Testimony:

Aloha Councilmembers,

With man-driven climate change becoming worse, I applaud Councilmember Cordero for introducing this resolution (paired well with RES25-201) to enhance the resiliency of Honolulu to weather extreme heat. As a built-up urban environment situated on a tropical island in the Central Pacific, we are uniquely vulnerable to cases of extreme and worsening heat. Especially during the day and especially during the summer months. These types of extreme heat resiliency preparations will directly help middle- and working-class families.

I strongly urge this Committee to SUPPORT this resolution!
