your time

Vaccine mandates for experimental covid shots are against the law in the US.

Mandates create all sorts of problems with HIPAA (medical-privacy) law – in case you care to see the list of ongoing lawsuits that have arisen when people’s HIPAA rights are violated, you can [click here](#).

The opening frame of the Nuremberg Code—written after WWII to make sure no one is ever again forced to participate in medical interventions without their consent—states this:

"The voluntary consent of the human subject is absolutely essential.

Written Testimony

This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision."

-Residents have NOT been supplied with sufficient information regarding what protocols will be in place once this passport exists or how it will work. It is the duty of the state, city and all oblique officials and address the concerns of its citizens and offer clarity and long term plan of action regarding said passport.

-The public has never been informed or educated on who is responsible/ liable should there be adverse reaction or death from said mandated vaccinations.

-These passports create further division & discriminate against the countless citizens who cannot receive these shots for health including children or who choose not to for religious or personal reasons. How are our children protected in this?

-How can this even be considered we have seen statistically & scientifically that trying to replace testing & other safety measures with these vaccinations DOES NOT WORK. In fact our State cases rose dramatically immediately when Hawaii stopped requiring testing for those vaccinated arriving to the Islands BECAUSE THEY DO NOT STOP TRANSMISSION. How & why then are we already implementing this?

-How can such mandates be imposed legally or conscientiously when residents have not been provided with long term results of the long-term safety studies, (because there aren't any.) - Clinical Trials for these "vaccines" have not ended and will not end until end of 2022 or sometime in 2023.

-There is large scale unease with concerns of personal safety, that of our children, that of our community which have not been addressed and have in fact been ignored.

-This is another sad reminder that this government continues to put profit before people. Doing this only furthers the distrust of our officials and the systems meant to serve us.

-This is gross abuse of power, control, and profit. The residents of Hawaii deserve better and will NOT STAND for further abuse of our rights, our livelihood, our safety, and our medical sovereignty.

Written Testimony I strongly oppose the digital vaccine passport program. Only harm can come of such a divisive, discriminatory implement. Harm to businesses who will need to exclude clientele and become, in effect, police of the public. Harm to people trying to work and provide for their families. We are a nation of freedom to choose. Vaccine passports will create a nation of discrimination.

I think it is such a travesty that people elected to represent us would go so far as to try to actually suppress individual freedom of choice in such a manner. I believe it's shameful and downright illegal that our government would even consider this. Seriously? I have to show proof of vaccination in order to participate in daily activities? There's obviously a reason why many people are hesitant to take this vaccine, but typical government, you would rather railroad people and bully them into taking it despite their deeply held concerns and beliefs. The governor, mayor, and anyone else supporting this should be deeply ashamed of themselves. This is absolutely despicable.

Written Testimony

I am opposing a vaccine passport for the state of Hawaii the island of Oahu. I represent myself but also the aloha freedom coalition. They are out there fighting for our rights every night and every weekend. there are thousands of people on this island that agree with them and agree with what they are doing and that is to fight against the government controls over our own bodies.

First the masks even though it's annoying it's not putting something into my body, that's where it stops. you cannot mandate something to go into my body and everyone that doesn't go along with it is going to be unemployed or on the fringe of society, that isn't right. that's human rights.

By the way I voted for Rick blangiardi and I hoped that he would do a better job of dealing with these politicians like Ige and Caldwell but all we have seen so far is the same control as California. I oppose a mandatory vaccine mandate because just because the choice to show a test from the last 48 hours isn't much of a choice for all the residents that live here.

do you know how hard it is to go find a test and wait in a three hour line for a Covid test just so that you can go eat at a dinner or a restaurant with your family or a birthday or special occasion. no one is going to go take a test just so that they can go to Dave & Buster's . it's really stupid and I don't know who would do that unless they were a tourist and they already had a test in their hand.

I oppose Resolution 21-194.

Vaccinated individuals can still catch and spread the virus (which has a 99% survival rate in most age groups).

There are no long term studies on these vaccines, and the manufacturers have no liability for injury.

Choosing to be vaccinated should be an informed decision made without fear, coercion or incentives.

Written Testimony As much as we would love to support local restaurants during this time, that's not a good reason to get vaccinated.

(Getting tested every 48 hours is not reasonable or sustainable.)

Already struggling small businesses will suffer, especially in communities with lower percentages of vaccinated individuals, while Costco, Target, Walmart, Home Depot, and many other big retailers do business as usual.

Starting September 13th, the tens of thousands of visitors arriving daily will have more freedom than many local families.

I am incredibly PRO vaccination of any kind. I'm deeply concerned that This resolution would curtail liberties and personal choice on such a broad level. When we enable the limiting of personal autonomy in such important matters, we only set the stage for agency to be further bound in the future.

Reason #1 This passport and any mandates on the community is causing DIVISION, SEGREGATION, DISCRIMINATION. The words of those in leadership that put blame on the unvaccinated is tearing families apart. This is causing more and more harrassment and striping ALOHA from our community, from our people, from families. Please do not approve this.

Reason #2: This will be an economic hit to our local businesses who have survived the first hit. Local people suffer while tourist enjoy their idea of paradise. This will HURT OUR LOCAL BUSINESSES. Please stop hurting us.

I am STRONGLY against vaccine passports. It is 100% an infringement of privacy.
This has become a tyrannical agenda and is robbing people of their freedoms.
Think about it, what vaccine in history have we as a nation ever expected EVERYONE to get and then checked to make sure that they do get or else they're not welcome in our communities.
Most have already received the vaccination. Leave it at that. That stands with all other medical issues that have come up. We should not exclude those who CHOOOOOOOOOSE (hi, freedoms, remember me?) not to get a vaccine. Period.

Written Testimony

I do not support vaccine passports here in Hawaii. My whole life growing up we were able to visit friends and family as free people. And because this is a part of our culture it helps bridge the islands. I am Hawaiian however, of all the countries in all the world I am so blessed that it was America that occupied us. We are able to live free under the Constitution and the bill of rights. Please don't take away our Liberty and yet again subject us to unlawful control and mandates. Do not let another injustice happen to the people of Hawaii.

A vaccine mandate and/or passport is unconstitutional and violates my personal rights to medical freedom. The government is not HIPPA compliant. I am a retired EMT serving the Hawaii communities and I refuse to have an experimental genetic therapy injected into me so I can go to a restaurant or to the stores. I have had allergic reactions to 2 vaccines in the past and am genuinely terrified to get the vaccine. My allergist recommends I don't, but if you politicians force me to get it, you will be requiring me to directly go against medical advice from an MD.

As a history teacher for 10 years, I have never seen a more relevant example of the government infringing on the rights of its people. You should be ashamed; those that would give up essential freedoms for temporary safety, deserve neither. We are quick to support my body my choice, but under the guise of public safety, you would suggest trampling over our basic civil rights for momentary relief. This mentality and thought process has no place in the United States. Our founding fathers would be in awe of such ignorance.

I am a vaccinated person, but very strongly opposed to this bill. It is chilling and abhorrent to me that we are giving fear a chance to destroy the freedom so many brave souls have fought and died for. Prior to Covid, I knew that a pathogen had the potential to devastate the world, but I never would have imagined that it might happen because we caved to misguided fear fueled by biased media and politics. I implore you to have courage and not to go down this slippery slope.

I strongly oppose the vaccine passport. This is unconstitutional, it rips away our freedom and rights. It rips away HIPAA law, how is it even possible that we forcefully have show what is our personal medical information to just enter a store. It makes no sense!! It is all our personal right and law if we want to share if we are vaccinated or not, it's HIPAA!! You are forcefully giving us options that you know is the worst ultimatum, where getting the vaccine is the easy way out just to enjoy our lives rather than weekly testes. Why should we be mandated to these options? There are other options but you follow where the money is at so you can fulfill your own pockets as we Hawaiians are left to rot. I oppose mandated vaccine passports!

I STRONGLY oppose Health passes as it has been proven, via Israel, they do little good. Breakout infections occur with the vaccinated. You're basically creating a ticking time bomb for the "healthy."

That plus it completely goes against our constitutional rights and is rather segregationary.

Written Testimony This is taking away our rights as written in the constitution. This is unjust and portrays discrimination amongst any person who lawfully chooses to not be forced into getting the vaccine. This is not the 'pono' way. Additionally, a halt on tourism should be heavily considered first before penalizing residents.

I am in strong opposition to this resolution. There's is currently not nearly enough data that proves these current EUA vaccines are safe. These are the first of their kind to be administered to the public. Clinical trials are ongoing and nowhere near completed. Vaccines normally take 7-10 years to be studied and rolled out to the public. This is a bill displaying gross negligence in lacking enough scientific data to prove these are safe. As vaccination rates have increased so have cases. Again, I am in strong opposition to this.

Written Testimony

I work in the restaurant industry. You think a vaccine passport is good for the economy? NO it's NOT. We are still trying to recover from last year and this will make things difficult. First this is discrimination against the vaxxed and unvaxxed. Why do the vaxxed get privileges and can work or freely enter into establishments when they can also get and spread Covid?! They should be required to get weekly testing too then.... It's not just unvaxxed that can spread Covid. This doesn't make sense. Also, the weekly tracking will be a nightmare. The entrance of the restaurant will need a 'bouncer' to check the passport and turn away angry guests if they don't have one. Again-discrimination. We are already struggling with staffing!! The nuisance of doing weekly testing will cause staffing to be harder! It doesn't make sense. Testing sites will be inundated and having people pay for tests if they can't get a free test is an added weekly expense that takes a toll on the wallet when Hawaii is already an expensive place to live in. We all want Covid to go away. We all are concerned with public health and safety. But this is not the way. My cousin was in contact with someone positive and waiting on her test results.... But told by authorities that since she is vaxxed but was in contact with someone, she doesn't need to quarantine. How does that make sense? Of course she should quarantine til she finds out her results. It is the misinformation that is causing the spread to get out of control. If anyone is in contact and waiting on results then they should quarantine til the results come in as negative. Doesn't matter the vax status. Just like anyone should be able to work or enter establishments- doesn't matter the vax status. Wear your mask, stay home if you're sick, going back to the basics like we did last year- not going forward with this passport idea! Are we a communist country?

We are America! Equal opportunity, freedom of choice, our
constitutional rights.... Remember that!
We the people....

Written Testimony I oppose a vaccine mandate In hawaii. Please realize this will be so detrimental to small businesses whom will lose 50% of their business if this mandate is enacted. Mitigation of a virus through multiple angles, wearing masks and testing were working well. vaccinated folks are still transmitting the flu, so a mandate will do nothing but hurt the local economy. I think building trust with our government should be priority number 1. Forcing Vaccines on people is a slippery slope. Please oppose resolution 21-194

Agenda Item Mandate for vaccination passport card
Your position on the matter Oppose
Representing Organization Self

Written Testimony

I appose the mandate requiring that we would need to have a Covid Vaccine Passport Card to be able to enter a Restaurant, Gym, Movie Theater. You can not take my right to choose what and when I take an experimental vaccine in my own body. I do not discriminate against those who are vaccinated and I expect the same respect on a decision concerning my own body. I also feel that you are making it impossible for all of us to come together in peace instead you are now dividing our people and I will not abide by these mandates you have no right to take away our freedom this is America. My voice will be heard and not ignored. I believe the people of Hawaii has spoken. NO MANDATES FOR VACCINATION PASS CARDS PERIOD!!!

Written Testimony It is my personal belief we, as both the state of Hawaii and the United States as a whole, should never entertain a passport of any kind that prohibits its citizens from taking part the everyday freedoms. This is a dangerous path that has a dark future.
The path forward should be complete freedom.

Written Testimony There is no scientific evidence behind this. Free people are not 'quarantined' or restricted in movement or participation in society. There no deadly disease, scientific evidence demonstrates the 'virus' is easily treated with therapeutics thus vaccines are not a necessary or effective solution.

I received the J&J vaccine at the end of March 2021 after feeling pressured from my previous employer to get vaccinated. Since receiving the vaccine, I have experienced chest pain on an almost daily basis; something which I have never experienced before. My doctor thinks it may be myocarditis (inflammation of the heart) as a result of the getting the vaccine... It was in the news that a NZ woman recently died from myocarditis after getting the vaccine.

In addition to the myocarditis, I also developed shingles within a few weeks of getting the vaccine. The same thing happened to another family member (someone that I don't really have contact with) a week after getting the Moderna vaccine.

Written Testimony

People's lives are being negatively affected physically and financially (i.e. job loss) as a result of an experimental and minimally effective vaccine. If people want the vaccine, they should be allowed to get it... if the vaccine is truly effective, then those who have chosen to be vaccinated should not have to worry about the unvaccinated.

I used to think that segregation was a thing of the past however I fear that it is being revived by Congress as evidenced by allowing the vaccinated vs the unvaccinated into restaurants, bars and gyms. I have always believed that we live in a FREE country, however I fear that our freedom is slowly being stripped of us. I implore you to do the right thing and allow us to keep our freedom by deciding what is best to put in our bodies.

I strongly oppose.
This is a blatant violation/disregard for Constitutional Rights. This violates HIPPA Laws in place,
This does NOT address antibodies in people who have had COVID and recovered. Scientific Data out of Israel - THE MOST VACCINATED POPULATION/COUNTRY. Have the DATA- ppeople recovered from COVID have MORE ANTIBODIES than anyone with Vaccine. FACT!
NOT enough studies on vaccines to be shoving this down our throats - and our Children. OUR CHOICE.
NO!!!!
Respectfully.

As an all natural living person I have chose to not get the vaccine for many reasons. What I do is take care of my health through fitness and activities. By taking this away from the unvaccinated just will now be putting our physical health and our mental health at risk. Also cause people wanting to take illegal actions to be able to do this activities.

Written Testimony I am strongly opposed to this bill, it's unconstitutional to force people to be vaccinated against their will and is a major civil rights violation. The vaccine doesn't prevent infection nor does it prevent spreading this disease. This passport is only creating two classes of people, vaccinate vs unvaccinated. Don't do it! We need to united not divide!

Written Testimony

I am opposed to mandated vaccines & vaccine passports for ANY reason that's trying to be used, in this case a "public health crisis" the fact that this vaccine came out with such speed is questionable, regardless I do not believe that any vaccine should be mandated on the American people in order to live freely in society. It's completely unconstitutional & goes against our freedom of choice. We have the right to choose what goes into our bodies & this should not be a requirement mandated onto businesses in order to let their customers come & shop, eat, etc.

Do not continue to try & move forward with this, it will not only be detrimental to the already shaky economy but it is completely unconstitutional & wrong to try & force on people. I'm disgusted & in shock that this is even being discussed as a solution. Stop trying to control us. Enough is enough!

Written Testimony

I strongly oppose the idea of the government making my personal health decisions when there is so much evidence that Covid-19 is a risk that is understood to be much greater for the elderly, overweight, etc. and not a significant risk for those of us that are healthy . Just as I cannot safely get a flu vaccine, I will never get the vaccine because the side effects of guillain barre syndrome (which my mom & uncle have had) far out weigh any benefits the vaccine may have. Note that more and more evidence is coming out that those who are vaccinated are more likely to be negatively impacted by the Delta Variant. This is POLITICAL and not based on science.

What I wrote:

Written
Testimony

I oppose this resolution. Forcing otherwise healthy people to take a vaccine for a virus that they have a 98% survival rate from is immoral. For young people under the age of 30 that percentage is probably closer to 100%. Like all medical decisions that are protected by HIPA regulations, this should be a personal choice. We know the population that is most at risk, older, obese, and those who are unhealthy. Target those groups.

Aloha,

I am in opposition of Resolution 21-194. This vaccine passport is meaningless, especially at this point in time.

Written
Testimony

First and foremost, there is scientific data confirming that vaccinated individuals are still able to spread COVID, which should be frightening to you all, as leaders of this State. When you mandate a vaccine, it's because you can guarantee that the likelihood of transmitting a virus is zero. In this instance, a vaccinated individual is still highly contagious, however, due to the fact that they may experience little to no symptoms, they will not know to quarantine or stay away from others. This alone places you in a dangerous environment. Whereas, an unvaccinated individual will most likely experience symptoms and know to stay away from the public.

Secondly, this vaccine passport is simply adding to the unconstitutional gesture and is flat-out wrong. Businesses will be in a lot of trouble, starting with the small then trickling to the large. Everyone will feel this impact. Most local stores will probably be forced to shut their doors for good. Employees will lose their jobs. Owners will choose to take their business to another state that isn't forcing this non-sense. How would you feel if you were responsible for the complete falling of the State of Hawaii?

An individual's vaccination is considered Private Health Information (PHI). But, I assume you already know this. People get imprisoned for leaking PHI. How is this okay? If you are forcing us to hand out our

information against our will, it is illegal and anyone who requests such information should be sentenced to prison, including the public servants who mandated it. I know people who are vaccinated and don't wish to share that information with anyone. I know people who are unvaccinated and don't wish to share that information with anyone. Again, this is not legal.

In summary, a vaccine passport will be null because its main purpose is to provide proof of an individual being marked as "safe" when this is not the case. They are far from being harmless as they are just as contagious as someone who hasn't received the vaccine. Businesses will permanently close and the Aloha Spirit amongst people in the state will be no more.

Please do not mandate vaccine passports. Many people currently do not feel safe taking the vaccine, especially highly sensitive people who have been highly reactive to chemicals and pharmaceuticals in the past. Hawaii is a mecca for highly sensitive people and it has been our safe place.

Vaccinated and unvaccinated can carry and spread to others in the same capacity. The CDC states the vaccinated can be super carriers. It is ones right to choose wether or not they want to inject their bodies with a controversial "vaccine/chemicals and possibly end up with a debilitating, physical consequences or possibly death. I am against this discrimination that will occur with passports. I love my vaccinated family and friends and my unvaccinated family and friends..... please don't divide this country anymore!!

Written Testimony

When my truth becomes shameful because it is my truth, my truth is, the masks, have not ceased to be an irritant and a blatant shame to my God, the lockdowns have not ceased to be an overprotective and overreach of power, and causing humanity to not be able to communicate properly, as with masks, these mandates continue to state, that human beings cannot make proper judgements for ourselves, when it comes to self preservation and loving others. and yet i am supposed to feel ashamed, like im ignorant, of the healing of the sun, and the healing of fresh air, and the healing of a warm smile, I am a believer in Christ and he is my healer. Jehovah Rappha, and im not afraid of what you can do to me on earth. I am not for vaccine mandates, how unnatural. I will continue to serve the Lord. And pray for justice and freedom, for every soul that was damaged during this ". Thank you for giving time to my testimony. God is Love.

Written Testimony

I strongly oppose vaccine passports and mandates. Your denial of my service regardless a vaccine status violates several federal laws. Title III, section 36.202(a)(b)(c) and 36.203(a)(b)(c) states that I shall not be denied the same PARTICIPATION and EQUAL ACCESS as everyone else. Imposing vaccine passports is unlawful discrimination and is unacceptable. Imposing this type of violation on to the people and local business or any business for that matter is tyranny. Imposing vaccine passports on the public will significantly damage if not destroy our local economy. Imposing vaccine passports based on vaccine status has divided the community, families, and government. The trust and respect has been broken between citizens and government, this is not about protecting the health and safety of all human kind anymore! REMEMBER BEFORE the vaccines, WE ALL helped flatten the curve and did great. WE ALL worked together in keeping the health and safety protocols. Now that vaccines rolled out cases went out of control. That in itself is something to look into instead of imposing these vaccine passports and mandates. Do what is Right and stop these mandates and vaccine passports. Thank you.

