

A BILL FOR AN ORDINANCE

RELATING TO THE TRANSIT-ORIENTED DEVELOPMENT SPECIAL DISTRICT.

BE IT ORDAINED by the People of the City and County of Honolulu:

SECTION 1. Purpose. The purpose of this ordinance is to expand the transit-oriented development ("TOD") special district to include one additional Honolulu Rail Transit Project station area and to incorporate land use standards and guidelines for that area based on the recommendations in the Halawa Area TOD Plan.

SECTION 2. Section 21-9.100-2, Revised Ordinances of Honolulu 2021 ("Neighborhood TOD Plans"), is amended by adding subsection (i) to read as follows:

"(i) The primary design objectives of the Halawa Area TOD Plan are as follows:

- (1) Develop a TOD-oriented sports and entertainment district tied to the stadium in the Halawa (Aloha Stadium) station area;
- (2) Establish a gateway corridor connecting the rail station and stadium; and
- (3) Concentrate an eclectic mix of street-level retail with consistent frontage along Salt Lake Boulevard."

SECTION 3. Section 21-9.100-8, Revised Ordinances of Honolulu 2021 ("General requirements and development standards"), is amended by amending subsection (a) to read as follows:

"(a) *Site development and design standards.* Development standards are as established for the underlying base zoning district except as provided below.

- (1) *Density and height.*
 - (A) The maximum FAR is as prescribed by the underlying zoning district, unless modified through a special district permit or PD-T permit, through which an applicant may seek approval to exceed the base FAR up to a maximum FAR as follows:

A BILL FOR AN ORDINANCE

	BMX-3 and B-2 Districts	Apartment and Apartment Mixed Use Districts	Industrial and Industrial Mixed Use Districts
Base FAR	2.5	Refer to Table 21- 3.3	Refer to Table 21- 3.5
Maximum FAR with Minor Special District Permit	3.5	1.2 x Base FAR	1.2 x Base FAR
Maximum FAR with PD-T Approval	7.0	2.0 x Base FAR	2.0 x Base FAR

- (B) The open space bonus provisions of §§ 21-3.110-1(c) and 21-3.120-2(c) are not applicable.
- (C) In the apartment mixed use districts, the maximum commercial use density and location provisions of § 21-3.90-1(c) and Table 21-3.3 may be modified through a special district permit if the proposed development meets the objectives of the TOD special district, as enumerated in § 21-9.100-6.
- (D) *Height.* For maximum height not prescribed to a zoning district in this chapter, the allowable height is as prescribed on the zoning map[, unless modified through a special district or PD-T permit]. An applicant may seek approval to exceed the base height up to the parenthetical height identified as the bonus height limit on the zoning map, where applicable, through a special district or PD-T approval as follows:

Maximum Height with Minor Special District Permit	60 feet over the base height limit; or twice the base height limit, whichever is less
Maximum Height with Major Special District Permit	120 feet over the base height limit; or three times the base height limit, whichever is less
Maximum Height with PD-T Approval	More than 120 feet over the base height limit; or more than three times the base height limit, whichever is less

- (E) Where a TOD special district permit is sought to achieve height or density bonuses, the degree of flexibility requested must be

A BILL FOR AN ORDINANCE

commensurate to the community benefits the development will provide for the enhancement of the surrounding area. The highest degree of flexibility may be authorized for those projects that demonstrate:

- (i) The provision of measures or facilities, or both, to promote a highly functioning, safe, interconnected, multimodal circulation system, supporting easy access to, and effective use of the transit system on a pedestrian scale;
- (ii) The provision of open space, particularly usable, safe, and highly accessible public accommodations, gathering spaces, or parks, either onsite, within the TOD station area, or at a public park or gathering space within 400 feet of the same TOD station area boundary; and
- (iii) An appropriate mix of housing and unit types, particularly affordable for-sale or rental housing, or both, located on the project site or within the same rail station area as the project site. Affordable housing provided as a community benefit under this paragraph must be in addition to the affordable housing requirements of Chapter 29, which are based on a percentage of the total number of dwelling units in the principal project, and include higher percentages for IPD-T, PD-T and TOD special district projects seeking bonus height or density, or both.

The above notwithstanding, the completed project must be able to contribute positively to the economic enhancement of the affected area and the city, particularly with regard to providing a broad mix of uses, diverse housing, and diverse employment opportunities, including but not limited to whether the construction workforce employed on all phases of the project will be paid no less than the prevailing minimum wages established for public works projects pursuant to HRS Chapter 104.

