

Bill 39 (2023) Testimony

Support Property Tax Exemptions for Residents within 1-Mile of Landfills

According to the US Small Area Life Expectancy Estimates Project, the homesteads surrounding the landfills only live for an average of 72 years, compared to the Hawaii average of 82 years. That's a 10 year decrease! There are multiple studies stating the adverse health affects of living near landfills, such as increased risk of cancer, birth defects, and various respiratory illnesses. This property tax exemption would allow our Kupuna to redirect their resources towards investing in their health and well-being, and ensure a fair and equitable approach to taxation.

BILL 39 (2023)

We humbly ask that you sign this petition to save our community.

Support Property Tax Exemptions for Residents within 1-mile of PVT Landfill

According to the US Small Area Life Expectancy Estimates Project, the homesteads surrounding the landfills only live for an average of 72 years, compared to the Hawaii average of 82 years. That's a 10 year decrease! There are multiple studies stating the adverse health affects of living near landfills, such as increased risk of cancer, birth defects, and various respiratory illnesses. This property tax exemption would allow our Kupuna to redirect their resources towards investing in their health and well-being, and ensure a fair and equitable approach to taxation.

BILL 39 (2023)

We humbly ask that you sign this petition to save our community.

Support Property Tax Exemptions for Residents within 1-mile of PVT Landfill

According to the US Small Area Life Expectancy Estimates Project, the homesteads surrounding the landfills only live for an *average* of 72 years, compared to the Hawaii average of 82 years. That's a 10 year decrease! There are multiple studies stating the adverse health affects of living near landfills, such as increased risk of cancer, birth defects, and various respiratory illnesses. This property tax exemption would allow our Kupuna to redirect their resources towards investing in their health and well-being, and ensure a fair and equitable approach to taxation.

BILL 39 (2023)

We humbly ask that you sign this petition to save our community.