Written Testimony Vaccine passports are not right! Any vaccine mandates are WRONG! This should be a free country. I am not anti-vax. I work at a hospital with Covid + patients. I am pro freedom!!! People need freedom to make the right choices for themselves. This pandemic has been handled wrong. Prevention, protocols and vaccines should all be on the table.

Shame on you for introducing this bill! It's detrimental to our freedoms and local economy. It's an obvious attempt to further divide the community by granting rights and privileges to a fraction of your voters while gaslighting the rest. It's outrageous and a perfect definition of the abuse of powers. Powers you granted yourself indefinitely with new proclamations! It's never been about the public health and it's clear more than ever before that it's all about compliance and control.

Written
Testimony

The usage of the word Passport itself tells me we are talking about freedom of movement & travel and granting (temporary) privileges for those who comply. It has nothing to do with restaurants and venues but rather a first step to push for more regulations. It's cowardly and pathetic. You exposed yourself first by trying to pressure our first-responders. Now you're trying to strong arm small business to push your agenda even further? Btw, these are the same businesses you shut down at the beginning of the pandemic while keeping big corporate stores/chains open. What's next? We are all eating Costco hotdogs and McMuffins because you drove Like Like Drive Inns of Hawaii out of business? Twice vaccinated vs Booster Shot Vaccinated? It's madness!

Start testing tourists, vaccinated or not, and stop blaming the locals for the manipulated and selective data you have been using to push your agenda. It's obvious the reason the testing requirement went away is because it would expose the real problem the Islands (especially Oahu) have. That is the hotel industry making money at cost of local micro economy. Nothin new here obviously after changing vacation rentals laws and now pushing for more changes.

STOP NOW!

I am Strongly opposed to this bill. This bill will be detrimental to us now and for our future generation. To discriminate and segregate human beings is Not Fair, Right, or how God intended for us to live.

Our Government is going against All that we have always Believe in Especially growing up and living here in our home "Hawaii" where our culture has Always been Living in Peace, Harmony and How I would like to think and remember to Embrace All Cultures, Race, each others individuality with Respect to one another. To see how our society is Shifting to this Communist type of Society is Alarming, disheartening and Unbelievable.

Written Testimony

My daughter is already feeling the repercussion at school by similar mandates that is segregating and discriminating her from participating in school activities. It is heart Breaking to see this happening to her in this day and age that she is now living in.

I am Standing Strong along with my Brothers and Sisters in Hopes to Keep Hawaii Free From these kinds of Bills and Resolutions that will change drastically, the course of our Community and Life Style that we have Cherished here in our Islands.

I Pray that our Heavenly Father have His Hand of Grace and Mercy upon Us, our Community, State, Nation and World. That All Individuals that is trying to Implement any and all of these kinds of Mandates that God will Bring Revelation to their Hearts Minds and Spirit. I say this in All Humility & Aloha

As a physician licensed in Hawaii since 1988, I take personal offense at everybody practicing medicine without a license! Patients must be a valuated before they're forced to have vaccines that are potentially harmful. This vaccine carries a high incidence of quadriplegia and you're taking no responsibility to help the person if you force them to be quadriplegic. I personally am extremely allergic and cannot take the vaccine or it potentially will cost me my life. Since when did it become to legalized to kill people Who have done nothing wrong but they're allergic? You must stop this tyrannical behavior!

Written
Testimony

This is a pure violation and over reach of the government who is meant to serve the people. Our basic freedom is being violated by the government that is built by the people for the people. Not by bureaucrats who are influenced by special interest groups and big government. We have let over 1 million people over the southern border with little to no covid testing and according to the data over 20% of them are covid positive and yet they are free to catch planes, trains, busses, etc. Why are American citizens being locked down and paying the price when non Americans don't have to follow any of the mandates that you are dictating we follow.

Written Testimony The VACCINE Passport will not help anything. Even Vaccinated people still get COVID & spread it. Anyone & everyone should already realize that Traveling on a Plane means that you are breathing each others breath/air aka recycled air, therefore travel should be at ones risk. This is not a solution to the problem of COVID spreading!

Organization

Written Testimony I am against vaccine passports. As we know a vaccinated or unvaccinated person can get and transmit the virus. So a passport just isn't sustainable. Mask wearing, social distancing and testing of those coming into the state has worked and should be implemented for all. Not just unvaccinated.

I am not opposed to vaccines but please give us time to see how these vaccines work! The truth is it takes 5 to 10 years for a vaccine to get approved these are still in the trial stages!
It doesn't matter that they were pushed through for approval. You know in your heart the truth. Please don't push this VAC Pass...

One day we will all sit before God at the judgement seat and have to take into account all that we did on this earth...I believe that day is soon approaching! Please make a wise choice for the good of the people give this vaccine more time please!

Aloha,

Written Testimony

This is something my family and I are against as well as half of Hawaii. It should be in our own right to choose what we do, and not be forced into putting poison into our body as well as our children, what you fail to realize is that this vaccine may harm my child for life, and what are you guys going to do about it ? Make my child another statistic ? I don't think so. This vaccine is going to be mandated for what ? You can get covid either way and spread it either way so I'm not sure why it's so important for you folks to force us to take the shot! This is all about money I'm sure. I respectfully oppose to this vaccine mandate and everything else that requires us to have a card to live our lives.

Aloha. I don't believe that it is legal nor morally right to demand that a person's personal choice to put a vaccine in their body or not should be allowed to determine whether or not they can eat dinner at a table with loved ones or not. Whether or not they can board a plane and see their family's. Whether or not they can travel, work out, go out or anything! This isn't the Hawai'i I grew up in. Nor the Hawai'i I wish to raise my children in either. Let's keep the state of Aloha exactly that. Filled with Love for one another and not hate or fear. This is the same as asking all the Jews to wear a yellow star on their clothes. Which determined what they were allowed and not allowed to do. Where they were allowed and not allowed to go. How would you like to be remembered as Hawai'i very one Hitler. This discrimination has to stop

I OPPOSE THESE MANDATORY VACCINE PASSPORTS!!!! THIS IS NOT RIGHT!!!! We all have the right to choose what's best for ourselves and our family. By mandating these vaccine passports, you all are basically medically raping all of us who don't want to get the vaccine or get tested. Josh Green said that Covid will be around for a long time...so why does it matter whether we take it or not? You don't own our bodies so you shouldn't be able to tell us what to do with it!!!!

If vaccinated people can spread the virus,
and
unvaccinated people can spread the virus, what is really going on?

It reeks of apartheid segregationalist policies - mandating that
some be permitted here, but not there, to travel here but not
there?

Written Testimony LEAST WE NOT FORGET the end result of segregation.

If followed through the will the vaccinated be discriminated against
when wanting to access services that are offered for
unvaccinated.
Or will there be a double standard?

I do not want to be apart of a society that goes back into
discriminatory practices.

Written Testimony

I am a young healthy adult that opposes the idea/concept of a vaccine passport because the vaccine isn't effective. Requiring a vaccination won't make this virus disappear, being an airborne virus, COVID-19 will be around for a while to come. Even if the vaccine is ruled safe, it's absolutely not effective. This is because it can still be transmitted if you're vaccinated and you can still catch it if you're vaccinated. This "health" passport would NOT solve the problem of the current surge we are facing. A good option may be to make all incoming visitors test negative regardless of vaccinated status because vaccinated individuals could just be flying from the mainland or elsewhere and carry the virus right in unknowingly. Please reconsider this as it will hurt many businesses and put many people out of work.

Aloha,

I'm a resident born and raised in Hawaii. I've worked for the State in our Public school system and well as private and non profit sector with our island youth. I now own my own business as a coach and personal trainer.

Written
Testimony

This Resolution is troubling for many reasons. One of the main reasons, it poses massive threats to our community as a collective. There is no collective anymore. We've entered modern day segregation and this is happening at the hands of you, our government NOT us the people. You've posed an idea that protects only those who comply with these rules that are NOT laws. And those of us who want an opportunity to make informed decisions for ourselves, who are law abiding citizens are now being strong armed into losing our livelihood, and freedoms.

These are crazy extortion tactics and coercion at a level we have never seen. The amount of stress, pain and anxiety you're infringing on ohana is through the roof. You care not. And that is scary to realize about our beloved community and the leaders we trust. I ask you to humbly reconsider the long term effects this will have in our Hawaii. We've done so much as a community to band together during this time. Why make it harder when it does not have to be.

Mahalo

Whittney Anela a concerned WAHINE from Moku o Keawe.

Written Testimony

Many people I know have suffered adverse reactions to the vaccine. I know of 4 people who died 2-3 days after taking the vaccine. Many vaccinated people are suffering heart attacks recently. I ask whoever is reading this, as a human, to carefully reconsider this issue even being up for a debate. The statistics you may have been exposed to are misleading and dangerous. To force an individual to take a non traditional and newly employed vaccine is disgraceful. Please do not even let this type of tactics enter your mind. I say these things from a place of love with the wishes of transparency and understanding.

Written Testimony This is ridiculous because vaccinated people can still get COVOD and pass it to someone else so why are we now becoming a discriminatory nation. Not allowing unvaccinated people to travel without a passport will not stop the spread of COVID.

This proposal is absurd, unfounded and is an over reach of our FREEDOM and our GOD-given right to FREE WILL. None of you are GOD!!!!

Written Testimony This DOES NOT follow the science which the CDC has publicly declared on their website and therefore DOES NOT meet the standard for public safety. This decision is without merit since VACCINATED people CAN SPREAD the virus just as easy as NON-VACCINATED people.

Your position on the matter Oppose
Representing Organization Self

Written Testimony

I, Queen Maelani Lee, opposes this mandate. Enforcing rules to make people vaccinate is wrong. It's just like making the people commit suicide. The control should be a shutdown and lockdown with only essential travel to the grocery stores until Hawaii gets this pandemic under control to zero cases. Hawaii should not open to outside travelers until the other states and countries have their results down to zero. Even if this takes two-3 years, this is the only way to handle this pandemic. People taking the vaccine are spreading the symptoms and illness to others. I do not support control of this pandemic in this way. A shutdown from tourists and travelers coming into Hawaii is necessary and a lockdown as well.
Mahalo,
Queen Maelani Lee

I think people have the right to choose what they put into their bodies and nobody has the right to mandate something against their will. Also most people that have been vaccinated are spreading Covid more than ever. I am vaccinated and still got Covid and still spread it to a lot of people not knowing.

Written Testimony It has proven that the vaccine isn't 100 percentage effective. Its is not within the constitution to mandate a vaccine, especially when it has only killed less than 3 percent of the positive covid patience. Most of them have underline existing health conditions.

Agenda Item Covid-19 MANDATE
Your position on the matter Oppose
Representing Organization Self

I am strongly opposed to this Health Passport.

Written Testimony

1. Vaccine makers and vaccine administrators and mandators are immune from liability in the event of adverse reaction including death
2. Pfizer paid out billions for bribing doctors and suppressing adverse trial results in 2009
3. Moderna has never brought a vaccine to market
4. Every previous coronavirus vaccine has failed.
5. Every previous mRNA vaccine has failed.
6. Anecdotal friends and family have had adverse reactions including death after vaccination.
7. ZERO long term safety testing and the short term trials that were conducted were abandoned because all the lab rats were dying.
8. Censorship of scientific debate
9. Censorship of Fauci funding gain-of-function
10. Censorship of Covid Treatments and the use of early treatment
11. Censorship of adverse reactions and deaths
12. Ignoring natural immunity. Got Covid and developed immunity.
13. 99.95% chance of survival if below age of 50
14. Bloated case counts and death numbers
15. The virus will continue to mutate
16. Vaccinated can still catch the virus.
17. FDA, CDC, WHO are captured institutions
18. Virus and vaccine efficacy measured by faulty PCR test
19. Never solved lipid nanoparticle delivery problem
20. Japanese Pfizer data shows LNP accumulating in organs
21. Vaccines must give you antibody immunity. This "vaccine" does NOT do that.

22. The doctors and nurses administering the inoculation are required by law to give informed consent and they cannot do this if they themselves are not informed
23. the 14th Amendment to the US Constitution explicitly directs states not to "deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws"
24. Only authorized under a temporary Emergency Use Authorization as experimental (investigational) agents only
25. Emergency use products are specifically prohibited by federal law 21 U.S.C. §360bbb-3 from being mandated: "Authorization for medical products for use in emergencies ... require ...the option to accept or refuse administration of the product"
26. Decades-old universally accepted Codes of Medical Ethics, including the Nuremberg Code and the Declaration of Helsinki absolutely prohibits any form of coercion whatsoever to individuals to participate in a medical experiment
27. It is neither feasible nor safe to mandate experimental vaccination given the large number of COVID-19 recovered patients in the general population and the FDA/Pfizer/ Moderna protocols which excluded COVID-19 recovered patients
28. This Health Passport poses substantial risks to personal privacy and equal treatment before the law for all citizens of Hawaii as well as the United States
29. Administration of the experimental COVID-19 vaccines according to guidelines established by the CDC's Advisory Committee on Immunization Practices do not provide adequate protections for average Americans concerned about potential health hazards associated with the inoculations
30. The public is entitled to receive unbiased, transparent, easily accessible medical information related to all vaccines from their public health officials
31. The SARS 2 Covid19 virus has never been isolated and there is no proof of it's existence.

According to the State's website at health.hawaii.gov updated 9/1 the positivity rate is 7.9% with 858 new cases STATEWIDE which calculates to 68 Positive cases STATEWIDE according to the website's definition and formula.

68 Positive cases Statewide with a total population of 1.46 million people is really 0.0004% chance of being positive with a 99.995% chance of survival.

Additionally, there were more flu deaths in 2017 than there are Covid deaths since April of 2020 and miraculously flu deaths disappeared.

The numbers don't make sense! Neither do your "New Case Count" numbers that are reported daily which include "Probable Cases." By definition on the State's website, "Probable case are cases that either have a positive antigen* test result (without a follow up confirmatory

test) or were symptomatic and had known exposure but did NOT get tested."

WE THE PEOPLE DEMAND THAT YOU PROVE THAT A PANDEMIC EXISTS by presenting material evidence of the isolated SARS-COV2 virus and data of actual deaths (FROM Covid, NOT with Covid)and Number of Positive cases Statewide.

Written Testimony

The vaccination plan is failing. Mass vaccination to 95% will end up like Israel where only vaccinated people are in the ICU or hospitalized. Has the City Council even read the data on other hospitals in high vaccinated areas are reporting? The only real strategy is a robust therapeutic model that involves early treatment. I can attest because that is what is working in a clinical setting. Other area that mass vaccination is failing can be seen with the vaccinated are not being tested through the airport system. The alarming rate vaccinated people are spreading the virus since all unvaccinated people need to be tested first before flying is a clear indication of who is probably carrying and spreading the virus. As July indicates exactly when the spike in coronavirus cases occurred is exactly when vaccinated started flying without being tested. Do not lead this city into ruin by allowing "Health Pass", "Green Pass", "SMART Health Card" to let vaccinated people to become super spreaders of delta or the next named variant. Both Unvaccinated and vaccinated need the same strategy. A smarter strategy would be to have all members of a household encourage to have early treatment protocols in place for frequenting higher risk establishments. Think of it as having a fire extinguisher just in case there is a fire.

I oppose this resolution as its is illegal to mandate any vaccine under EUA, this bill is coercing businesses to participate in an illegal act and is discriminating against my right to choose self health. You, the government, are created and funded by American taxpayers, solely to protect my right and every American citizens right protected under the constitution of the United States of America. I do not designate you to make any health choices on my behalf nor do I designate you to restrict my rights because of my choice. I would like to apply the 10th ammendment and invoke we the people as the others and oppose covid 19 health cards, covid 19 vaccine mandates and asymptomatic covid 19 testing due to unvaccinated status.

This is a violation of human rights. You cannot restrict the rights and freedoms of people who do not believe as you do. Human beings are capable and responsible to make their own health choices. If this resolution goes into effect, it will likely be the end of life as we know it. It will certainly devastate my husband's 501c3 business here in Lahaina. We will be forced to leave Hawaii with our entire family.

"I am strongly opposed to health cards or vax passes in hawaii or anywhere else. Health cards or vax passes are discriminatory and violate the constitution, taking away our freedom to choose what medical treatments feel right to each individual. It will prevent healthy people from participating in society, affecting the economy hugely. Business will die because whoever is not getting the shot, was not going to get the shot anyways, and they will figure out ways to live without these luxuries. This is going to affect tourism hugely! Which obviously will affect the livelihood of the majority of people who sustain themselves from tourism. Vaccinated people does not mean healthy people. Someone can be vaccinated and be sick. Stop the fear and educate people on how to remain healthy sustainably. The shot does not create healthy individuals, and ultimately does not prevent anything. NO VAX PASS OR HEALTH PASS!! It doesn't makes sense and isn't actually protecting society. Stop destroying the economy and the livelihoods of the people of HAwaii!

Aloha,
It is unnecessary to mandate any type of verification notifying you've been vaccinated or unvaccinated. Everyone has the rights and liberties under HIPAA to keep their medical information private.

Written Testimony I oppose any bill, resolution, amendment or requirement needed for vaccination verification or Covid-19 test results (any variant thereof) to any place of business and travel. It's unnecessary. Everyone must choose to keep themselves healthy in every environment, it's not the governments job to do so.

Thank you and aloha,
Clint Chinen

This is a violation of human rights. You cannot restrict the rights and freedoms of people who do not believe as you do. Human beings are capable and responsible to make their own health choices. If this resolution goes into effect, it will likely be the end of life as we know it. It will certainly devastate my husband's 501c3 business here in Lahaina. We will be forced to leave Hawaii with our entire family.

Written Testimony This bill would create segregation and second class citizens. No one should be forced to get a experimental vaccine in order to enjoy freedoms. This would be going backwards in time before social just and equality. It is not fair to your citizens when vaccinated people also can contract and spread the covid 19.

Written Testimony

I think it is irresponsible to impose a vaccine passport for a virus that is transmissible whether you are vaccinated or unvaccinated. To take away people's rights in order to coerce them into taking an experimental drug goes against our rights. The FDA did approve the Pfizer vaccine however it is a version that is not readily available. Their original product is still under EUA. I invite you to do the research on this. Basing tiered safety levels based on vaccination rates doesn't make logical or scientific sense - specifically due to the fact that the vaccine has been proven not to prevent infection. I ask that you DO NOT pass this legislation. Thank you for reading my testimony.

Written Testimony I refuse to take the vaccine and if that prevents me from participating in daily life activities because of this mandate I will be severely affected. Many of my peers also will not take the vaccine, we are fully aware of how to care for ourselves and each other without it. I do not comply with being a part of this human EXPERIMENT. Please stop this from happening

I oppose this bill. Our time/ money / efforts should be going to greater causes. It would be discriminatory to reject me from entering an establishment because I choose NOT to be vaccinated. And we should respect peoples' right to choose.