- (F) When an applicant seeks to exceed the base height or density through a special district permit, the following conclusions must be made:

A BILL FOR AN ORDINANCE

- (i) Additional project elements that provide community benefits beyond what would otherwise be required have been incorporated into the project plan, as described in § 21-9.100-9(e);
 - (ii) The increase in height or FAR is reasonably related to the level of community benefits provided;
 - (iii) The additional FAR or height will not be detrimental to the quality of the neighborhood character or urban design, and will not negatively impact any adopted public views; and
 - (iv) The provision of community benefits in conjunction with the increase in FAR or height will further the goals and objectives of the TOD special district and the applicable neighborhood TOD plan.
- (2) *Building area.* Within the TOD special district, the building area standard for zoning lots in the apartment mixed-use and industrial mixed-use districts, as set forth in Tables 21-3.3 and 21-3.5, respectively, are not applicable.
- (3) *Yards, setbacks, street facade, and building placement.*
- (A) Required yards (in feet) in a TOD special district are as follows:

Required Yard Standards		B-2 and BMX-3 Districts	Apartment and Apartment Mixed Use Districts	Industrial and Industrial Mixed Use Districts
Minimum Front Setback ¹	All Streets	5		
Maximum Front Setback ¹	Non-Key Street	10	None	
	Key Street	10	15	10
	Highway ²	15		

¹ Front setbacks may be modified pursuant to § 21-9.100-8(a)(3)(C).
² For the purposes of this subdivision, "highway" refers to Farrington Highway or Kamehameha Highway. This provision prevails where there are other maximum front setbacks.

A BILL FOR AN ORDINANCE

- (B) The maximum setback must be measured from the front property line to the exterior face of the building. See Figures 21-9.3 and 21-9.4
- (C) The minimum and maximum front setbacks may be modified as follows:
 - (i) Buildings may encroach into the front yard; provided that:
 - (aa) A paved public sidewalk at least 8 feet in width fronts the building; or
 - (bb) Other buildings on the same block and sharing the same street frontage are set back less than 5 feet from the property line, and the proposed building location will match the existing setbacks so that the proposed building facade creates a consistent building alignment.
 - (ii) Buildings may be located beyond the maximum setback if the additional setback is necessary to provide for a tree within the property because it is not feasible to provide for street trees within the adjacent right-of-way due to limitations such as the location of existing infrastructure.
- (D) *Street facade and building placement.*
 - (i) On corner zoning lots fronting at least one key street, buildings must be located within 30 feet of such corner. See Figure 21-9.5.
 - (ii) On a zoning lot with a street frontage of 100 feet or less per frontage, the ground floor building facade must be placed within the maximum front setback for at least 75 percent of the linear street frontage. See Figure 21-9.6.
 - (iii) On a zoning lot with a street frontage greater than 100 feet per frontage, the ground floor building facade must be placed within the maximum front setback for at least 65 percent of the linear street frontage. See Figure 21-9.7.
 - (iv) Where a zoning lot fronts two or more key streets, the applicant may designate one of the streets or corners for purposes of street facade and building placement. The

A BILL FOR AN ORDINANCE

structure must be placed within the maximum setback on at least one key street. Setback improvements must be provided along all key street frontages, as set forth in § 21-9.100-8(a)(3)(E). See Figures 21-9.8 and 21-9.9.

- (v) Any portion of a building above 60 feet in height must be set back at least 50 feet from the side and rear property lines, and spaced at least 100 feet from any portion of other buildings above 60 feet in height on the same zoning lot, as depicted in the following illustration:

- (vi) To preserve important views, no structures greater than 3 feet in height, except for open work fences, may be constructed in the areas identified as view corridors in the § 21-9.100-12 exhibits. The director may approve uses and structures allowed in standard required yards; provided that no views will be adversely impacted.
 - (vii) Buildings above 40 feet in height must be oriented with the long axis aligned in a mauka-makai direction.
- (E) *Setback improvements.*
- (i) For structures within 15 feet of the property line with commercial or industrial uses on the ground floor, the setback area between the property line and the building facade must be improved with a combination of hard

A BILL FOR AN ORDINANCE

surface, landscaping that does not obstruct pedestrian access to the setback area, and pedestrian amenities, such as outdoor dining, benches and publicly accessible seating, shade trees, portable planters, trash and recycling receptacles, facilities for recharging electronic devices, Wi-Fi service, bicycle facilities, or merchandising displays.

