Testimony:

I support Bill 64 (2025) which will require more robust reporting on appropriations status and potential lapses.

I've listened to the dialogue on this one in past Council meetings. I side with giving our elected City Council officials as much information as they believe is necessary in order to make informed and timely decisions on our City's budget (which, to me, is incredibly complex and difficult to understand).

As the introducer (and former budget chairs) have spoken in support, I believe it's safe to assume that there's a deficiency in the current format of the information provided and that the Administration should work to bridge that gap.