I am a disabled veteran and I believe that forced vaccines while serving in the military caused my health conditions which none of my family members have. Every year in the military that I got the flu shot, I got sick/the flu. I had really bad reactions from the Anthrax shot also. Now that I have the right to choose, I don't get the flu shot and I don't get the flu ☐

Written Testimony

I lived in Tijuana & south of Cancun, Mexico and I really liked their Covid measures similar to going to hospitals. I strongly encourage Hawai'i/ the U.S to consider implementing it also. Before entering EVERY establishment, we had temperature check and used hand sanitizer. They even had us clean the bottom of our shoes before entering. It took just a couple seconds with very minimal delays. And yes we were required to wear a mask while indoors except while seated to eat. I think this is a better alternative.

I was an athlete from childhood to adulthood and now I'm unable to even jog and have been under nonstop medical care since 2013. At one point I was unable to walk up 1 flight of stairs without getting winded. Georgetown University who specializes in veterans, helped me rehab myself.

When I got out of the military in 2009, I got my FREEDOM back to

"choose". Since getting my freedom back, I have NOT gotten the flu shot and I have not contracted the yearly flu, Covid nor gotten sick except for military related illnesses. I focus on preventive spirit, mind and body healthy alternatives.

Mahalo for taking the time to listen me,
Rosemarie Ader

Your position on the matter Oppose
Representing Organization Self

Aloha Kakou,

I oppose the vaccination passport because of the following:

* Governor, and LT. Governor and other city and state health officials are fraudulent and corrupted and don't have authority over people. (I am calling in question that the USA corporation from the Act of 1871 is dissolved. This makes federal elected government officials and state government officials fraudulent since they both fall under that ACT of 1871 corporation. Therefore the Governor, LT. Governor, the Mayor and other elected government state officials are acting under a fake authority. The vaccine passport and all other "mandates" dealing with this health emergency proclamation under that fake authority is unlawful and unconstitutional.

Written Testimony

* Summary-

* The vaccine passport is a weapon to control people with fear. It is clear it promotes mind and money control on people. If the intent is to eliminate or reduce the virus, a vaccine passport does nothing to help that. Its a virus and it will mutate. Taking personal Kuleana is the answer. And the government does not need to interfere with our sovereignty and freedom to choose. Instead of promoting fear through this vaccine passport and vaccinations, government and medical officials should promote preventive natural, organic, and less expensive alternative proven methods. You do little to no empowerment and education on that. Only one sided and we have the right to choose for ourselves. Government has no right to choose for us.

* Big Pharma have dominated the minds of people by corrupted

leaders. This statement has shown itself through too many inconsistencies and untrue or half truths. All orchestrated by fake government leaders through the fake media or vice versa to promote fear.

* There are a lot of people waking up to this nonsense-both vaccinated and unvaccinated.

* Finally as a Kanaka Maoli, Ke Akua is the authority. And from that authority, we the people as living and breathing human beings are given sovereign rights to choose not to be forced by polices, mandates, statutes etc which is unconstitutional ran by fake and fraudulent government corrupted leaders.

The entire world is going through this corruption. People of Hawai'i can do better by eliminating corruption in our state.

Ke Akua blessed this land and the people who are from this ahapua'a and aina. People from Hawai'i should be leading the world-by ALOHA and not by FORCE. The vaccination passport is a force.

Force is led by Satan not by Ke Akua (GOD). God leads by love and compassion. It is obvious that some leaders are leading by force. We know what team you are on.

Personal Kuleana, freedom to choose because that is our sovereign right is the answer.

I choose no to vaccination passports! 🏠100

'A'ole maka'u akā aloha, 'a'ole ikaika akā aloha ke Akua
(Not fear but love, not force but Gods Love)

Coach Gilman
(Lead with love not force)

Written Testimony Segregation of any kind is unacceptable and wrong.
Do not let history repeat itself.
This is not a "pandemic of the unvaccinated"
It is a pandemic of people who have preexisting conditions (97% of people currently in Hawaii Hospitals have preexisting conditions.)
This proposal will hurt business and cause so many unintended consequences.
We need to work together during trying times.
Please do not divide our society.
NO HATE IN THE 808

Written Testimony I think vaccine passports for against my right to choose an American. The government DOES NOT hold the power to tell me what I should and should not put in my body, that ridiculous. I strongly oppose this, leave the right to choose in the hands of the people! I don't plan on getting vaccinated and I shouldn't be punished for it, I already had the delta variant of covid in June and based on everything we have been taught in biology FOREVER I am protected because my body has built up natural immunity.

I am appalled that this is even a subject. It is obvious to the masses that this "pandemic" has been politically motivated. There is still a 99% survival rate. There is absolutely NO reason to mandate such an atrocious vaccine. We are still in clinical trials and I know several people personally that have been hospitalized after being inoculated. There is no "bed shortage" in hospitals, there is a NURSING shortage. Stop playing into the communist narrative because you want power over people. This is America, not China.

Written Testimony

I strongly oppose the HB introduced by representative T. Waters and E. Kia'aina for the state of Hawaii to have a digital vaccine passport. The Pfizer vaccine is still under Emergency Use by the FDA and is not approved yet. How can you mandate a vaccine pass if the vaccine is still experimental? Moderna and J&J are still distributing vaccine here in the islands which means that Pfizer is not approved, if it were the other two Vaccine manufacturers would have to desist since one was awarded the Safety of the FDA. It is not approved and I have had first hand accounts of the vaccine damage at my workplace. This is dangerous and should not be pushed onto the public of whom you represent. Please do the right thing and let the people have the freedom to do what is right for their families.

I am opposed to this bill that violates our individual privacy and rights. This COVID-19 Health Card will be ineffective as the vaccine does not prevent one from being infected by the virus, it does not prevent one who is vaccinated from transmitting the virus, and the PCR tests report false positives 97% of the time when it's dialed up to run at 35+ cycles, as documented by the CDC and reported by many doctors and scientists around the world.

Do not pass such a ridiculous bill that only serves the political agenda of corrupt politicians. This is not following true science about the virus and vaccines.

Written
Testimony

First present evidences that are peer reviewed and authentic about the effectiveness of the 1) PCR tests to accurately identify covid-19, Delta, lambda -specific viruses (not all flus, Influenza A/B, and Corona viruses), 2) each experimental vaccines, 3) the masks that people use (and there are many forms and fashion for these), and 4) the FDA-approved Comirnaty vaccine that will only be available for distribution in 2024. Also make sure the CDC and FDA and Hawaii State government are legally liable for the damages done to individuals that are required to be vaccinated.

Regards
Melissa Sabanal

I strongly oppose 21-194 with the potential for use of a vaccine passport forced on the people of Honolulu by emergency use proclamation. This is completely unconstitutional- ALL men are created equal!!!! The vaccine passport is in direct violation of our constitution, as well as violating HIPPA Laws. We the people know our rights! This is segregation, discrimination and coercion to take a medicine that has not had the proper testing to be urged upon the citizens of this State. You say it is not mandatory- however taking away most opportunity to work, shop and live and function in society is a direct human rights violation. This is wrong- history is repeating itself and must be stopped now! We remember what the Nazi's did to the Jews- they were marked and identified as a threat, ostracized- and forced out of basic human rights. Listen to the people of the state the you represent. Our economy cannot handle this, our keiki, and our futures can't support this.

Insisting on vaccinations for our health care workers puts a bigger strain on an already burdened system. The hospitals are already understaffed and people are dying because they cannot receive life saving treatments unrelated to the virus. Vaccines do not stop the spread and create a false sense of security for those not wearing masks and spreading germs. Businesses should make their own judgement calls based on CDC guidance, not inconsistent laws designed not for safety but for inconvenience. Most people I know who choose not to be vaccinated are staying in their homes, not going out to bars and restaurants. Instead of inconsistent rules, how about requesting the USS Mercy or USS Hope dock here to help with the overload of sick people?

I believe all people in the state of Hawaii and county of Honolulu, should have their right to decide if they would like to get the vaccine. This a personal decision, the thought and process to which the county of Honolulu has taken is un just to which you are taking the rights away from ones personal and legal rights. We aren't ready for this action. Mahalo

I oppose the mandate of being forced to Vaccinate with a vaccine that has no long term studies to a virus that has more than a 99% survival rate. My son has an injury from a long term studied vaccination and I have had another family member who got the Pfizer vaccine and is now has a permanent ringing in his ear and cannot hear. There are way too many adverse reactions for this to be even legal to force on people. So many deaths, so many heart problems and it's only the beginning! I feel like this is a crime against humanity and if this gets passed I will likely be moving to another state that will not be trying to move forward with this tyrannical movement!

The mandate of an electronic passport is a violation of our freedom and rights! It clearly is intended to punish those who choose not to put this product into our bodies. This is an overreach of government and tyrannical. This will negatively segregate and divide our people in ways we have never seen. This does nothing to improve safety as those who are vaccinated can still give and get Covid and it fails to acknowledge those who have recovered from Covid and have immunity. This is destructive and will further demolish our economy and achieve nothing good!

I oppose these vaccination passports. It's violating my HIPAA rights and my Constitutional rights. By supporting these vaccine passports, you are supporting communism and corruption of the state of Hawaii. We the people will not standby and watch this country fall apart, nor this state. If you really want to gain the people's vote and trust in the system, you must repeal this Agenda and many more unrighteousness acts made by the Governor, Lieutenant Governor, Mayor and other Representatives in the system. You politicians are not leaders, you are representatives for the people. The People of Hawaii are your Leaders, we have a voice in everything. Shame on all of you who brings tyranny into this Country and into this State. We are the people of The United States of America where we have FREEDOM!!! Once you violate our Freedom, you are an enemy of the United States of America and we won't be following your so-called mandates. I took an oath to defend this country even if it means defending this country against the tyrannical government system which you politicians are implementing. We the people support all the Amendments and to take away our rights is crimes against the United States of America. Forcing someone to take the a vaccine to receive a vaccine passport in order to work and entering any establishment is a crime. You people should be ashamed of yourself. We the people will stand against tyranny and we the people will support our Freedom of choice.

I am 70 years old, a Baby Boomer, lived through the Vietnam War, remember the place I was when I hear JFK was killed, Bobby Kennedy, Roe vs Wade, Aids Epidemic etc. Vaccine Passports are a racist policy. Contrary to common belief it is not white republicans refusing to be vaccinated. But Black democrats and people of color and especially Pacific Islanders. I remember growing up in Virginia public restrooms One for White and another for Black also water fountains were marked white only. Are we really going back to that form of ignorance. My greatest memories are those of the Civil Rights Movement and our fight as Americans for "Freedom for All" No matter the race or belief of the person. I pray this resolution is not passed for if it is it will be the beginning of the end of Our Constitution and America as It Should Be. I am 70 considered High Risk for Covid taking the vaccine may be the right thing for me My Choice I do not have the right to inflict my beliefs about vaccines on another person anymore than I have a right to choose for another person if they do or do not get an abortion or what medical treatment they choose. Last I checked we were living in the United States of America The Land of the "Free" and the Home of the Brave. Please let us be free and YOU BE BRAVE enough to do the right thing. Respectfully submitted

Written Testimony This is my testimony to say that I absolutely disagree with this vaccine passport. It violate our constitution and is wrong in so many ways. It violates our human rights. I know of 5 people who have died days after taking this vaccine. I only know one person who died of Covid and she was in her 90's. We do not know the long term effects of this vaccine especially on the young people who have their whole lives ahead of them. Please I urge to to stop this madness.

Written Testimony

I strongly oppose this bill! I oppose the vaccine passport program. We have rights! The 14th Amendment to the US Constitution explicitly directs states not to “deprive any person of life, liberty, or property, without due process of law; nor deny to any person within its jurisdiction the equal protection of the laws” Emergency use products are specifically prohibited by federal law 21 U.S.C. §360bbb-3 from being mandated: “Authorization for medical products for use in emergencies ... require ...the option to accept or refuse administration of the product”

Decades-old universally accepted Codes of Medical Ethics, including the Nuremberg Code and the Declaration of Helsinki absolutely prohibits any form of coercion whatsoever to individuals to participate in a medical experiment. What you are trying to do is the definition of segregation!!!! Our ancestors fought against segregation, they paid for it with their lives. Again, this is why i strongly oppose vaccine passports.

"To be 'cured' against one's will, and cured of states which we may not regard as 'disease,' is to be put on a level of those who have not yet reached the age of reason or those who never will; to be classed with infants, imbeciles, and domestic animals."
- CS Lewis

I am appalled at what has been proposed!
Agenda 21-194 is violating all known defenses against totalitarianism:

TITLE II OF THE CIVIL RIGHTS ACT (PUBLIC ACCOMMODATIONS)

42 U.S.C. §2000a (a) All persons shall be entitled to the full and equal enjoyment of the goods, services, facilities, privileges, advantages, and accommodations of any place of public accommodation...

Written
Testimony

Covid-19 Vaccine" manufacturers have refused all requests for disclosure of ingredients, claiming proprietary rights, therefore infringing upon rights to informed consent under the Nuremberg Code regarding medical experiments:

The Nuremberg Code (1947)

"The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to

make an understanding and enlightened decision.”

Declaration of Helsinki

The Declaration of Helsinki was created in 1964 by the World Medical Association (WMA). The WMA was established seventeen years before in 1947, and was created to handle the growing concern of unethical medical practice.

Declaration of Helsinki

Medical research is subject to ethical standards that promote respect for all human subjects and protect their health and rights. Some research populations are particularly vulnerable and need special protection. These include those who cannot give or refuse consent for themselves and those who may be vulnerable to coercion or undue influence. Physicians should consider the ethical, legal and regulatory norms and standards for research involving human subjects in their own countries as well as applicable international norms and standards. No national or international ethical, legal or regulatory requirement should reduce or eliminate any of the protections for research subjects set forth in this Declaration.

Universal Declaration on Bioethics and Human Rights

Article 3 – Human dignity and human rights

1. Human dignity, human rights and fundamental freedoms are to be fully respected.
- 2. THE INTERESTS AND WELFARE OF THE INDIVIDUAL SHOULD HAVE PRIORITY OVER THE SOLE INTEREST OF SCIENCE OR SOCIETY.**

Article 5 – Autonomy and individual responsibility

The autonomy of persons to make decisions, while taking responsibility for those decisions and respecting the autonomy of others, is to be respected. For persons who are not capable of exercising autonomy, special measures are to be taken to protect their rights and interests.

Article 6 – Consent

Any preventive, diagnostic and therapeutic medical intervention is only to be carried out with the prior, free and informed consent of the person concerned, based on adequate information. The consent should, where appropriate, be express and may be withdrawn by the person concerned at any time and for any reason without disadvantage or prejudice.

3. In appropriate cases of research carried out on a group of persons or a community, additional agreement of the legal representatives of the group or community concerned may be sought. **In no case should a collective community agreement or the consent of a community leader or other authority substitute for an individual's informed consent.**

Article 28 – Denial of acts contrary to human rights, fundamental freedoms and human dignity
Nothing in this Declaration may be interpreted as implying for any State, group or person any claim to engage in any activity or to perform any act contrary to human rights, fundamental

freedoms and human dignity.

Article 18 – Decision-making and addressing bioethical issues

3. Opportunities for informed pluralistic public debate, seeking the expression of all relevant opinions, should be promoted.

International Covenant on Civil and Political Rights

Articles of the Covenant

The Covenant follows the structure of the UDHR and ICESCR, with a preamble and fifty-three articles, divided into six parts.

Part 1 (Article 1) recognizes the right of all peoples to self-determination, including the right to "freely determine their political status", pursue their economic, social and cultural goals, and manage and dispose of their own resources. It recognizes a negative right of a people not to be deprived of its means of subsistence, and imposes an obligation on those parties still responsible for non-self governing and trust territories (colonies) to encourage and respect their self-determination.

Part 2 (Articles 2 – 5) obliges parties to legislate where necessary to give effect to the rights recognized in the Covenant, and to provide an effective legal remedy for any violation of those rights. It also requires the rights be recognized "without distinction of any kind, such as race, color, sex, language, religion, political or other opinion, national or social origin, property, birth or other status," and to ensure that they are enjoyed equally by women. The rights can only be limited "in time of public emergency which threatens the life of the nation," and even then no derogation is permitted from the rights to life, freedom from torture and slavery, the freedom from retrospective law, the right to personhood, and freedom of thought, conscience, religion and freedom from medical or scientific treatment without consent.

Article 7 prohibits torture, cruel, inhuman or degrading punishment and **non-consensual medical or scientific treatment**. As with Article 6, it cannot be derogated from under any circumstances. The article is now interpreted to impose similar obligations to those required by the United Nations Convention Against Torture, including not just prohibition of torture, but active measures to prevent its use and a prohibition on refolement. In response to Nazi human experimentation during WW2 this article explicitly includes a prohibition on medical and scientific experimentation without consent.

https://en.wikipedia.org/wiki/International_Covenant_on_Civil_and_Political_Rights

In FDA Guidance Documents Informed Consent is stressed as well:

"2. Coercion and Undue Influence

According to the Belmont Report, "Coercion occurs when an overt threat of harm is intentionally presented by one person to another in order to obtain compliance."

Written Testimony

I am writing today to oppose the illegal mandate of vaccine passports on the islands of Hawaii. This resolution goes against everything that America stands for and is founded on. We the people have rights to choose what to put just our bodies, not the government. Our constitution protects those rights. You "elected" officials work for the people and the people are telling you, this is not ok and it will never be ok. You will be destroying lives. Will you be paying for people's bills? Mortgages? Taking care of loved ones? With this resolution, you are taking all that away because you want control and power. Well let me tell you, the people of Hawaii will never let that happen. If you guys do not listen to the people then you are not doing your job and you all need to resign. Me and my whole Obama own a respected business here on Oahu and we believe in the freedom of choice for our employees. We do not discriminate. Your mandates are effecting our business and our employees and their families. We are all about Ohana and we are known for our compassion and respect, but we are taking a stand to fight for our freedoms and our employees freedoms. We are not backing down.

Sincerely,
Concerned patriot

Written Testimony I do not support vaccine passports. It is highly discriminatory, causing division among all people. It is a violation of constitutional rights and as history has shown, is a step in the wrong direction towards socialism. Our bodies have to stay our choice, not stripping away freedoms to add pressure to get a certain vaccine. And I am not anti vaccine.

I oppose the use of vaccine passports. It is unconstitutional, cruel, and racist. It is non-scientific, as the vaccines we have are showing to be ineffective at stopping the spread of Covid 19 Delta, and later Mu will be upon us as well. It is not a vaccine but a gene therapy and offensive to the religious beliefs of the majority of Hawaii residents if they knew the process from which these vaccines were made. They are also non-sanitizing vaccines giving only limited immunity based on only the spike protein, and not the entire virus. The nature of coronaviruses like the flu and Covid, predispose them to mutation which you will be constantly chasing with a vaccine instead of focusing on prehospital treatments that are available and effective.

The Vaccine is not an inoculation for Covid 19 because many people got Covid after double shots. Delta Variant will be resistant to the Covid 19 shot so it's wrong to inject people with a 3rd shot of Covid Vaccine to prevent the Delta Variant from spreading. One month of strict social distancing wearing masks and only essential travel will help Hawaii flatten the curve.. Vaxed and Unvaxex people can spread the Virus especially this Delta Variant. Positive cases need to quarantine with their entire family. I am opposed to Vaccine Passport because of the inefficacy of the ingredients in the Vaccine.

