Testimony:

I support Bill 65 (2025) which will require more consolidated (aggregated) reporting on transfers between activities and characters of expense.

I've listened to the dialogue on this one in past Council meetings. I side with giving our elected City Council officials as much information as they believe is necessary in order to make informed and timely decisions on our City's budget (which, to me, is incredibly complex and difficult to understand).

I think having Council staff perform this aggregation is a waste of their own limited resources. The department that will be able to perform this aggregation and consolidated reporting the most efficiently and effectively is clearly the department that owns the underlying information.