- (ii) Awnings and other sunshade devices may exceed the 36-inch horizontal projection limit established in § 21-4.30(b), and may encroach into the right-of-way; provided that they meet all requirements of the building codes and do not conflict with any street tree requirements.
- (iii) For ground-floor residential uses, covered porches, stoops, or lanais may encroach into the required front yard. Other portions of the front yard must be landscaped, except for necessary access drives and walkways.
- (F) For zoning lots on key streets in the apartment mixed-use districts, walls and fences located between the property line and the front facade of a building set back 15 feet or less must not exceed 3 feet in height.
- (G) Where a side yard, rear yard, or zoning district boundary line abuts a designated bike-walk greenway, a 10-foot setback must be provided. This setback area must be landscaped or improved with a combination of hard surface, landscaping, and pedestrian amenities, such as benches, shade trees, water fountains, or bicycle facilities to enhance the greenway user experience. The setback area may also be used for convenience or commercial purposes that support the users of the bike-walk greenway, such as outdoor dining, merchandise displays, bicycle repair stations, and refreshment kiosks. No fences, except for openwork fences that do not exceed 4 feet in height, may be erected within the 10-foot setback area. For the purposes of this section, "openwork" means at least 50 percent open.
- (H) If a street tree plan or TOD special district street tree plan exists for the street that fronts the project, the applicant shall install street trees, as required by the director.

A BILL FOR AN ORDINANCE

- (l) The standards of this subdivision may be modified through a special district permit if at least one of the following conclusions may be made:
 - (i) Irregular property lines, zoning lot configuration, coastal hazards as projected using best available science, or topography of the zoning lot render the yards, setbacks, street facade, or building placement standards infeasible;
 - (ii) The existing built environment is arranged in such a way that the yards, setbacks, street facade, or building placement standards are incompatible or unreasonable, and better overall design may be achieved by following existing development patterns; or
 - (iii) The proposed building placement provides for publicly accessible, highly usable parks or gathering spaces, and will not detract from the purposes of the TOD special district.

- (4) *Building orientation and entrances.*
 - (A) Building facades must be predominantly oriented to and parallel with the street, property line, or adjacent public spaces. A primary building entrance must be placed on that street frontage. See Figures 21-9.10 through 21-9.12.
 - (B) Where multiple businesses are located along the front facade of the ground floor of a building, each establishment must have a separate entrance on that street frontage.
 - (C) At least one entrance must be placed every 50 feet of the building facade facing a street or pedestrian plaza.
 - (D) The requirements of this subdivision may be modified through a special district permit if irregular property lines, zoning lot configuration, or topography of the zoning lot renders them infeasible.

- (5) *Building transparency, blank wall limits, and required openings for*

A BILL FOR AN ORDINANCE

ground-floor facades.

- (A) Building facades within 20 feet of a front or street-facing property line must contain windows, doors, or other openings for at least 60 percent of the building facade area located between 2.5 and 7 feet above the level of the sidewalk. See Figure 21-9.13. Blank walls must not extend for more than 25 feet in a continuous horizontal plane without an opening on the ground floor of a building; provided that:
 - (i) Along key streets, this provision applies to all buildings, except for the portions of a building with residential dwelling units on the ground floor. Residential lobbies are subject to the transparency standard; and
 - (ii) Along non-key streets, structures with residential or industrial uses on the ground floor are exempt from this standard.
- (B) Openings fulfilling this requirement must be designed to provide views into work areas, display areas, sales areas, lobbies, or similar active spaces, or into window displays that are at least 3 feet deep.
- (C) Modifications to the building transparency standard may be approved through a special district permit; provided that:
 - (i) The proposed use has unique operational characteristics for which the required windows and openings are incompatible, such as in the case of a cinema or theater; and
 - (ii) Street-facing building facades will exhibit architectural relief and detail, and will be enhanced with landscaping and street furniture, or provide canopies and awnings in such a manner as to create visual interest at the pedestrian level and activate the sidewalk area.
- (6) *Pedestrian walkways.* Walkways with a minimum 5-foot

A BILL FOR AN ORDINANCE

unobstructed width must be provided according to the following standards:

- (A) Pedestrian walkways must create internal connections by connecting all buildings on a zoning lot to each other, to onsite automobile and bicycle parking areas, and to any onsite open space areas or pedestrian amenities. See Figures 21-9.14 and 21-9.15;
- (B) Pedestrian walkways must connect the principal pedestrian entryway to a sidewalk on each street frontage;
- (C) Direct and convenient access must be provided to neighboring properties from commercial and mixed use developments on zoning lots 1 acre or more in size whenever possible; and
- (D) Where walkways cross or are parallel to driveways, parking areas, or loading areas, they must be clearly identifiable through the use of different paving materials or other visual markings."

SECTION 4. Section 21-9.100-11, Revised Ordinances of Honolulu 1990 ("TOD special district-project classification") is amended by revising Table 21-9.8 TOD Special District Project Classification to read as follows:

"

Table 21-9.8 TOD Special District Project Classification		
Activity/Use	Required Permit	Special Conditions
Major modification, additions, or new construction on sites 1 acre or more in size	M/m	Projects on key streets are major. All others will be minor, unless the director has determined that the project may result in substantial impacts.