Written Testimony According to CDC a Vaccinated person carries similar viral load and can spread the disease the same as a nonvaccinated person. Vaccine supposedly only protects me from getting too sick and not the people around me. Therefore should not be mandatory. It is a discrimination to allow vaccinated people certain freedoms and deny the same freedoms to those without vaccine.

In addition to the below Nuremberg Code text I've provided, please also take the time to thoroughly read the constitution of the United States of America. What is being proposed is not only unlawful but discriminatory in every sense of the word.

THE NUREMBERG CODE

Written
Testimony

1. The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, over-reaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved, as to enable him to make an understanding and enlightened decision. This latter element requires that, before the acceptance of an affirmative decision by the experimental subject, there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person, which may possibly come from his participation in the experiment.

The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.

2. The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature.

3. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study, that the anticipated results will justify the performance of the experiment.
 4. The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
 5. No experiment should be conducted, where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
 6. The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
 7. Proper preparations should be made and adequate facilities provided to protect the experimental subject against even remote possibilities of injury, disability, or death.
 8. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.
 9. During the course of the experiment, the human subject should be at liberty to bring the experiment to an end, if he has reached the physical or mental state, where continuation of the experiment seemed to him to be impossible.
 10. During the course of the experiment, the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgement required of him, that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.
- ["Trials of War Criminals before the Nuremberg Military Tribunals under Control Council Law No. 10", Vol. 2, pp. 181-182. Washington, D.C.: U.S. Government Printing Office, 1949.]

Written Testimony

Forcing mandatory vaccination and testing is wrong. You are punishing me for having a religious objection to vaccines. I have been responsible and am masking and social distancing. When myself or my kids catch colds we stay home & test appropriately. It's frustrating that my efforts still aren't enough and now I'm being told I can't do normal activities such as take my children to the zoo which is where we have a yearly membership. It's not as simple to just go get tested. These lines are very long. Average wait times now are one to two hours. This will cause me only to just not go. I will not support any local restaurants by doing takeout either. The businesses will suffer more because of this ridiculous mandate and it needs to stop!

Written Testimony

Governor Ige please oppose this resolution. We the people of Hawaii want to retain our freedom and support the local businesses without being FORCED to vaccinate. Also I am concerned that vaccinated people, as we have now seen, can still contact and spread COVID! It would therefore be unreasonable and very difficult for businesses and customers to be forced to require a vaccine card to do simple everyday things. A far better and more reasonable option would be to require testing for ALL persons entering the state of Hawaii to ensure the disease does not continue to spread in the islands. Our businesses have endured far too much already and are at their breaking point. It is difficult enough to get customers to wear masks. It would be way more difficult (and impossible in my opinion) to require a vaccine card! We are workers just trying to survive and feed our families. We are not law enforcement! Thank you for your conscious consideration. Mahalo nui loa.

Written
Testimony

I have been aware that the mayor will impose a mandatory vaccine passport for restaurants, gyms, stores etc. The fight for medical freedom is LITERALLY to protect the choice people made for themselves, and not against the vaccine itself. Whether you are vaccinated or not is irrelevant! we the people are witnessing the most sustained, unprecedented series of frontal attacks against our rights and freedoms in our life time. This is wrong, this is against our American Constitution!!! There are many studies and research by scientists that the vaccine itself does not prevent you from getting COVID!!! Vaccinated people should also be subject to testing just like the unvaccinated due to this fact that the vaccinated still can get the COVID virus. This Resolution needs to be dropped ASAP!!.

Aloha! Thank you for allowing me an opportunity to share my concerns in regard to the vaccine passports. I am grateful for our state leadership in doing everything possible to keep the people of Hawai'i healthy and to stop Covid. However I believe enforcing vaccine passports is not the best way. It will cause unnecessary segregation and ultimately will harm business owners that are already doing everything they can to ensure people that visit their establishment, vaccinated or unvaccinated can safely partake of their services. Please find another way.

I am I'm opposition of the passport as it's in everyones right to choose to get vaccinated and business to accept business and the way they operate and to whom they wish to give services to not the law makers. Remember you have been elected to serve the people of Hawaii not the state of Hawaii and the financial incentives that the state receives thank you and aloha.

I strongly oppose Resolution 21-194. This is segregation based on medical status & it's wrong. If masks work then why is this necessary? Data shows the vaccinated can also catch and spread Covid. This is not science it's a complete overreach of power by our leaders. At the end of the day you are creating the world you will have to live in- is this really what you want for our children? It's one shot today but what will it be tomorrow? Please vote NO on this tyrannical Resolution.

I strongly oppose this resolution on a vaccine passport system because it has nothing to do with prevention of the spread of this virus and everything to do with government control.

The fact that the fully vaccinated can also spread the virus, should be common sense enough that having a vaccine passport has nothing to do with public health.

The CDC director, Rachele Walensky, in her own words, while in an interview on CNN related that the vaccines don't stop the transmission of the virus.

Written Testimony Here is her quote:

"Our vaccines are working exceptionally well," she said. "They continue to work well with delta with regard to severe illness and death, but what they can't do anymore is prevent transmission."

All this vaccine passport system would be doing is discriminating against a certain type of people based on their decision not to take a shot. Segregation of people.

Thank you for your time.

I oppose Resolution 21-194 based on the following: This is a clear violation of the 1st, 4th, and 14th Amendments to the United States Constitution. The First Amendment, which protects my religious freedom, cannot be abridged by a state level mandate. A vaccine passport diametrically impinges on my religious freedom and is a clear violation of this Amendment. Forcing this mandate on the people of Hawaii is a clear abuse of power by Governor Ige and the State of Hawaii. My voice will NOT be silenced. This is an egregious abuse of his authority and I will work tirelessly to oppose this Resolution. What he is proposing is criminal. Money and greed are the driving forces behind Ige's actions and the actions of this council. Your actions will ruin people's lives - young and old. Stop this NOW!!!

To require someone to show proof of vaccination is DISCRIMINATORY and an infringement on our Civil Rights. This is modern day segregation and I'm very UPSET that these council members (Tommy Waters and Esther Kia Aina) that were voted into office to uphold and protect our basic human rights came up with this idiotic resolution. This will only cause division amongst the people of Hawaii. This is NOT what "We The People" (that you represent) condone in any way. There are many facts that prove that the COVID-19 vaccine DOES NOT prevent the transmission or prevent any person from contracting the virus. FYI these facts are confirmed by the CDC (Centers for Disease Control and Prevention). Look it up.

For these reasons I OPPOSE this resolution.

Aloha,

Written
Testimony

I oppose Resolution 21-194. I believe that it is government overreach & medical discrimination to impose such mandates on the people of Hawai'i. Our elected officials MUST respect individual choice on the matter of what goes into our bodies. By creating such vaccine passports you are forcing good citizens out of being able to provide for themselves & their families. You are wrongly forcing good people out of society.

I urge you to respect freedom of choice & medical autonomy. I oppose resolution 21-194

I strongly oppose this bill. I thought we lived in a free country with the right to govern our own bodies. This is sounding a lot like what went in on in Nazi Germany with the Jews. Little by little their rights were taken away and then the horror that unfolded was catastrophic! We are headed in that same direction if this bill is passed. We will be punishing those that do not "comply" this is no longer about the health and safety of the local people it's our government officials and those in office exercising their power over the people while their pockets are being lined.

Written Testimony

I am a mother and resident of Hawai'i. I strongly OPPOSE RESOLUTION 21-194! The medical DISCRIMINATION and segregation that will occur if RES21-194 is passed is simply horrific and wrong. If creating a digital vaccine passport program for private industries to restrict an individuals access to employment, business establishments, and other venues and places of public accommodations this is BLATANT discrimination. It will lead to major issues for the entire population and create more of a divide. Have we not learned anything about discrimination and segregation from the civil war? What happened to the aloha?

I choose medical choice and freedom. I hope the government officials will side with we the people in allowing ALL people regardless of their injection status the right to work and enter businesses. As far as I know Hawai'i state wasn't a dictatorship. I could do what I want to my body. As far as I know individuals still had the right to choose my body, my choice when did this all change? Please stop the insanity and clear violation of constitutional rights.

I am not ok with a vaccine passport. First off, vaccinated or unvaccinated we all can catch Covid and spread it. Singling out just unvaccinated having only unvaccinated test makes no sense. If that is a rule then vaccinated should also have to test to see if they have Covid or not. Second, I feel it is abuse of power making it a state of emergency. Third, only locals are being penalized for the spread of Covid but not the 100,000's of visitors who come in weekly enjoying our island. Finally, Covid is a virus and we can not run away from it therefore business should not be penalized by possibly having to shut down due to your new mandates. People work so hard to sacrifice and keep their businesses going.

Aloha,
I live and work on Oahu for 8 years now.
I strongly oppose the mandate for a digital vaccine passport in Hawaii. This is a fascist tool for control over the population and in my opinion has nothing to do with the health of the people here. Hawaii is a US state and belongs to a free country. You can not mandate or vote into a law a medical procedure but even more, do so with one which has "death" listed as a possible adverse reaction! Transmission of covid happens just as easily among vaccinated individuals. Vaccinated residents are just as likely to contract it as well. The official data from CDC shows that the only thing vaccines do is lessen the symptoms of the disease when the person contracts it. So where is the logic to even require us to get vaccinated?
Also, the world is watching you!!! And we will remember on what side of the history books you are gonna stand today. Chose wisely I suggest!
Mahalo

Written Testimony

I strongly oppose vaccine mandates for those choosing to use restaurants. You have not taken to account those who have natural antibodies from having Covid. What about the financial impact this will have on small businesses. This is absolutely the wrong way! Taking away our liberties will make people choose to live elsewhere

Written Testimony

I am a lifetime 69 old woman that I am strongly against this resoluton. Do we still in America? It is unconstitutional to share my medical information and in violation of HIPAA. Where is the science behind this decision. Businesses are already struggling and you put this added burden on them, businesses will not survive. Vaccine people can still transmit Covid! Where are the measures that you, Government are taking to educate the people to become healthier and build ones immunity system. All you have done is divide the community and cause more division. There is no science behind this decision. It is my constitutional right to refuse the vaccine.

Please do not pass this resoluton. Government works for the people!!!!

Written Testimony I am strongly OPPOSED to this bill. There is no need for the government to overreach into the lives of people and the local businesses. Mandates such as these cause further division and segregation that will only hurt the economy of Hawai'i. I hope that you all can listen and work with the people to come up with better, healthier lifestyle solutions, to heal our land and our people.

Written Testimony I oppose any law that discriminates between those who choose to take a vaccine and those who choose to not take it. This is discrimination and is against all human rights known to humanity. Any type of immunity passport will create two separate societies - those who have access to what they need to live freely and those who are no longer allowed to live freely. I strongly oppose 21-194!

The “vaccine passport” is a violation of my constitutional rights. It is also a HIPAA compliance violation. This bill takes away my freedom to choose what’s is the best interest of my family’s health and well being and the status of my business. I do not want my personal information being shared without my consent. As a tax payer of this great state this is unacceptable and our leaders need to be held accountable to what they swore in office to do! I do not support these types of forced agendas.

I have no idea who Tommy and Esther are, nor do I understand why their FEAR:

F alse

E vidence

A ppearing

R eal

has caused them to even suggest or write a resolution that RESTRICTS THE FREEDOMS GUARANTEED by the Constitution of this country. I am DEEPLY OPPOSED to Resolution 21-94 and it's restriction based on the FALSE INFORMATION purposefully being spread by mass media and lies compounded by the coivd crises.

Written
Testimony

First of all covid 19 is a part of the covid series that was CREATED in the laboratories of UCSD (University of California at San Diego) in the 1970's as has been reported by a retired pathologist who helped create the covid series. His report that Sars and Mers, were a part of that covid series as well, serves to prove that this militarily funded germ warfare has always been purposeful in it's intent to harm via germ warfare.

The TRUTH that covid 19 is a flu virus with 99.9% recovery seems to have been lost in all of this ignorance that has developed since the military tested this germ warfare in China where (supposedly) covid 19 began. (Another instance of militarily controlled lies regarding this germ warfare).

As a graduate of UHH with a degree in Poli Sci with High Honors (1977), and as a past organizer of political action, including as a Civil Rights Worker for CORE in 1965 and other major political movements in this country, I am well aware of how FEAR is used to conquer and extinguish truth in this country.

The fact that a woman with a Hawaiian name would even think to suggest that we limit the

rights of others by law to move about freely in this state is ludicrous, especially since the military STOLE THIS COUNTRY from the Hawaiians for it's own military defense purposes.

Furthermore, it is a well known truth that those behind this purposeful FEAR INDUCED MANIA are about population control and they seemed to have captured the brains of these two individuals sponsoring this resolution.

Further, covid has been introduced purposefully to DIVIDE and CONQUER, of which it has done an excellent job. This country now stands greatly divided by those bound by FEAR and those of us whose minds are not swayed by lies and sly military control mechanisms.

I IMPLORE YOU FOLKS to NOT pass this resolution or any other future ones based in the desire to control and limit the rights of this populace.

This resolution SMACKS OF FASCISM which is slowly being accepted in this country by FEARFUL PEOPLE who suggest such rabid resolutions as this one.

I ENCOURAGE those of you who have been elected by the populace to keep in mind that LIMITING THE RIGHTS OF THOSE OF US WHO ARE NOT BOUND BY FEAR is against what this country SUPPOSEDLY stands for...THE RIGHTS OF THE PEOPLE.

This resolution clearly states that the right to go to certain businesses, etc. be limited to those of us who are not ignorant enough to take an UNTESTED vaccine that has even failed to prevent those vaccinated from contacting covid.

ENOUGH, ENOUGH, ENOUGH!!! PLEASE do not pass this resolution and continue to play into the hands of those steeped in FEAR who would use these FASCISTS METHODS of control and denial of rights to the general population.

Mahalo nui loa for listening to my opinion and may what I have said here cause you to pause and NOT validate the FEAR that this resolution is based upon!!

PLEASE DO NOT PASS THIS RESOLUTION NOR ANY OTHER LIKE IT THEY MAY COME UP IN THE FUTURE!!

Written Testimony We the people should decide what we can and can not put into our bodies. Even with this so called world wide pandemic. This vaccination has not have enough hard facts and evidence to back up it's effectiveness. If anything it's only showed that people that are vaccinated can still get the virus and spread the virus and or get very ill and still pass just as unvaccinated. The side affects of this vaccination out ways the seriousness then the virus itself. I had the virus and I also believe my immunity is alot great then those whom got vaccinated....

Aloha, I'm strongly opposed to vaccine passports given that A) it's just wrong B) the vaccine doesn't even prevent the spread and mutation so it's frivolous C) this is an illegally occupied sovereign nation and enforcing any laws, especially one as draconian as this, is a war crime; genocide. I've also been forced to take injections of drugs against my will that served to purpose besides to control me, and this is not going to happen again. Much love, kill yourself . I'd also like to add that Hawaii gov websites are intentionally hard to use, so fuck you for that too. Peace

Kupuna Housed

Aloha,
My Problem with The Passport
a. False immunization
b. Re-infection
c. re-enacting segregation
d. unvaccinated children
e. violation of HPPA law
f. 8,000 + Homeless Due Process
g. Tourist passports ?
h. Elders and sickly that cannot take vaccine
h. Unconstitutional

Written Testimony Does this State have the man power to distribute this passports in a timely manner to the millions of people on this island . (Both tourist and Residents) ? This is see as big mess that will cost millions of dollars, cause segregation, it's unconstitutional, and it's in violation of HPPA law. The State. Ann make laws and them break them, the state cannot swear on the constitution and then act in manner as if it is irrelevant. The States job is to ensure law, lively hood and safety for all residents. Why spend money to do a passport that will cause a much greater problem when all you have to do is shut down for at least 20 days to a month . Covid is active for 10 days in a person... if we lock down for a month everything should come to a halt. This is much wiser then spending millions or billion for a passport that will cause influx in disease due to false immunity and a symptomatic carriers who have passports .
The Hospital will be able stabilize, Business, schools etc. can sanitize and prepare better ! Shut down is the only way to bring The wide spread at a halt. Choose wisely you could be saving your own family

members life ! Remember all of our children is at risk, there is no vaccine for them.

Written Testimony This creates different classes of citizens, much like the Jon Crow laws. This eliminates people's ability to make their own health choices and further to keep those choices private.
Further, to force people of this community to become policing agents against each other creates tension, violence and ill will among citizens.

Written Testimony Segregation of any kind is unacceptable and wrong.
Do not let history repeat itself.
This is not a "pandemic of the unvaccinated"
It is a pandemic of people who have preexisting conditions (97% of people currently in Hawaii Hospitals have preexisting conditions.)
This proposal will hurt business and cause so many unintended consequences.
We need to work together during trying times.
Please do not divide our society.
NO HATE IN THE 808

I disagree with vaccine passports as it removes our freedom to choose. as a result of the passport it will force many to get a vaccine in order to enjoy the liberties of freedom. That is wrong. This genocide of experimental poison must stop. Close the port of entry so Hawaii will be safe again. Find other ways to support the economy because tourism is not it. Shut it down , put the lives of thepeople here first before foreigners.

I oppose this bill. Just, NO!
We have been made aware that those with vaccines can contract and spread. So, the point of this is...???
It's wrong. On every level.
You know it.
We know it.
We, the people, will make all the noise.
Because you, the few, have failed us.

Written Testimony We all know that a vaccine passport does not make sense. Why else would you let 11 year olds and younger...go to a restaurant or to school or any public place if they can catch covid or spread covid? If covid really was a danger...you would make them stay home just as much as any other unvaccinated human being.

Governor Ige please oppose this resolution. We the people of Hawaii want to retain our freedom and support the local businesses without being FORCED to vaccinate. Also I am concerned that vaccinated people, as we have now seen, can still contact and spread COVID! It would therefore be unreasonable and very difficult for businesses and customers to be forced to require a vaccine card to do simple everyday things. A far better and more reasonable option would be to require testing for ALL persons entering the state of Hawaii to ensure the disease does not continue to spread in the islands. Our businesses have endured far too much already and are at their breaking point. It is difficult enough to get customers to wear masks. It would be way more difficult (and impossible in my opinion) to require a vaccine card! We are workers just trying to survive and feed our families. We are not law enforcement! Thank you for your conscious consideration. Mahalo nui loa.

Aloha,
I wanted to testify to the illegitimacy of this bill. requiring Health cards for functioning in a society is unconstitutional and should not be supported. This is an act of medical segregation, only I and my doctor are allowed to know what is on my medical records. should any restaurant, gym or high potential infectious business be able to see into my medical choices. NO. Should anyone be able to ask you or know wether you have aids or not?
Everyone should be responsible for their own body and own choices. If they feel that they need the vaccine then they should have a choice, not forced to do so. You are elected officials and should act as representatives of the people not acting for your own best interest.. People should have the choices!!

Aloha,

Written Testimony

As a resident of Hawaii I STRONGLY oppose this Bill. Our state, our family owned businesses, our people rely on the community as a whole to stay afloat. They do not discriminate. We are all one when it comes to supporting our economic future. This Bill will fracture in epic proportion the welling being of our businesses and the people. Please NO to this Bill, our state has suffered enough.

Written Testimony

We do not need a digital passport to restrict activities. What we need, now more than ever, is a greater understanding of this virus, the 6 month track record of lockdowns/no early treatment/vaccinations and a clear understanding of the utter lack of early treatment protocols that have been ruthlessly suppressed by media and public health authorities in FDA and CDC.

