Testimony:

We NEED the funds for this facility at Sharks Cove. This is the most dangerous coastline in the world. Our current North Shore Lifeguard headquarters is a condemned building at Kewaena that is falling apart and is a hazard. As a Lifeguard i strongly support the First responder center at sharks cove and is way over due and needed for the community's safety.

Testimony:

I write in support of these changes to the City Charter for the new Department of Ocean Safety and thank the City Council for following through on all the necessary steps for this important public safety development (the creation of the new independent department).
