Deterioration Curve

range

Tag
(G-force)

1

Phone comes into Bluetooth range, tag connects to phone, starts sending G-force data to phone. Phone starts collecting data.

2

Phone compiles data from tag (G-force) and itself (location, gyroscope, status) and sends it to CMT server via 4G or WiFi.

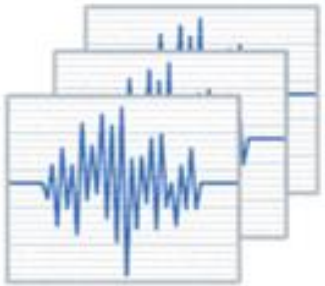

3

Process, analyze data and produce mapping, displayed on online portal.

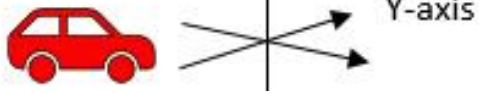

Specify the area and the data collection period.

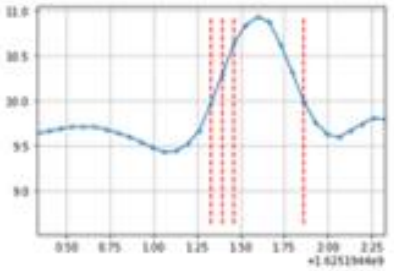

Export the vertical vibration data collected.

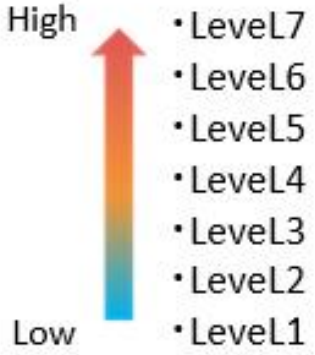

Z-axis acceleration data

Determine spots with large vertical vibration values.

Vibration values translated into levels.