Please do some research on the results of the vaxx campaign in Israel (highly vaxxed population) and how the safety and efficacy of the vaxx has been demonstrated to be poor at best.

A vaxx passport will do what, exactly? Vaxxed people can contract and spread the disease. Not only that, they may be non-symptomatic thus leading to 'super spreader' distinction.

Please take a good look at the huge effectiveness of early treatment protocols in India and Mexico City, and notably our own State of Florida.

Governor DeSantis, three weeks ago, opened Early Treatment Clinics throughout Florida offering monoclonal antibodies with huge success. Even Dr. Fauci approves of this, thus raising the question:

Why aren't we doing this in Hawaii?? Think about it; we could showcase, to the world, how effective early treatment is!! Why not? Isn't this better than doubling down on a failed strategy of:

1. Fear
2. Suffering
3. Vaxx

A year ago we knew about effective preventative and early treatment protocols using a 'cocktail' of zinc, Vit C/D, Quercitin, Ivermectin and Hydroxychloroquine. These have been shown to:

1. do no harm
 2. HUGE effectiveness is administered early
 3. inexpensive and home based treatment
- Japan's Minister of Health has recently advocated for use of Ivermectin nation-wide. We need to do the same.

AGAIN: why don't we embrace these protocols that work?? Please visit Front Line Doctors at www.flccc.net for information on prevention protocols as well as protocols for the three stages of the disease.

In closing, I do not support your initiative for vaxx passports, and I encourage all of you to consider my suggestion. Why not be leaders and show our fellow Americans, and others, how it's done with early treatment??

Sincerely,
Thomas C. Yundt

Written Testimony

How can you mandate a Covid-19 vaccination with less than 1.5 of study. Don't you realize everyone should have a choice. Not everyone body will react the same and people know that and that's why they refuse to take the shot. Why don't you allow more study to take place and then the people will make their own decision. Are you the government/employer willing to sign a liability if something was to happen to someone that was " FORCED " to take the vaccine. I highly doubt it because you guys will turn it and say you signed to get it. Like no we had no choice but to sign and get it because then we'd be discriminated against. How does that make sense.

As a citizen of the state of Hawaii that will eventually be affected by your actions, I wish to state my opposition to any vaccine mandates or passports.

As American's we have the right to body self-autonomy.

It is also not right to impose the enforcement of your mandates on the businesses of Hawaii who are struggling just to survive.

Written Testimony

These mandates are an unconstitutional deprivation of liberty without due process and is a critical issue to me and my family. It is unconscionable that American's freedom of movement is threatened in an attempt to force people to take an injection against their will. We will be watching how you all vote.

We oppose vaccine mandates and passports and demand you vote "no" on these issues.

once, the rate of transmission drops precipitously with the expansion of vaccines to those who want them, and natural immunity among those who have already endured COVID, then vaccine passports are going to be a needless hurdle for those already disadvantaged. It creates medical segregation and discrimination for the people. Please review the number of deaths from 2018-2020, for a "Global PAndemic" why are the numbers in 2020 not that much higher than 2018 or 2019. <https://files.hawaii.gov/dbedt/economic/databook/2020-individual/02/022020.pdf> Like the last pandemic this too will work its way through the population. Please stop the madness. Please stop rushing through legislation that will separate the people of Hawaii.

Agenda Item Covid-19 Health card
Your position on the matter Oppose
Representing Self
Organization

Written Testimony This resolution opposes fundamental rights of autonomy and self governance. The United States is not a fascist country yet. This resolution is similar to what happened in pre- Nazi Germany. I totally oppose this type of governmental overstepping into the private lives of individuals.

Written Testimony

I am vaccinated, but I think a vaccine passport program is a terrible idea. It's clear to me that The mayor's program will have no impact on infection rates because of the exceptions like the 15-minute rule, etc. No one has presented data showing that spread is caused by restaurants. This is a thinly-veiled attempt to force vaccination on those who don't want it. Please use the data and find ways to ENCOURAGE vaccination on the north shore and the west side. Please use the data you already have to see what is causing the spike in hospitalization (hint: it's not restaurants!) and find ways to address the actual causes. I favor vaccination personally, so I am vaccinated, but many people are afraid of it, doubtful it works, live or work far from vaccination sites,, or angry about being forced. Please don't pass this and instead commission UH researchers to objectively identify sources of spread and a mitigation plan that doesn't force vaccination.

Respectfully submitted,

Kathleen Moses Benson, concerned citizen and business owner

Written Testimony

First the idea of stopping the spread of COVID19 by vaccination is a false and a fallacy. The science has shown that vaccinated people carry and spread COVID19 in the same way that unvaccinated people. All travelers visiting Hawaii should provide a negative test result. Second, vaccines only help an individual's immune system protect from the virus. Getting a vaccine is a choice and as citizens of the United States people have the right to choose. Furthermore, the COVID19 vaccine may not be safe for some people and not everyone has access to a test on a regular basis every three days or week. If this vaccine is effective, then a vaccinated individual should have no worries about being near an unvaccinated person. Finally, a vaccine passport is the path down a very slippery slope to removing the rights to freedom of movement which I believe is protected by the constitution. Coercing people to take a medical treatment, be it a test or vaccine, in order to perform daily tasks such as shopping or dining is a huge violation of personal liberties. If an individual or business wants to restrict their patrons to only vaccinated individuals, this should be a choice indepent from government influence, oversight or mandate through law.

Written Testimony

I am strongly opposed to a Vaccine Passport! As a mother and resident of Hawai'i, I am appalled at the idea of segregating and discriminating against any member of our society. A vaccine passport will merely be another tool to **DIVIDE** and what our state needs now, more than ever, is transparency and **TRUST** in our community leaders. This will do anything but!

I have spoken to a number of people who have chosen not to be vaccinated for medical or religious reasons. The more mandates are pushed, the further people's distrust is cemented. It's creating such a divide in this state. People are unable to provide for their families due to the economic toll this has already taken. This will make it worse. So much worse. The mandates and over-reach of leaders in the state are what is making everything fall apart!!!! How can you not see this???

The majority of my family live in NYC where passports were already implemented and the economic toll is disastrous. In addition, store, restaurant & event venue owners are fighting back with lawyers that are all too happy to take on these cases...and are winning. The state will lose even more money once those lawsuits start here. Just make it stop already!!!!!!

Written Testimony

THIS IS UNCONSTITUTIONAL AND GOES AGAINST THE NURENBURG CODE
The voluntary consent of the human subject is absolutely essential. This means that the person involved should have legal capacity to give consent; should be so situated as to be able to exercise free power of choice, without the intervention of any element of force, fraud, deceit, duress, overreaching, or other ulterior form of constraint or coercion; and should have sufficient knowledge and comprehension of the elements of the subject matter involved as to enable him to make an understanding and enlightened decision. This latter element requires that before the acceptance of an affirmative decision by the experimental subject there should be made known to him the nature, duration, and purpose of the experiment; the method and means by which it is to be conducted; all inconveniences and hazards reasonably to be expected; and the effects upon his health or person which may possibly come from his participation in the experiment. The duty and responsibility for ascertaining the quality of the consent rests upon each individual who initiates, directs, or engages in the experiment. It is a personal duty and responsibility which may not be delegated to another with impunity.[13]
The experiment should be such as to yield fruitful results for the good of society, unprocurable by other methods or means of study, and not random and unnecessary in nature. The experiment should be so designed and based on the results of animal experimentation and a knowledge of the natural history of the disease or other problem under study that the anticipated results will justify the performance of the experiment.
The experiment should be so conducted as to avoid all unnecessary physical and mental suffering and injury.
No experiment should be conducted where there is an a priori reason to believe that death or disabling injury will occur; except, perhaps, in those experiments where the experimental physicians also serve as subjects.
The degree of risk to be taken should never exceed that determined by the humanitarian importance of the problem to be solved by the experiment.
Proper preparations should be made and adequate facilities provided to protect the

experimental subject against even remote possibilities of injury, disability, or death. The experiment should be conducted only by scientifically qualified persons. The highest degree of skill and care should be required through all stages of the experiment of those who conduct or engage in the experiment.

During the course of the experiment the human subject should be at liberty to bring the experiment to an end if he has reached the physical or mental state where continuation of the experiment seems to him to be impossible.

During the course of the experiment the scientist in charge must be prepared to terminate the experiment at any stage, if he has probable cause to believe, in the exercise of the good faith, superior skill and careful judgment required of him that a continuation of the experiment is likely to result in injury, disability, or death to the experimental subject.

Aloha Public Servants,

Thank you for all you do for our communities.

I oppose Resolution 21-194 for a number of reasons.

It is unconstitutional, it is an infringement on our basic human rights as American citizens of a free country, it segregates people in our small island communities, it would put everyone on a digital blockchain, and most importantly, it is unethical and morally wrong.

There is absolutely no reason to implement this extreme measure except for power and control over the people, the people who elected you to protect and represent our best interests.

Written
Testimony

This resolution is not in the people's best interests.

Here is an interesting article for you to read from a Harvard Epidemiologist that Vaccine Passports are not necessary published 8/30/2021. Please take the time to read it.

<https://fee.org/articles/harvard-epidemiologist-says-the-case-for-covid-vaccine-passports-was-just-demolished/>

Mahalo for your time and may God guide you in your decision making.

Sincerely,
Sherry Wong

Dear Council Members,
Considering that both Unvaccinated and Vaccinated persons can both catch and pass on Covid 19 and it's subsequent variants it is completely discriminatory to deny access to any venue, service, or employment based on vaccination status. Please be on notice that the county and state will be held liable for any discrimination committed by local or state governments. Since this resolution would disproportionately affect citizens of Native Hawaiian ancestry it will be a clear violation of Article I, Section 5 of the Hawai'i Constitution.
Sincerely, Thomas B. Stanton

I oppose vaccine passports. This is not right and should be taken down. This is a form of discrimination and leads to segregation.

I think we all need a reminder:

seg·re·ga·tion

/ˌsegrəˈgāSH(ə)n/

Written Testimony

the action or state of setting someone or something apart from other people or things or being set apart.

dis·crim·i·na·tion

/dəˌskriməˈnāSH(ə)n/

the act, practice, or an instance of discriminating categorically rather than individually

Again, I oppose vaccine passports.

Written Testimony

I am writing with opposition to the proposed vaccine health pass. This health pass would put in place mandates which would restrict Maui family's from being able to access basic community services which allow them to buy food, eat with their community and exercise to maintain a healthy immune system, among others. Such discrimination and segregation of our community is against the very core of what we stand for here in Hawai'i and what we aim to model for our keiki. A health pass would also require revealing private health information to strangers, which once again, goes against our basic health and privacy rights. Please stand with us in opposing such a motion to further hurt and divide the Maui community in an already devastating time. Thank you.

Vaccine passports will hurt local businesses. A huge portion of the population will not be using in person business once this begins. It also forces business that do NOT agree with these policies to hurt themselves and their clients in order to follow the mandates against their value system. Separating the vaccinated from the unvaccinated is also DISCRIMINATION. You know each business will probably need security or bouncers to forcefully turn away patrons who refuse to leave, right? Where will it end? I didn't need to show proof of my measles vaccination or my Hep A vaccination during those recent outbreaks in the islands nor do want to. I have rights to medical privacy. You cannot force me to disclose disabilities, my health records, my medications, or anything else personal to me. But, now I have to show proof i have a specific vaccine?! This is madness and this will create a snowball situation where if you force vaccines and/or punish/reward on either side of the choice now then you (gov) will do it again in the future. Before we know it the governmentis controlling everything we put into our bodies. These policies will be promoting segregation, discrimination, and taking away our medical choice. This is America not a dictatorship. Stay in your lane and leave our private medical information private!!! On top of all these rights issues, I am sure you are aware that vaccinated people can catch and spread COVID-19. How is only vaccinated people being inside of establishments going to stop any spread? How does this process benefit the plan of reducing numbers? IT WON'T. Please be reasonable, represent freedom of choice, and let businesses and people decide for themselves. Thank you for your time.

To All Whom It May Concern,

I am writing this message to let you know that I oppose RESOLUTION 21-194.

Written
Testimony

We live in the United States of America. A free republic, where many people have sacrificed their lives to maintain that freedom. The United States Constitution and the Bill of Rights protects our God given rights and freedom from tyranny and tyrannical dictators. Since March 2020, people in Hawaii and all over the world have been experiencing tyranny, from tyrannical lockdowns to tyrannical mandates, which are all unconstitutional, which means you are breaking federal law. It doesn't matter if we are in a pandemic. The pandemic does not get rid of the US Constitution. Now, we are facing tyrannical mandates to take the experimental China Virus vaccination and the China Virus experimental testing. When I say China virus it means COVID 19. All China Virus testing is still under Emergency Use Authorization. All but one China Virus vaccines are under Emergency Use Authorization. Pfizer-BioNtech, Moderna and Johnson and Johnson vaccines are still under EUA, which means that it cannot be mandated. The only vaccine that is approved by the FDA is the BioNTech "Comirnaty", which isn't available for the public. I only said BioNTech and not Pfizer-BioNtech. So that means the Pfizer-BioNtech China Virus vaccine has not been approved.

Did you know that BioNTech is a German company that has partnered with CHINA, Communist China, where the China Virus came from. So you are mandating US citizens to take the enemy's vaccine.

Did you know that the NAZI's placed yellow stars on the Jews, to distinguish them from Non-Jews, before sending the Jews to the concentration camps and ultimately to their deaths?

The China Virus vaccine passport is exactly like the yellow star. Is the government of the state of Hawaii, Governor Ige, Lt. Gov. Green, and the Mayors for each island, Nazi's? Because you are mandating these orders like a NAZI and following orders like a NAZI.

After the genocide of the Jews after, WW2. The Nuremburg code was created to stop the coercion of scientific and medical experimentations. You are repeating what the NAZI's did in WW2 and are literally creating a genocide by mandating the China Virus Vaccine and the China Virus testing.

For the CHina Virus testing, the swabs come from China, and are sterilized in EO or ethylene oxide, which is carcinogenic, a sterilizing agent, and damages DNA. A quick DuckDuckGo Search can show you the effects of ethylene oxide. China is communist, or the enemy. Using Google is will give you one sided skewed leftist results.

For the China Virus vaccine, it is still under EUA, so you are breaking federal law mandating the vaccination through coercion. You are coercing people by putting their jobs on the line to take a vaccination from a virus that has a survival rate of 99.997% for 0-19 years olds, 99.98% for 20-49 year old; 99.5% for 50-69 year olds, and 94.6% for 70 years old and up, per the CDC. There are tens of thousands of reports, that have been reported to VAERS about adverse event that happen from getting injected with the China Virus vaccination, such as:

Guillain Barre syndrome
acute disseminated encephalomyelitis
transverse myelitis
Convulsions
Seizures
Stroke
Narcolepsy
Cataplexy
Anaphylaxis
Acute Myocardial infarction
Myocarditis
Pericarditis
AIDS
HIV
Death
Pregnancy and Birth outcomes
Non-Anaphylactic allergic reactions

Here is a link for the inventor of the MRNA Vaccination describing the possible adverse reactions of the China virus vaccine and the bait and switch FDA approval:

<https://rumble.com/vlmqlb-malone-shocker-msm-lying-about-fda-approval.html>

Which leads to the treatments for the China Virus, there are many frontline doctors, such as the Americas Frontline Doctors, that provide scientific studies and experience when it comes to treating the China Virus.

<https://americasfrontlinedoctors.org/treatments/>

I dont need a medical or religious exemption for me to not take the China Virus vaccine. The lord, GOD has vaccinated me with his blessings and healing power and his God given rights to not take the vaccination. It is my God given rights that is written in the United States Constitution that protects me and the people of the United States of America for mandatory coerced China Virus vaccination and viruses, so there is no reason for the need of a China virus vaccination passport.

To the Governor, Mayors, current and future politicians; We the People are the boss of you. The power you have is arbitrary. You get your power from We The People, if you abuse your power, We the People will remove you.

I am opposed to Resolution 21-124. I have been a Registered Nurse serving the state for over 20yrs. I believe this Resolution is infringing on our inalienable rights as children of God and is down right discriminatory! As well, I have worked so hard these last couple of years working overtime and putting my family second to help deal with the increased staffing needs, and for what!? To now be told that I am dispensable!!? Is this how you treat your own people? I Pay my taxes, don't milk the system, stay healthy, am of service to my fellow man, state and country. And now I'm in jeopardy of losing everything I've worked so hard for. This Resolution will potentially make me lose my livelihood, my house, my security, my right as an individual to choose my own health care! This is wrong in so many levels. This is illegal! This will destroy our state! Pleased please listen. Listen to the people of this state. The people that live and love this state. Please. I pray that our dear lord and savior Yeshua Adonai soften your hearts and are fill you with the fruits of the spirit. God bless Hawaii.

I oppose vaccine passports. This is not right and should be taken down. This is a form of discrimination and leads to segregation.

Written Testimony I think we all need a reminder:
seg·re·ga·tion
/ˌsegrəˈgāSH(ə)n/
the action or state of setting someone or something apart from other people or things or being set apart.

dis·crim·i·na·tion
/dəˌskriməˈnāSH(ə)n/
the act, practice, or an instance of discriminating categorically rather than individually

Again, I oppose vaccine passports.

To My Council Members,

Written
Testimony

Aloha! I am respectfully requesting for you to not mandate a digital vaccine passport program. I understand the need to control COVID numbers and to save lives. I am a survivor of COVID myself. I am not anti-vaccination but am against imposing any type of requirement on private citizens that would restrict their freedom to shop for dinner, eat at a restaurant, and move freely throughout Oahu. It is against our Nation's Constitution that any establishment, whether it's a private or a government, to discriminate against a person based on their right to choose what they want to do with their body and their right to medical privacy. I kindly ask you to not develop, implement, and mandate a vaccine passport program for Oahu's residents.

Thank you and if you have any questions, please don't hesitate to contact me.

Respectfully,

Tara Gallego

I do not agree that the state should make the vaccine card mandatory in order to enter businesses or restaurants. That's an invasive into our medical privacy and is against the law. We have a right to keep that information private. Also, it is a choice to get vaccinated or not, and no matter which one we choose to do no one should be discriminated against. The state should focus on bring back the mandatory negative tests to enter the state, vaccinated or not. Ever since tourist were allowed to enter with just a vaccine card the numbers of positive cases has gone up. The science has proven even though you get the vaccine you still can contract Covid. The state needs to think about the safety of its residence rather than putting tourists first.

