Testimony: Aloha Committee Members, Sea-level rise, largely from man-driven climate change is a crisis we are presently confronting globally, and Honolulu is on the frontlines of that crisis. Worsening flooding is going to take an even higher human and financial toll unless we adapt and act NOW. Increasing our ability to monitor flooding is a commonsense solution to climate change adaptation our city needs. I applaud Councilmember Weyer for introducing this resolution and I urge the Committee to SUPPORT this resolution moving forward!

Testimony: Aloha Council members, It has been 50 years of asking for help with flooding in Waikane and Waiahole on Kamehameha Highway route 83 in Ko'olaupua that I personally know of from moving to Ka'a'awa from Kaneohe. There are no carrying capacity figures for this route available, and DOT has been asked frequently. There are no hurricane evacuation shelters existing and not enough hours are likely to exist to evacuate many emergencies because one accident ties up this ONLY thru road from Haleiwa to Kahalu'u. Even Emergency vehicles can't get through until it is too late. If camera monitors would help, please do that on this side of O'ahu first. We are in dire need of more safety measures in Ko'olaupua. Thank you.
