Shoreline Erosion/ Accretion

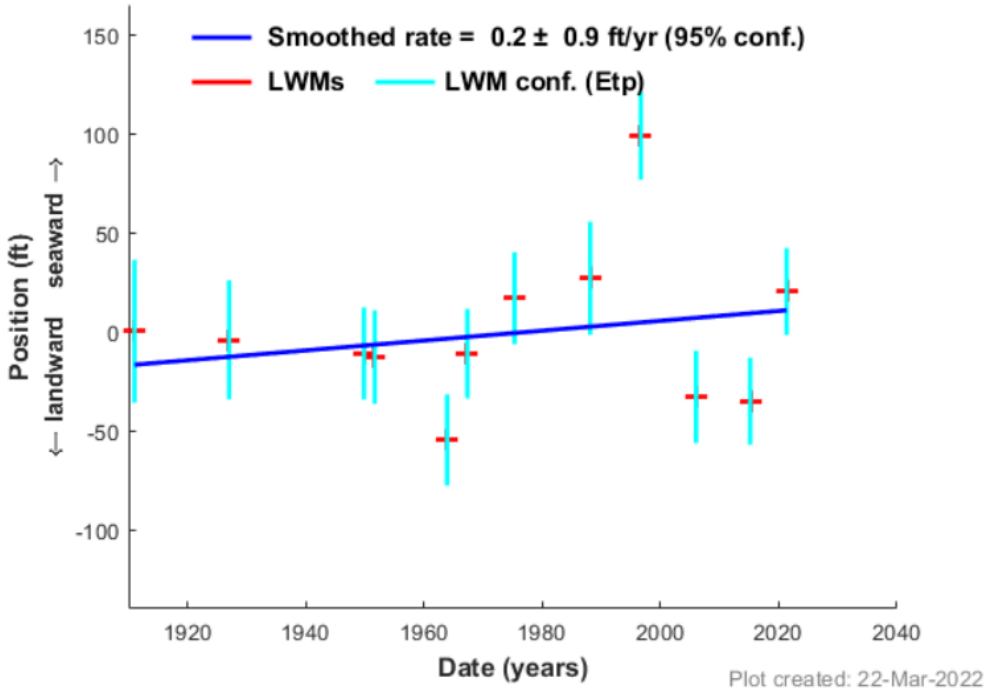

UH Climate Resilience Collective

https://www.soest.hawaii.edu/crc/index.php/hawaii-shoreline-study-web-map/

Accretion is occurring in most of Waimānalo

Shoreline Erosion/ Accretion

Examples of Avoidance and Minimization Measures

- Keep all facilities outside of the shoreline setback and the Sea Level Rise Exposure Area (SLR-XA).
- Provide temporary facilities when comfort stations are not available.
- Comply with State Historic Preservation Division (SHPD) requests, including an AIS and archaeological monitoring.
- Reuse pōhaku from the western comfort station.
- Implement best management practices (BMPs) to reduce erosion, protect water quality, and the avoid the spread of invasive species.
- Install only wildlife-friendly lighting.
- Perform construction during standard work hours only.