Written Testimony

Aloha,

I am shocked that this is even a proposal. Have we not learned from History? Kalaupapa? The torture, humiliation and damage that it did to families and the community of Hawaii? This is not a solution. This will be segregating our community. Driving people to turn on friends and family. Ripping family members and friends apart in a time when we need to support each other and come together more than ever. I live alone and I already feel the mental exhaustion and affects from this divide. Suicide is already on the rise due to isolation and segregation. Do we need more people to suffer and die from mental health issues? Haven't we lost enough lives from COVID19 already? A community that is known for loving each other....Wrapping our arms around each other in times of need. Adopting one another as a hanai family member when it is needed. This is NOT Hawaii. This is NOT Aloha. This is NOT a solution. It will not protect people from Covid. CDC has confirmed that vaccinated people share the same viral loads. Why aren't we implementing more travel testing to protect our islands? For Vaccinated and Unvaccinated? We let almost a million tourists come rushing in and immediately numbers rise. This is not a local only problem. Our government needs to protect our state, not by segregation division and coercion. I am hurt by these mandates, my friends and families are hurt and businesses are hurt. How many more small businesses can we lose? This is NOT what the people want. If you gave restaurants and gyms and businesses the vote to decide to check a vaccine card, the majority will vote NO. They are SICK to have to either discriminate or lose their lifelong business they built with blood, sweat and tears, Not to mention, how will we support ourselves and pay our bills This is supposed to be America. The land of the FREE. Where is the FREEDOM of Choice? Where is the right to VOTE? America was built on these freedoms and now you are tearing down the foundation of our Country and Constitution. This is ILLEGAL and UNCONSTITUTIONAL. I personally got COVID19 in January of 2020. Too early to test. I have natural immunity that has kept me healthy since the beginning of the pandemic. In addition I have an autoimmune disease that is triggered by inflammation, stress and unknown causes. I am thankfully in

remission. I have been SO sick more than half of my life. I am more terrified of being that sick again on immune suppressant drugs, than getting COVID19 again. I can't risk being so sick I can't work. I am alone, so who will take care of me? Who will pay my bills? I cannot go back there again. I have been in tears for days thinking of what might happen if I am forced to get the vaccine or lose my job. It is not a choice. I chose health over wealth. I hope you can see the humanity through my story, which is one of many. If I felt the vaccine would be safe for me, I would take it. Many vaccinated people around me are getting COVID and I remain healthy. I have a low immune system and yet...I remain healthy. This is my right as a human and an American citizen to choose what is best for my health. I care about other around me as well. I have been an essential worker all through COVID and kept my clients and elderly grandparents safe from COVID. It can be done and has been done. Thank you for taking the time to listen to my story. I am only one of many. Many that are sadly afraid to speak up.

Aloha!

I am in opposition for vaccine passports to be implemented here in the "ALOHA" state. Vaccine passports is the modern form of segregation and it will cause a division amongst all residents in the state that we all love so much. Hawaii is known for its melting pot of people that has come together to live in harmony. I want to ensure that Hawaii's people continue to show LOKAHI to each and every person. In order to do that, we must stay in opposition of this dangerous bill to be passed.

Very Respectfully,
Amber Delaney

This is an unconstitutional mandate that is doing more harm than good to the community of Hawaii! You will possibly displace thousands families and children due to loss of income and isolation from society. This is not a resolution. You will break the lives of many hard working people who have done their best to contribute and survive in this economy..... an economy that already has its challenges and extremes with cost of living and overcrowding. You are placing an attack on all disciples of the people of Hawaii, from cashiers to medical doctors and everyone in between. This is a completely unreasonable proposal and should be withdrawn now! We are already in a state of emergency and despair as it is, and a mandate like this only spiraling the catastrophe. You are tearing our community apart at a time when we need to work together. WHERE IS THE ALOHA!?

I write in opposition to the vaccine passport. This vaccine passport crosses the lines of protecting private health insurance information. Additionally, no one should be telling anyone what they should be injecting into their bodies. I am sure that you wouldn't want anyone forcing you to inject something into your body that you didn't agree to, right?! As a leader it is your duty to LEAD. This doesn't mean leading by creating division based upon the DECLINE or AGREEMENT of taking a vaccination shot.

There are so many unanswered questions and the push and shove to make the vaccination a mandate does not help, it just heightens ones anxiety. It frustrates many of us who you have failed to listen to.

It is a scientific FACT that both vaccinated and unvaccinated people can carry and transmit the virus. What sense is it to only punish those who choose to DECLINE (not refuse) the vaccine? If the vaccine worked as you all said it does... why do we still see vaccinated people in the hospitals? Why do we see vaccinated, but positive, travelers and residents alike allowed freedom? You want to punish the unvaccinated for making a choice that best fits THEIR ohana? How is that morally or ethically correct? Some CANNOT because of underlying health conditions. Punish them too for being unvaccinated?

Please take a big breath and fight for your people to be free. You keep restricting locals but never the tourists.

Wanna know why our numbers are high? It's not that locals are the problem. It's these tourists who are vaccinated but still positive and carrying the disease and spreading it wherever they go...all the while not being tested because they simply have this vaccine passport. Make it make sense. Punish the unvaccinated. Let the vaccinated, but positive individuals roam free. Tourists in the thousands attending luaus and whatnot...no sports for our kids. September 13 you want to implement new restrictions concerning groups but still keep our children in school. Make it make sense. I am in STRONG OPPOSITION to the vaccine passport resolution.

I strongly oppose a digital vaccine passport program as well as any and all government implemented mandates that infringe on my personal health decisions and constitutional rights. These programs are divisive and dangerous to our democracy and lack data and evidence to back their false claims of security and safety. I am not opposed to the vaccine itself however the governments blatant disregard for our rights to be allowed to individually make our own health choices and keep those choices private, with this egregious over reach of power is invasive and worrisome. I fear much bigger societal issues and economic downfalls will come from these mandates, than any good it could possibly bring to public safety.

This is an absolute overreach of the local government and an violation of the civil rights of the citizens of this island! This proposed resolution will cause further divide and segregation of the community. It puts our kapuna and low income families at a disadvantage. They may not have a smartphone, know how to use it, or even afford one due to their finances. For people who don't want to get the vaccine, the out of pocket cost to test every 48 hrs will put an BURDEN on them should they choose to continue to exercise for their HEALTH! Or large families who might have religious beliefs against ANY vaccinations...how is a family of 6 or 8 is going to pay for testing prior to going out to dinner so they can celebrate a special event?!?!?! Let alone a persons has the RIGHT TO CHOOSE what they want to put into their body or not put in their body. There is evidence to show that the vaccines are not effective a reducing the spread of Covid 19. The CDC has stated that the vaccine ONLY protects against severe infection, hospitalization, and death. They report as well that VACCINATED people carry and spread the virus and can remain asymptomatic. There are also a MULTITUDE of adverse affects from the vaccine. I have worked in healthcare for almost 20years and from my experience and the information I have been researching...these vaccines are NOT SAFE! They have not followed standard protocol for development and testing like every other medication and vaccine has in the past, which is typically 5-6 years minimum. People are dying and being harmed by these vaccines. The Comrinaty vaccine that was approved this last week is NOT EVEN AVAILABLE in the market for use....it is still in production. It is evident with the lack of transparency from our leaders, government and media this last 18 months that is in NOT about SAFETY, it is about CONTROL! This is another political ploy by government leaders to remove our Civil Rights for their own selfish motives. I ABHORENTLY oppose this resolution and the ABUSIVE treatment the people have endured by this Counsel in any matter related to this proclaimed "pandemic".

I am appalled that this resolution has even been introduced to our state. Discriminating and segregating based on vaccination status? Vaccines that do NOT prevent transmission? Getting vaccinated is a personal choice. Not something to be broadcasted or punished for not having. Has our state leadership completely lost their minds? It has been scientifically proven that vaccinated individuals are the super spreaders of the virus, as they carry a higher viral load, without showing symptoms.
Obviously politics and money is behind the push, how can they possibly say its for public health. OBESITY is one of the top contributing factors of covid hospitalizations, if you really care about public health, BAN fast food, soda, smoking, alcohol. Enforce VITAMINS not PAPERS.

Mandatory digital vaccine passports to restrict individual access to employment, businesses, venues and public accommodations are an **INFRINGEMENT** of **BASIC HUMAN RIGHTS** and make **ZERO** sense based on recent science studies.

Covid vaccines **DO NOT** prevent infection or transmission (as **CONFIRMED** by the CDC), and were never designed to do so. Natural immunity is far superior and longer lasting compared to vaccine immunity (as explained in several recently published peer reviewed scientific journals and as shown in real world data throughout the world).

Written Testimony

Known vaccine safety and efficacy is currently only based on a mean 4.4 months of data (according to Pfizer's most recently published clinical study with a data end point of March 2021) and the vaccine **DID NOT** show a statistically significant reduction in severe covid, hospitalizations, or death. In fact according to Pfizer, more people died in treatment group compared to the placebo group. In real world data, vaccine efficacy waned to 16% by the 6th month in Israel, and 0% by 6th month in Qatar.

For all those reasons, I **OPPOSE** this resolution, and I'm very disappointed in councilman Tommy Waters (whom I am a constituent of).

Written Testimony I don't agree with the proposed bill. It is segregation and discrimination, and it is wrong. I know so many people who were vaccinated with an experimental vaccine just because they felt pressure, that is coercion. The community and families are being torn apart. Fear is controlling everyone. It is sad to see our state turning to this.

Testimony

This proposed vaccine passport mandate goes against our constitutional rights and laws. Due to the fact that the vaccine does not stop the contraction or spread of the virus this scientifically and ethically makes no sense and is a form of discrimination. Any individual can spread Covid as much as someone who is vaccinated. Forced vaccinations is illegal and should not be considered to pass.

I write in strong opposition of Resolution 21-194 Urging the City Administration and the State of Hawai'i to implement a COVID- 19 health card for establishments at higher risk of transmission of COVID- 19.

The very same day Mayor Blangiardi announced this directive multiple news stories concerning the futility of vaccine passports came across the news wire.

Harvard Medical School's Martin Kulldorff notes research showing natural immunity offers "exponentially more protection than vaccines means vaccine passports are both unscientific and discriminatory".

Written Testimony Additionally, even the CDC admits research shows vaccinated individuals still get infected with COVID-19 and carry just as much of the virus in their throat and nasal passage as unvaccinated individuals.

Clearly Covid 19 Health Cards do nothing at all but harm citizens and provide a false sense the government is doing something.

Data shows the number of deaths from Covid, although sad and heart wrenching, is largely from subsets of the population with co-morbidities. A Health Card would only serve to further impede trust in our Gov't and do nothing with regards to the actual spread of the largely survivable virus.

I implore you to leave these health care decisions to individuals and not mandate citizens participate in a large scale experiment.

Aloha,

There was a suicide in Kona today whereby a vaccinated man's health started deteriorating shortly after receiving the COVID shots. He shot himself. After the jab, he lost the ability to function as a normal human being. One of many post-vaccine casualties to come.

These vaccines are patently unsafe as can easily be researched on the site: openvaers.com.

To mandate a digital health pass that requires proof of vaccination is a violation of our God given rights to move freely. There is no proof that the SARS-COV2 virus or the DELTA variant even exists. They have never been isolated using the scientific gold standard of Koch's and River's postulates.

Written
Testimony

Moreover, Henry Kissinger, spoke to the World Health Organization Council on Eugenics on February 25, 2009

"Once the herd accepts mandatory forced vaccinations, it's game over! They will accept anything — forcible blood or organ donation — for the "greater good". We can genetically modify their children and sterilize them for the "greater good". Control sheep minds and you control the herd. Vaccine makers stand to make billions and many of you in this room today are investors. It's a big win-win! We thin out the herd and the herd pays us for providing extermination services. Now what's for lunch".

Open your eyes.... this is a population control and tagging agenda (for the ID2020 plan), disguised as a pandemic.

I strongly oppose this vaccine passport system as it has nothing to do with health. The fact that the vaccinated and unvaccinated can both get and transmit the virus, nullifies any reason for discriminating against someone because they didn't take a shot.

The only reason someone would impose this idea of a passport system would be utter control, based off of no science whatsoever.

Written Testimony This is a quote from the CDC director Rochelle Walensky

"Our vaccines are working exceptionally well," she said. "They continue to work well with delta with regard to severe illness and death, but what they can't do anymore is prevent transmission."

This was in an interview on CNN

Thank you for time

Written Testimony

I strongly oppose Resolution 21-194, I think it not only discriminates but also segregates our communities and State. I think it is very destructive and could end up tearing apart families, communities, businesses and also produce higher crime rates due to the division and resentment it will create amongst us all. It feels a lot like Nazi Germany to me, and I personally feel violated as a woman and having the choice of what happens to my body taken away from me. What kind of message does this send to my children as well..that the very State which they live in will discriminate and "punish" people who have different beliefs. Hawaii will no longer be the "Aloha State" if this passes..

I STRONGLY oppose the vaccine health pass card. This “health pass” is completely prejudicial, discriminatory and creates mass segregation. My medical choices are of no ones interest but my own. And this behavior is and should always be illegal. I will not support ANY business that supports this bill. Shame on all of you for even suggesting this as a positive solution for the condition of our society right now. There are a dozen of better options than this. Starting with tourism. Please for the sake of us and our children and our children’s children, KILL THIS BILL!!!!

Written
Testimony

I OPPOSE VACCINATION!!! The ESSENTIAL people of HI have been working for over a year serving their community and family WITH OUT vaccinations! Essential workers have been considered heroes for their sacrifice on the CHOICE! of going to work and taking care of their families! It SHOULD BE A CHOICE to get a VACCINE that WE had no TIME or OPTION of taking this past whole year! HUMAN BEINGS should NOT be TOLD to choose their Personal Choice or risk LOSING their JOB!!!!!! This is the USA freedom of choice is a big staple in our country!!! If we are not ACTIVELY PRACTICING that in ALL that we do than we are no longer the United States of America!!!!!! Let ALONE The Hawaiian Islands!!! Do not FORCE PEOPLE Into a corner of submission for something that is a SOLE CHOICE!!!!!! TO BEGIN WITH!!! Please I strongly OPPOSE this ISSUE AND pray that Vaccination is strictly a PERSONAL CHOICE NOT MANDATED BY COMPANIES ANYWHERE!!!!!!!!!!!!!!!!!!!!!!

Written Testimony Frankly this matter is beyond laughable. Not only have the purported vaccinations been repeatedly demonstrated to be a tremendous health threat, they are experimental in nature; therefore, mandating them is in direct violation of the Nuremberg Code.

Written Testimony I'm part of a large group of voters who've survived having medically documented cases of COVID. Physiologically my immune system is as strong as those that have received a vaccination.
Its proven that vaccinated people are contracting the disease.
Why isnt there a provision for individuals like me to receive a Passport?

Please help

I strongly oppose the vaccine cards, as I have a medical and health issues due to toxic chemicals that have lead me to be on permanent disability! My health practitioner says no for me! I can't take the unknown risk with a trial medicine without long term known effects!

This crazy mandate would infringe on the rights, responsibilities and liberties of a free and independent people and society. This will once again Hurt our businesses as we all know 50% of clients will be blocked from businesses! Why?

The unvaccinated are not the reason this virus is spreading, in fact several of my friends have gotten COVID positive test after being around vaccinated people, bragging they are vaccinated!

Maybe we should be still testing all people and stop assuming (since we know for a fact) vaccinated people are safe!!!! A huge huge lie.

Please DO NOT INSTITUTE a vaccine passport. It's communism!!!! Is that what you support?

Sincerely,

Jeannette Howard

Business owner here that will be forced to close if you mandate this rule! It goes against healthy people and that's the business I'm in.

Aloha, my name is Gabrielle Pacheco, and I strongly oppose this resolution. This is discrimination and there is no argument to be made that would convince the public that it is not! Our country has fought for years against discrimination of race, gender, disability, etc. only for our very own government to implement it in their policies? You people are supposed to be protecting the people of Hawaii, not dividing and forcing (coercing) people into doing what they don't want to do! Vaccines may be dangerous to some, but we don't know the full list of long term effects for certain types of people because THERE IS NO LONG TERM STUDY possible at this point in time. If this resolution is passed you're giving authority for someone to FORCE this onto us. The word "force" and the word "mandate," doesn't sound like words our government should be using on a FREE PEOPLE. You are ILLEGALLY implementing these policies that go directly against our individual freedoms and rights that men have fought and died to give to us. Remember who you work for, you work for the people. And the people do NOT want to be forced to get a vaccine. The people do NOT want to "show their papers" in order to enter into any establishment. The people do NOT want to prove to their employers their vaccination status in order to come to a job that they've obtained through their hard work. The people do NOT want a vaccine passport!

Written Testimony

Name	Knights of Aloha 19
Phone	
Email	knightsofaloha@gmail.com
Meeting Date	09-02-2021
Council/PH Committee	Transportation, Sustainability and Health
Agenda Item	Resolution 21-194
Your position on the matter	Oppose
Representing Organization	Organization Knights of Aloha 19
Written Testimony	<p>The Knights of Aloha is a political organization that stands up for Faith, Family and Freedom. On behalf of our members and many in the Oahu and Hawaii community we stand opposed to this measure.</p> <p>The government should be of, for, and by the people. This current Resolution puts government over the people. The inoculations are not proven to stop the virus and thus, need to remain optional. Additionally, the resolution, as is, discriminates against an entire class of people who have contracted and recovered from COVID-19. Those people can not get a negative test and have no medical need to be inoculated. This order opens the city up to legal action by this group and must be amended to recognize natural immunity as an important and respected factor in the fight against this virus.</p> <p>Please listen to the voices of real people.</p>

KNIGHTS OF ALOHA
PUBLIC TESTIMONY ATTACHMENT
SEPTEMBER 2, 2021
RESOLUTION 21-194
COMMITTEE ON TRANSPORTATION, Sustainability AND HEALTH

I, Sachiye Auld **STRONGLY OPPOSE** Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

The Committee on Transportation, Suitability and Health should **immediately defer** the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports **ARE NOT** necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals **must** retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony:

Your political views are not welcome in any area of our health concerns. I will decide what is best for my families health care not the government! If you care for the people of Hawaii then stop spreading FEAR , DEVISION, and LIES. Lets talk more about therapeutics that work HCQ, ivermectin, zinc, vitamin C &D and more... We are done with politicians who care more about their pockets than the people they represent. Do what is right!

LET THE PEOPLE DECIDE!

I, Bruce Barham

STRONGLY OPPOSE Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

LET THE PEOPLE DECIDE!

The Committee on Transportation, Sustainability, and Health should immediately remove the above Resolution as it infringes on the rights, responsibilities, and liberties of a free and independent people.

The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

LET THE PEOPLE DECIDE!

The last time a government told the people to ...

"SHOW ME YOUR PAPERS"

It did not end well!

A mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families, or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

Remember you were elected by the people to govern not to RULE!

LET THE PEOPLE DECIDE!

Additional testimony:

Aloha. I am a very healthy person and have been healthy my whole life. this includes working out at least 5x a week. I believe in my God-given immune system, fresh air and I am pro freedom, that includes medical freedom. I have heard / seen both sides of this argument and this makes more sense to me. Besides the masks not even really working, the vaccines are not FDA approved - human trials don't finish until 2023. I do not feel safe putting something like the covid vaccine in my body. Thank you for listening to the people. God Bless

SEPTEMBER 2, 2021
RESOLUTION 21-194
COMMITTEE ON TRANSPORTATION, SUSTAINABILITY, AND HEALTH**

I, Jason Luckey **STRONGLY OPPOSE** Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

The Committee on Transportation, Sustainability, and Health should **immediately defer** the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports **ARE NOT** necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals **must** retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony:

I highly oppose Vaccine Mandates and Vaccine

Passports.

Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony: **Medical coercion is illegal, period. Modern medical treatments require informed and voluntary consent free from manipulation. Risks acknowledged by the FDA and/or Pfizer, Moderna, or J&J include side effects like myocarditis, pericarditis, strokes, blood clots, Seizures, Guillain-Barré syndrome, Bell's palsy, and possible fertility issues in women. While most medical treatments have risks attached, why coerce healthy people like me, at very low risk of dying from COVID-19, to take a vaccine I do not require and that I don't know what it's gonna do to me in my body?**

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony:

Millions of people have recovered from COVID-19 and possess natural immunity. Vaccine mandates fail to acknowledge that. Why require everyone with COVID-19 antibodies to receive a synthetic vaccine? Furthermore, vaccines impact each person's biology and body type differently, and pose unique risks. Mandatory COVID injections and vaccine passports deny family doctors the ability to individually assess patient health and offer medical recommendations unique to each patient.

RESOLUTION 21-194
COMMITTEE ON TRANSPORTATION, SUSTAINABILITY, AND HEALTH**

I, Theresa H **STRONGLY OPPOSE** Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

The Committee on Transportation, Sustainability, and Health should **immediately defer** the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports **ARE NOT** necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals **must** retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony:

Look into the death of Lisa Shaw, BBC reporter, she died of the vaccine. This is actually not a vaccine it is dangerous gene therapy. Finally the FDA approved "Vaccine" has no batches available and you are doing a bait and switch to get people to take the experimental EUA vaccine which is illegal.

Additional testimony:

Hawaii State Constitution Article 1 Section 1 All political power of this State is inherent in the people and the responsibility for the exercise thereof rests with the people. All government is founded on this authority.

No where in the constitution does it give you the authority to force the people to do anything. And as government officials according to Article 16 section 4 you all swore an oath to support and defend the constitution of the United States and the constitution of the state of Hawaii. No where in these documents does it give you all as indentured servants of the people the right to mandate the people to do anything that infringes on their rights. And according to article 1 section 2 of Hawaii state constitution it says that these rights shall not endure unless the people recognize their corresponding obligations and responsibilities. It is our responsibility and duty to let you all know that you are exceeding your jurisdiction! Vaccine passports ARE NOT the will of the people!!

Written Testimony

I oppose Agenda Resolution 21-194 as I strongly feel that my rights as a U.S. Citizen is being taken away. It's coming to a point where now my "daily" living is going to be impacted by what I can and cannot do in the sense of who will let me in to their businesses to do my daily tasks based on me being jabbed or not?! This is called segregation, this is called prejudice, this is called fear mongering and an attitude of "my way or the highway!" This will hurt businesses, and businesses are already hurting. Why are you shunning healthy people from continuing to live their lives? I don't understand why we are being "punished" for being healthy and choose to not being jabbed by an experimental shot that in my eyes and research is still not FDA approved. And if it was approved, I still choose not to take it as my body is doing well without it and for other reasons. What doesn't make sense to me is Individuals who received the jab, they are "protected" compared to those that are unjabbed, so it should be the unjabbed who should be afraid of getting covid-19. But that's the thing, we're not afraid because we are continuing to do the common sense steps as washing hands, staying home when we're sick, eating healthy, getting rest and choose not to be fear mongered. Please do your research and really listen to why there are many who are opposed to this Agenda Resolution 21-194. We are citizens who believe and stand for Freedom of Choice! And by the way, since when does the government know my body better than myself?! Please continue to let us go into businesses freely and continue to live life healthy. Please STOP going down the path of this digital passport. Stop fear mongering! Thank you for your time in reading my testimony.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony: I am related to someone who had
an extreme reaction from the shot causing their
whole life to change. This relative is now suffering
chronic and metabolic conditions as well as having heart issues
at the age of 19. I do not want this experiment shot

RESOLUTION 21-194
COMMITTEE ON TRANSPORTATION, SUSTAINABILITY, AND HEALTH

I. Genesis Cabjuan **STRONGLY OPPOSE** Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

The Committee on Transportation, Sustainability, and Health should **immediately defer** the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports **ARE NOT** necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals **must** retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Hawaii State Constitution Article 1 Section 1 All political power of this State is inherent in the people and the responsibility for the exercise thereof rests with the people. All government is founded on this authority.

No where in the constitution does it give you the authority to force the people to do anything. And as government officials according to Article 16 section 4 you all swore an oath to support and defend the constitution of the United States and the constitution of the state of Hawaii. No where in these documents does it give you all as indentured servants of the people the right to mandate the people to do anything that infringes on their rights. And according to article 1 section 2 of Hawaii state constitution it says that these rights shall not endure unless the people recognize their corresponding obligations and responsibilities. It is our responsibility and duty to let you all know that you are exceeding your jurisdiction! Vaccine passports ARE NOT the will of the people!!

The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony:

As a cancer survivor, I do not want the vaccine to alter my immune system. There are many testimonies of people who had flare ups of lupus, HIV etc after the vaccine.

RESOLUTION 21-194
COMMITTEE ON TRANSPORTATION, SUSTAINABILITY, AND HEALTH**

I, Katelynn M. **STRONGLY OPPOSE** Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

The Committee on Transportation, Sustainability, and Health should **immediately defer** the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports **ARE NOT** necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals **must** retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony:

This mandate is going against the constitution. My body. My CHOICE. I am aware of the dangers of the VAX.

Additional testimony:

Requiring a vaccine passport before individuals can eat at a restaurant or engage in any type of activity is fascist in the extreme. The idea goes against every single ideal the United States of America was founded on. Imposing a vaccine passport by any level or agency of the Government would violate the free exercise clause of the First Amendment. The Constitution Protects the RIGHTS OF THE PEOPLE! This tyrannical move by the Hawaii State "leaders" violates the right of conscience of every individual.

Additional testimony:

According to Hawaii's Dept of Health own Website, Covid 19's fatality rate is 0.9%. That's less than 1 percent. How can we justify lockdowns and other mandates for a virus that is less deadly than the seasonal flu?

Perhaps it's time we all have the courage to say that the Emperor is not wearing any clothes.

Not to mention that requiring proof of vaccination can be seen as a HIPAA violation.

RESOLUTION 21-194
COMMITTEE ON TRANSPORTATION, SUSTAINABILITY, AND HEALTH**

I, Laurence Friedman, **STRONGLY OPPOSE** Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

The Committee on Transportation, Sustainability, and Health should **immediately defer** the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports **ARE NOT** necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals **must** retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony:

I am against any medical mandates that
infringe upon my personal medical decisions.
Testing is not an option that supports free movement of
society.

Additional testimony:

I'd like to point out that the majority of the unvaccinated would just like to have a serious question and answer session with the Mayor. There are so many unanswered questions such as what appears to be a powerful treatment in ivermectin. Why aren't we researching this? And why would you mandate a passport when Comirnaty is not even available to most of us yet? Would you prefer that we get the unapproved version of the vaccine? The bottom line is that once this makes sense, I will take the vaccine. All we need are answers.

PUBLIC TESTIMONY ATTACHMENT
SEPTEMBER 2, 2021
RESOLUTION 21-194
COMMITTEE ON TRANSPORTATION, SUSTAINABILITY, AND HEALTH**

I, CINDY SNOW **STRONGLY OPPOSE** Resolution 21-194; **URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.**

The Committee on Transportation, Sustainability, and Health should **immediately defer** the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports **ARE NOT** necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals **must** retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

PUBLIC TESTIMONY
SEPTEMBER 2, 2021
RESOLUTION 21-194
COMMITTEE ON TRANSPORTATION, SUSTAINABILITY, AND HEALTH

I, Virginia Rasmussen-Perry STRONGLY OPPOSE Resolution 21-194; URGING THE CITY ADMINISTRATION AND THE STATE OF HAWAII TO IMPLEMENT A COVID-19 HEALTH CARD FOR ESTABLISHMENTS AT HIGHER RISK OF TRANSMISSION OF COVID-19.

The Committee on Transportation, Sustainability, and Health should immediately defer the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports ARE NOT necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and Individuals must retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony: The Nuremburg Code established ethical medical standards of practice and voluntary informed consent. Forced mandates of vaccine that is currently available (EUA use only) is not only a violation of the Nuremburg Code but is also in conflict with and are in direct violation of the 1st, 5th, 9th, and 14th amendments of the Constitution. According to Constitutional case law of **MARBURY VS MADISON** of 1803, U.S. Supreme Court Supreme Court Chief Justice Marshall established that **ANY LAW REPUGNANT OF THE CONSTITUTION IS NULL AND VOID.**

Additional testimony:

Requiring a vaccine passport before individuals can eat at a restaurant or engage in any type of activity is fascist in the extreme. The idea goes against every single ideal the United States of America was founded on. Imposing a vaccine passport by any level or agency of the Government would violate the free exercise clause of the First Amendment. The Constitution Protects the RIGHTS OF THE PEOPLE! This tyrannical move by the Hawaii State "leaders" violates the right of conscience of every individual.

The Committee on Transportation, Suitability and Health should **immediately defer** the above Resolution as it infringes on the rights, responsibilities and liberties of a free and independent people and society. The current resolution has local government overreaching to enforce on its citizens and businesses policies/orders which disrespect and disregard the sovereignty of our individual freedoms.

Vaccine passports **ARE NOT** necessary as businesses have the freedom to create and enforce their own health and safety policies based on their own principles and sensibilities and individuals **must** retain their right to vote and participate with their dollars to support businesses which promote values and practices similar to their own.

The vaccines are widely available and those who want to receive it have already done so. The inoculations have not been proven to stop the contraction or transmission of the virus, only to mitigate negative health outcomes, as such they should remain optional. Large populations of Honolulu have contracted COVID-19 and recovered, granting them considerable immunity which is not addressed or accommodated for in the current Resolution, an omission which is equal to discrimination and natural/civil injustice.

Let the People Decide! With no proof the current inoculations stop contraction or transmission, a mandatory vaccine passport does nothing but hurt our economy and trust in local government. We do not want your mandates and we do not need your help to make decisions for ourselves, our families or our businesses. Let the people and local markets dictate the response to this pandemic and have the Mayor and City support the will of the people.

I make this testimony of my own free will with no undue influence. Thank you for your consideration.

Additional testimony:

This Resolution is also in violation of the Equal Protection Clause of the 14th Amendment of the United States Constitution, by targeting certain businesses and not others. ALL citizens have the right and freedom to run their businesses to feed their families & you are infringing on that right.

Force Coercing American Citizens to use a Vaccine Passport is exactly like the Nazi's in Word War 2 forcing Jewish people to wear a yellow star in order for Nazi Totalitarian Rule to easily identify who was Jewish or not. Pushing this backwards agenda can only end in a bad way! I passionately oppose This Bill, or rather I oppose Resolution 21-194 .

Written Testimony End this madness now because we are all Free Citizens of the Great United States of America & if you want to sincerely help the health of Hawai'i Citizens, then make every single person flying into the Hawai'i State, vaccinated or unvaccinated have to test for covid before they fly to Hawai'i for this would most definitely bring down the covid cases, with out any doubt!

Please kill Bill Resolution 21-194 in it's tracks & immediately!

STRONGLY OPPOSED to ANY KIND of vaccine passport, card, either digital or paper. Being asked to "show papers" to walk into an establishment is repugnant to both the Hawaiian and U.S. Constitutions. MY personal medical data is MINE alone. Anyone attempting to ILLEGALLY require health information, or those violating medical privacy, or anyone depriving our rights under the color of law WILL BE LEGALLY HELD ACCOUNTABLE.

The only "emergency" that exists right now is the near constant TYRANNY we're seeing from members of government. This "vax card," and total dominance over the Lahui has ALWAYS been your goal. We KNOW mutations and "variants" are coming from the VACCINATED. We've watched as our cases went from ZERO (pre-vaccination) to now all "possible" cases including breakthru (vaccine-derived) are into the thousands. The ONLY thing that's changed is INJECTING and INFECTING everyone.

Written
Testimony

News of local DEATHS and INJURIES from these injections are making their way around the islands. Lying news & your civil defense propaganda is no match for LOCAL folks DYING due to this experimental excrement. We know the "FDA approved" drug is a DIFFERENT drug than the one currently being distributed under an EUA. We're NOT Guinea pigs, and we will fight you to your demise over our bodily autonomy. WE DO NOT CONSENT to vaccine cards or mandatory injections.

If you TRY to pass this "covid 19 health card" we will do as the French are doing and picnic OUTSIDE businesses that participate in your Tyranny. We will support our farmers & friends who will NOT require a "Nazi health card", and we will enjoy putting your Nazi-based businesses into bankruptcy. Medical apartheid and BLATANT SEGREGATION are both repugnant to the Constitution. We're all watching and ready to hold you accountable. It's time to do the right thing and vote NO.

Aloha e Chair Waters, Vice Chair Kia'āina, and Councilmembers,
My name is Doris Yang, and I respectfully offer my strong support of Resolution 21-194. I am currently studying pre-medicine Biochemistry in school, and I have worked hundreds of hours in our local hospitals. I have witnessed firsthand the devastating impacts that COVID-19 has had on our community, Native Hawaiians, friends, and loved ones. I have studied the COVID-19 virus thoroughly and endlessly throughout this pandemic because of my educational interests and career path into medicine. With four variants, including the widely known and contagious Delta variant, COVID-19 is highly dangerous, spreadable, but now preventable with the Moderna and FDA-approved Pfizer vaccines.
There is no vaccine that can promise anyone 100% immunity from any sickness, but they do provide a much greater level of safety for yourself and those around you. This is the best solution we have at the moment to fight this global pandemic, and it should be enforced in establishments that are at high risk of contaminating members of the public. As an aspiring physician, I want to do what's best for our community, and I know you do too.
Councilmembers, please support Resolution 21-194 regarding the implementation of COVID-19 immunization records for establishments.
Mahalo for the opportunity to testify,
Doris Yang

Aloha e Chair Cordero, Vice Chair Elefante, and Councilmembers,
My name is Doris Yang, and I am testifying in strong support of Resolution 21-193.
We have witnessed record-breaking numbers in tourism and COVID-19 cases throughout this pandemic, despite its effects on our community and its disproportionate impact on Native Hawaiians.

Tourism has plagued Hawai'i for generations, and Native Hawaiians, Pasifika, and other marginalized communities have suffered because of it. We have lost and hospitalized too many of our own to not take immediate action to contain the COVID-19 pandemic within Hawai'i. We need to act quickly before it is too late.

Councilmembers, please vote YES on Resolution 21-193 urging Governor Ige to reinstate pre-travel COVID-19 testing for all travelers.

Mahalo nui for the opportunity to testify,
Doris Yang

Written Testimony

Aloha e Chair Waters, Vice Chair Kia'āina, and Councilmembers,
My name is Kylie Akiona, I am a Kanaka Maoli wahine born and raised in O'ahualua, and I would like to offer my strong support of Resolution 21-194.
Over 8,600 Native Hawaiians (Kānaka Maoli) have tested positive for COVID-19. 500 Kānaka Maoli have been hospitalized, and 75 have lost their life to this virus. COVID-19 has disproportionately ravaged our Indigenous Hawaiian (Kanaka Maoli) population for well over a year, just as smallpox, syphilis, leprosy, measles, tuberculosis, whooping cough, gonorrhea, typhoid fever, and other illnesses wiped out over 90% of our ancestors by the 19th century. During the smallpox epidemic beginning in 1853, the Kingdom of Hawai'i made smallpox vaccination necessary, without protest from Kānaka. Queen Lili'uokalani, in her own words, took all measures possible, no matter how strict, to contain the smallpox epidemic.
In regards to fellow Kānaka who may be here to testify or listen in, I just want to say that the protests of "individual" rights and freedoms arrived with the illegal annexation of our Hawai'i, and the privatization of our islands for kālā (profit). Our culture and being as Hawaiians has never followed individualistic ideologies; we were born, thrived, and will die as a collective lāhui (nation). We have always prioritized the wellbeing of our lāhui and the greater community first, not the interests of the United States. Collectivism is how we survived as Kānaka in the face of oppression, and it is how we will carry on to the future. We have used immunization records in Hawai'i for decades now: to go to school, to play sports, traveling abroad, getting a job, entering a healthcare facility, etc. The requirement to get vaccinated for the flu, smallpox, tuberculosis, and more have been standard. Yes, you can get the flu even if you get the shot for it every year. NO vaccine is 100% effective, and we know that. But herd immunity cannot be reached if people continue to protest in the streets, unmasked, without regard to the spread of COVID-19 and its four known variants, including its highly contagious Delta variant. Protesting without offering effective alternatives only does harm to those in our community, particularly those who are most vulnerable, like our

kūpuna, those incarcerated, houseless, and living with underlying health conditions. I absolutely understand the general distrust of Western medicine, but the creation of these vaccines were by fellow BIPOC (Black, Indigenous, & People of Color). There are too many stories in our community of losing our loved ones, our 'ohana (family) struggling to work as frontline workers and healthcare providers at the peak of this pandemic, and historical examples of losing Kānaka to disease. 75 of our own died because of COVID-19. Getting as many Kānaka and residents vaccinated as possible is our best chance at stopping the spread of COVID-19. It is effective enough, and it is our best option. If we do not implement the best options for our health and safety, we will no longer have a lāhui to protect. We need to learn from our history and science, not misinformation from invalid sources. As your fellow Indigenous child of Hawai'i, Chair Waters, Vice Chair Kia'āina, Councilmember Tupola, my Councilmember Tsuneyoshi, and non-Native Councilmembers, I respectfully ask that you pass Resolution 21-194 regarding the implementation of COVID-19 immunization records for establishments at higher risk of spreading COVID-19. It is time to decolonize ourselves and our solutions to this global pandemic. Please feel free to contact me should you have any questions, concerns, or comments. Mahalo nui,
Kylie Akiona

Written Testimony

Aloha e Chair Cordero, Vice Chair Elefante, and Councilmembers,
My name is Kylie Akiona, I am a Filipino-Kanaka Maoli wahine born and raised in O‘ahualua, and I would like to offer my strong support of Resolution 21-193. Over 8,600 Native Hawaiians (Kānaka Maoli) have tested positive for COVID-19. 500 Kānaka Maoli have been hospitalized, and 75 have lost their lives to this virus. COVID-19 has disproportionately ravaged our Indigenous Hawaiian (Kanaka Maoli) population for well over a year. Many of us who are Indigenous to Hawai‘i are also disproportionately marginalized in myriad ways: houselessness, poverty, policing, incarceration, and more. Kānaka Maoli have been suffering intergenerational trauma because the state chooses to prioritize capital profit over the wellbeing of our community. We deserve protection from our public officials, especially our current Governor, a non-Native leader who promised to serve his Kanaka Maoli constituents.

Many residents who have been paying attention to local news and are likely here to testify have also seen tourists fly into our islands using fake “vaccine passports”, or what is historically and largely known as immunization records. These malihini (tourists/foreigners) decided to come to our islands during a global pandemic, and knew they were doing the wrong thing, but chose to come anyway. Personally, I have heard many stories of malihini from the continent who have traveled here during this pandemic knowing they were symptomatic, and were still able to come to Hawai‘i because of a lack of proper testing. Many Kānaka Maoli, Filipinos, and other marginalized members of our community work in the hospitality and tourism industry, risking the possibility of bringing home COVID-19 to our multi-generational households to pay rent, feed their ‘ohana (family), and survive in one of the most expensive places to live in the world.

A global pandemic is not the time to welcome malihini for profit, yet it is happening, despite general consensus, particularly that of Kānaka like myself. At the rate of our most recent and remarkably high case numbers, there is objectively no way to continue without endangering the health of every resident in Hawai‘i, and especially those who are vulnerable to COVID-

19. There is no logical, ethical way to safely continue in the way that we are right now. I respectfully ask that you urge Governor Ige to reinstate pre-travel COVID-19 testing for all travelers regardless of vaccination statuses.

Thank you for the opportunity to testify on this measure, and please feel free to contact me should you have any questions or concerns.

Mahalo piha,

Kylie Akiona

Testimony

I'm vaccinated, not to please the government but to (hopefully) not die from Covid, to live my life & to protect others. The honor system doesn't work, so I support a mandated digital &/or paper vaccine passport for the private sector to restrict access to those in the community who choose not get the Covid vaccine. At least until Hawaii has 92% heard immunity because of the stronger Delta variant. Government should respond for the greater good of the community despite the opposition of the vocal minority.

Honolulu City Council
Committee on Transportation, Sustainability and Health
September 2, 2021, at 10:30 a.m.

RE: Testimony of Matthew Weyer in Support of Resolution 21-194

Aloha Chair Cordero, Vice Chair Elefante, and Councilmembers:

I write in strong support of Resolution 21-194 for three main reasons: (1) a health pass will increase Hawaii's vaccination rate by incentivizing vaccination, (2) an increased vaccination rate will reduce the burden on Hawaii's healthcare system, and (3) a health pass would protect workers. In addition, I want to stress that our courts have continued to find and hold that vaccination mandates are legal and constitutional.

I first want to thank you for your service to our community during these challenging times. Our community is in crisis, and many look to you for guidance. As public officials with access to information that many in our community do not have, you often serve as gatekeepers. The information you share with your constituents thus has the potential to better inform your constituents' decisions and to save their lives.

A health pass will increase Hawaii's vaccination rate by incentivizing vaccination. One million COVID-19 vaccination appointments were made in France within just 16 hours of President Macron announcing the rollout of France's health pass. Another four million appointments were made in the two weeks that followed, and twelve million individuals have been vaccinated to date. This shows that a health pass works to incentivize vaccination among portions of the community that have yet to be vaccinated. If Honolulu were to implement a health pass, it would be joining Guam and major U.S. cities like San Francisco, New York, and New Orleans. A health pass would also incentivize vaccination amongst visitors, who would seemingly opt for vaccination so as to be able to enjoy the many restaurants and other venues that Hawaii has to offer.

An increased vaccination rate will reduce the burden on Hawaii's healthcare system. Yes, those that are vaccinated can catch, transmit, and die from COVID-19; however, the evidence clearly shows that (1) breakthrough cases are rare, (2) vaccinated individuals are less likely to catch and transmit COVID-19, and (3) vaccinated individuals are less likely to end up in the hospital. We face much uncertainty with the spread of COVID-19 variants, but we do know that vaccination is our best chance at being able to mitigate the impacts of the virus on our community. Understanding that we have community spread, vaccination is the key to minimizing

severe health outcomes and ensuring that our hospitals do not become so overburdened that it reduces the quality of care for all residents.

A health pass would protect workers. Our frontline workers have sacrificed for our community during the past year. They went to work before the vaccine was available, in our restaurants and other public venues, to help keep our economy afloat. They went to work during a time of much uncertainty, often unsure of whether they would be bringing the coronavirus back to their families at home when they returned from work. The vaccine is now available, and we have an obligation to stand up for the health of those same workers by creating a safe working environment.

A health pass is legal and constitutional. Not everyone in a community will always agree. Not liking or supporting something, however, does not make it unconstitutional or illegal. Since *Jacobson v. Massachusetts*, 197 U.S. (1905), the United States Supreme Court has consistently upheld vaccination mandates as constitutional and lawful. While not dispositive, the Court's denial of injunctive relief in *Klaassen v. Trustees of Indiana University* this year indicates that the current Court is also not seeking to upset the more than one hundred years of precedent. Vaccination mandates are also found in history, including the decision of Kamehameha III to implement a smallpox vaccine policy in 1854 to save lives.

Mahalo again for your service to our community, and please join me in supporting Resolution 21-194.

Mahalo,
Matthew Weyer

Written Testimony I support the vaccination passports. As a nursing student and healthcare worker, I learn and see the benefits of vaccinations. I'm regards to benefits versus risks, I have learned through my schooling and work that the benefits heavily outweigh the risks. The safety of the people of our state is as risk without the COVID-19 vaccination. Please continue the vaccination passports to keep our keiki and kupuna safe!

Written Testimony If people want to be ignorant and not get the vaccine then they shouldn't be allowed in the same places vaccinated people are. The vaccine itself is to help stop spreading the virus. Yes it's not a cure but it does lessen the chances of getting it and it also lessen the severity of it. If they want freedom then get the shot if not then stay home because they are the ones spreading the virus more than others.

Written Testimony I applaud the legislature for deciding they're done pandering to the selfish whims of those who refuse to get vaccinated for Covid-19.
I'm tired of this pandemic and tired of the people whose ignorance has already prolonged it.
Those who somehow still don't care about science or other people will just have to decide how committed they are to that when faced with the prospect, of some consequences for selfish choices!

I know quite a few business that have been affected with this pandemic by having to shut down, operate at a less capacity, spend more money on sanitizing products and having trouble hiring people. They cant really keep affording having an unvaccinated person(that may be asymptotic)coming to their location, get some people sick and having to shut down again and loose money not just for the owner but also putting in risk their employees health that are making the effort to come to work knowing that some people may be carrying the virus.

Yes, people have the right to choose but they should also know the consequences and cant be selfish.

If they dont want to get vaccinated, they can still go showing that they are negative so nobody is denying their right to go in.

This needs to stop. People have to stop being selfish and believe in science.

We all live on this island together, and no matter our differences of opinion or belief. We all affect each other with our actions which is why the aloha spirit is so important to us. We throw up a shaka or a friendly wave in traffic to absolute strangers for being respectful and generous while on the road because it's the right thing to do. It's for this reason that I support the vaccine pass, because in this pandemic too many have decided to be selfish and think only of themselves. This minority's effect on the greater health of the community cannot be ignored especially those keiki that are too young to protect themselves. In its current form the Resolution addresses the problem at hand while including the option for those who choose not to vaccinate to be included still. Please vote to pass Resolution 21-194. Mahalo

Implementing mandates and telling people "you either get vaccinated, or you lose your job or you can't go into an establishment" goes against OUR rights! You are NOT giving us the option to CHOOSE. A lot of employers are denying exemptions for NOT VALID reasons to force our hand to either get vaccinated or lose our jobs and our source of income to take care of our families. Being vaccinated does not make you IMMUNE to COVID and it does NOT lessen your chances of contracting the virus! Everyone, vaccinated or not should be tested regardless. No vaccine passports and no mandates!

I commend Councilmembers Kia'aina and Waters for introducing this measure and am in strong support.

The current crisis reveals that voluntary vaccination and appealing to the greater good has proven effete in the face of this variant. We cannot hesitate any longer with our health care systems strained to capacity and hundreds of innocent citizens daily having their own urgent health care delayed or otherwise compromised because of others, the vast majority whom have chosen not to get their vaccination.

Written Testimony We must use every tool at our disposal to slow the tide and allow those immunity to set in for those who were more recently vaccinated. This is a reasonable approach which I would have no reservations about taking part in.

With the phenomenon of falsified documents increasingly coming to light, I would ask that appropriate fraud protection and checks be put in place to minimize this from happening and weakening the intent and impact of the program.

thank you.

Karen Shishido

Written Testimony I strongly support this bill. COVID cases are only going up, hospitals are filling up and their staff are overwhelmed. Something needs to be done to slow down the spread. I have a family with 4 children and we all just want them to go to school, but even that's becoming dangerous as reports of positive cases are coming in almost everyday now. Not that there is a known case of spreading within school, but if it keeps up there will be.

As a respiratory therapist I am a frontline worker in the hospital, and can assure you everything they are saying in the news is true. We are stretched pass the limit and patient care is suffering. Now there is a real threat of not being able to meet the islands oxygen demand due to the tremendous amounts of infected needing treatment. Vaccination works and the numbers nationwide are the same as here, 90+% of the critically ill are non-vaccinated individuals. If this can save one life or prevent another outbreak/bubble from happening, we should do it. Please vote in favor of this resolution and any resolution that protects public health.
Thank you.

I oppose this. I am blown away. I am a small business owner and have suffered enough from the COVID lockdowns, etc. Adding mandates and rules will crush my business even more. Let me live and work in peace, let me make a living for my family in peace, let me continue to be a proud member of the community in peace. I have questions that demand answers. When does it end? Where does it stop? Where do we draw the line? What is the end game? How far will we let these measures go? Two weeks to slow the spread has turned into a nightmare 18 months later where I can't get a cup of coffee at the local cafe without two shots of an experimental drug. I chose no and hope you will too.

Aloha,

I do not normally take time out of my schedule to type up a testimony for hearings, but this is an important issue. I am here to state that I strongly oppose vaccine passports. This is a violation of HIPAA and our Constitution. You are directly stripping the freedoms of the people who ultimately voted for you to be in office and serve us.

Businesses have also taken a huge financial hit with COVID and vaccine passports will only make these situations more difficult for small businesses. The vaccine rate is extremely low on the West side and North Shore of Oahu. What is going to happen to all those businesses? There will be a drop in tourism and ultimately a weaker economy if this gets implemented indefinitely. You say 60 days, but who really knows how long it will last or what your intentions are with this policy.

Written
Testimony

When you mandate a vaccine, do you really think this is going to make people want to get it? On top of that, make a vaccine passport? Forcing this on people is only going to divide the community even more. Your job is to solve issues in the community and give us the choice to make our own decision, not force people to put an experimental vaccine in their body. The beauty of this country is we have the freedom to make our own decisions, not the government making decisions for us. It's the people who know what's best for them, not the government.

The vaccine passport is modern day segregation and discrimination. I thought we were well past this. If vaccines are safe and effective, the vaccinated should not be afraid.

I firmly ask that Hawai'i does NOT implement the vaccine passport and that you will listen to the voices of everyone. It will hurt more than help. Mahalo for your time.

We are asking in desperation for our government to please listen to the people of Hawaii, U.S. citizens who love what America stands for and love the islands we live in. We have been cancelled, shut out, ridiculed, and called irresponsible by our leaders for not getting a vaccination which has proven to be deadly to over 5,000 people and caused harm to over 100,000 people (and this is only those that have been reported on VAERS). It is estimated that this is only between 1-10% of all the incidents which actually occurred. . All we ask is that you review with an open mind, what many studies have shown and what many reputable doctors have said, about the treatability of the Covid virus by proven drugs that have been banned by the CDC and NIH for no good reason. Many studies have been made and yet the CDC has not changed its stance on Hydroxychloroquine and Ivermectin as safe drugs to use in the early treatment of Covid, even though many countries in the world have successfully used these protocols and prevented many deaths, unlike the U.S. where the death rate is the highest. All the fear that has been spread by our national leaders and the mainstream media have been dividing our people against each other and filling our hospitals needlessly. Instead of concentrating on helping those who come down with this illness, all the government wants to do is vaccinate everyone with an experimental substance that has not been proven to be effective in stopping the spread of the virus and its effectiveness is already starting to wane, unlike natural immunity. Our government has threatened to shut down our economy once again and cause further destruction in the lives of our people in spite of all the medical evidence that has shown that cannot stop a virus, you need to let it run its course. And please don't tell me that this is a deadly pandemic because once again, if you look at the statistics, 99%+ of the cases have not resulted in death. How can you ruin lives by taking away their jobs and the freedom that are supposed to be protected by our Constitution by proposing to mandate that we all get vaxxed by an experimental vaccine? Knowing all of this, you will have blood on your hands if you allow any such mandate to go through and allow businesses and schools to require them of their employees and students. You will also contribute to the

decline of human rights in the US. Please read and consider these articles which are to of many, many more from many sources. Thank you.

Written Testimony I adamantly oppose this Resolution as it violates citizens' Constitutional and medical rights. This is a gross overreach of governmental authority and it does not represent the citizens that our representatives are called to serve. I am outraged over this proposed "health card" and urge our State and County leaders to oppose this Resolution.

Aloha And Mahalo nui loa for giving me this opportunity to express and reason why humanity have rights to make choice and decision on their life, body and spirit is because everyone is precious very precious in the eyes of the Lord, Jesus Christ, because no man have the right to tell us what we should inject in our body; because every human being has the right to make a decision not the government. Because I BELIEVE that Jesus Christ is the Miracle worker; God sent His only begotten Son to die for us; it's by HIS blood that we have been saved and redeemed. I BELIEVE God protects those that BELIEVES and FOLLOWS Jesus Christ. Because there is no other way to explain except; I'm a Living breathing proof of my testimony that GOD protects us believers from the snare of the Fowler and from the plagues that mankind manufactured; because I Believe that God protects those that BELIEVE and TRUST in HIM; HE loves all humanity and HE IS the ONLY way to eternal life. I'm a living testimony because GOD is my protector from the evil that is truly depopulating all human. The enemy is out here to steal, kill, and destroy innocent lives; but we that remain alive and well will keep on sharing the LOVE of CHRIST JESUS, Amene Amene

Written Testimony I am in opposition measures that would put in place the requirement of vaccine verification for people to enter into business.
This is incredibly concerning for several liberties.
Democracy is founded on people having choices.

It is not about the vaccine, but about any person's freedom being limited based on their opinion or viewpoint.

	"There is no justification in taking away individuals' freedom in the guise of public safety" - Thomas Jefferson
Written Testimony	Our founding fathers believed it. I believe it. I STRONGLY OPPOSE vaccine passports! Vaccines do not stop transmission of covid. Therefore this is just an incentive program to get people vaccinated. It does not make the communities any safer. If that were the case we would ALL have to have a negative covid test to do the things permitted under the passport verification program.

I oppose any form of the vaccine passport. I am not anti-vax but I view such measures as an infringement on my freedoms as a citizen of the U.S. and the state of Hawaii. Please feel free to impose all the health and safety measures you deem necessary but requiring something in someone's body of which they do not approve is NOT freedom as I know it.

Written
Testimony

It is clear that an employer cannot make sex with the boss a prerequisite for employment; why, then, is it ok for that same employer to insist that one's body be violated with a vax as a condition of employment?

Studies have shown that those who are vaccinated can be as contagious as nonvaxxed persons. Why, then, discriminate against those who have not been vaccinated?

Thank you for your attention.

Aloha & Good morning,

I am 29 year old, I was born and raised on Oahu. My grandfather is a full Portuguese man born in 1929, his parents had 7 children. His father was the only one working during the plantation days. I was told they lived in segregated camps, where the Japanese, Portuguese, filipino families would live and work just to provide a better life. Being we had all the right to, we had fought a Great Depression during the world World War III.

Written Testimony

Yet somehow now during the 21st century's it seems that America; OurUnited States of America. It's changing drastically, I feel that our freedom and our rights are being overlooked. I am a person who would be considered a first responder worker, having to go to work every day and be scared that I will bring home this COVID-19 regardless that I'm vaccinated. I have a baby that isnt eligible nor if he or she was eligible, I don't feel nor think it is right to force Our children to take any type of vaccine that hasn't been around long enough; or studied long enough, I should Of said!. I don't think the scientist or the doctors all over the world would be able to ever guarantee that they'll be no future side effects on our future generations to come.

I am as an adult already taking a gamble by taking the vaccine, so help me God if anything were to happen to any of my future children especially after I just had a perfectly health child born with no borderline health issues. I would only feel that maybe by me taking the vaccine it had may also have a slight possibility that the vaccine could or may have a affect on our bodies.

I hope and pray for the best being that this island is all I know, i have never left this island my entire life, my family and I don't come from inheritance nor work really good jobs. We work decent jobs that barely help us stay afloat. At the end of the day, we don't look at too much negative things that happen to us because everyday our family struggles with health issues and with that comes a lot of other issues. I mean now that I am an adult wasn't the smartest with decision making but I think I did my best even with my poor education I'm working to provide what i can for my little son. Just like how my parents tried their best with what they could do, which was show us what love and respect feels like.

OHANA & ALOHA!

That is a very very important meaning because it represents our culture, how we treat others. Right now I feel like but telling you all a little background of my life you'll understand me.

Because our rates are words are being overlooked are Oahu, big Island, Maui, Lanai, Niihau Islands need to all remain United. I feel like with all that's been going on since Covid hit the US every individual State has been handling Covid with better systematic results. Why is it going to be almost 3 years and we still haven't been able to get a grasp on how to better manage the population intake with the travelers and it goes for both residents and non-residents.

Why didn't you all take more precaution during the first months of the vaccine, you all should I remained close for travelers as well as banning any residents flying out for 90 days at least or something. It just makes no sense to me that you guys aren't listening and aren't taking any of our words into consideration as we are the community of Hawaii our children are the next to come generation of Hawaii. Everyone chooses to argue Well at this time we need not to argue we need to compromise we need to set guidelines boundaries not mandates call mom because you guys have the power to do that, doesn't make it right. At the end of the day I'm sorry to say but it's your entitlement with your career, which I understand it's your job but do it right and listen and try to understand too or maybe others are coming from. People like myself who took the vaccine And felt uneasy about it but still took it because I thought of my family who is elderly and or who is battling cancer and is it eligible for the vaccine. Right now I'm going through a personal issue that being you need to show your vaccination card before going into the hospital now so ty can visit Your loved ones. My 91-year-old granddad who took a shot is battling pneumonia and had a heart attack and being that the hospitals are so filled up with all these people who Caught caught it and I feel like there are not enough nurses working so being that my grandfather is in the hospital he's not getting the best care he doesn't even have the proper bed for his frame because they were telling him their out of beds. The nurses are being so overworked that my grandpa doesn't even get his

food on time the food is cold they don't bring the coffee hot he's 91 and has a very sharp mind and I visit him and I see it so please do something to help control the tourism Because I feel like people traveling in and out in and now is what is causing the high numbers please help, please help our community please.

This will negatively affect people who are already struggling to meet basic living accommodations. Barring people from being able to work will only increase the many issue Hawaii has already with Homelessness and economic strife. What is the point of people's right if everything you do is directly trying to infringe upon them and demerit those who try to uphold them. We are at a turning point and people are loosing it this will not help anyone and will only increase this feeling of disenfranchised that has been growing more and more as of late. I implore you do not pass this because at this point you will be directly responsible of all the people who are at their last legs thinking of the worst way to end their suffering. We have lost the empathy that made Hawaii the land of Ohana and all we see is our government betting against its people.

“Vaccine Passports” are unscientific, discriminatory, and unconstitutional!
The EUA, COVID 19, experimental vaccines have not been proven to prevent infection or transmission. They may ONLY provide temporary, personal protection from advanced disease. The vaccinated can still be a source of contagion, just as the unvaccinated-this fact alone renders granting privileges to the vaccinated through any kind of immunity “passport” null and void!!
DO RIGHT BY ALL THE CITIZENS OF HAWAII.

Fully vaccinated individuals according to the CDC reports on their website states only 42% protection against Delta variant.
Your passport make no sense.

Written Testimony I am vehemently opposed to any form of health card (vaccine passport) or requirement to reveal personal medical decisions in order to freely function in society. It is fundamentally against everything we hold dear. This Resolution is an attempt to bully/force citizens of Hawaii into compliance against their free will and personal convictions.
